Detailed Explanatory Answers have also been provided for the selected questions for Better Understanding of the Candidates

English Practice Set RAILWAY GROUP D Ramesh Publishing House

One of the most important subjects for any student of engineering to master is the behaviour of materials and structures under load. The way in which they react to applied forces, the deflections resulting and the stresses and strains set up in the bodies concerned are all vital considerations when designing a mechanical component such that it will not fail under predicted load during its service lifetime. All the essential elements of a treatment of these topics are contained within this course of study, starting with an introduction to the concepts of stress and strain, shear force and bending moments and moving on to the examination of bending, shear and torsion in elements such as beams, cylinders, shells and springs. A simple treatment of complex stress and complex strain leads to a study of the theories of elastic failure and an introduction to the experimental methods of stress and strain analysis. More advanced topics are dealt with in a companion volume - Mechanics of Materials 2. Each chapter contains a summary of the essential formulae which are developed in the chapter, and a large number of worked examples which progress in level of difficulty as the principles are enlarged upon. In addition, each chapter concludes with an extensive selection of problems for solution by the student, mostly examination questions from professional and academic bodies, which are graded according to difficulty and furnished with answers at the end. \* Emphasis on practical learning and applications, rather than theory \* Provides the essential formulae for each individual chapter \* Contains numerous worked examples and problems

by Mocktime Publication

This book has been designed for the aspirants preparing to clear the recruitment examination conducted by Railway Recruitment Board (RRB) for the posts of Group-D. The book is divided into four sections - Mathematics, General Intelligence and Reasoning, General Science & General Awareness. Every chapter in this book contains a brief theory followed by a set of practice questions to ensure revision of the concepts. The book also provides a practice paper which will help students to practice and self analyze their level of preparation. FEATURES ? Thoroughly based on the syllabus ? Practice questions at the end of chapter for review ? Includes practice paper
