History does not simply happen. Most often it is the result of years of graduate training, assiduous research, and careful writing. Without historians we would be ignorant of our history. Yet, far too often we focus on the final product and ignore the dedicated men and women who have dedicated their lives to producing the books. So how do historians work? The answer, as revealed in the pages of this exciting new anthology, is as varied as the historians themselves. The editors have interviewed some of the nation's most highly respected practitioners to determine their approach to teaching, research, and writing. While no two of them work the same way, they all share the conviction that the study of history is vital to mankind's sense of itself. They value

rigorous training and conscientious professionalism. Both aspiring and professional historians will delight in learning how historians do their work, define their craft, and work their magic.

GCSE Geography Nelson Thornes

The present volume is the fourth issue of the Yearbook series entitled 'Evolution'. The title of the present volume is 'From Big Bang to Nanorobots'. In this way we demonstrate that all phases of evolution and Big History are covered in the articles of the present Yearbook. Several articles also present the forecasts about future development. The main objective of our Yearbook as well as of the previous issues is the creation of a unified interdisciplinary field of research in which the scientists specializing in different disciplines could work within the framework of unified or similar paradigms, using the common terminology and searching for common rules, tendencies and regularities. At the same time for the formation of such an integrated field one should use all available opportunities: theories, laws and methods. In the present volume, a number of such approaches are used. The volume consists of four sections: Universal Evolutionary Principles; Biosocial Evolution, Ecological Aspects, and Consciousness; Projects for the Future; In Memoriam. This Yearbook will be useful both for those who study interdisciplinary macroproblems and for specialists working in focused directions, as well as for those who are interested in evolutionary issues of Cosmology, Biology, History, Anthropology, Economics and other areas of study. More than that, this edition will challenge and excite your vision of your own life and the new discoveries going on around us!

GEOGRAFI : - jilid 2 Nelson Thornes

Campaigner, insurgent, fugitive, rebel commander, commodity kingpin, elected president, exile and finally prisoner, Charles

Taylor sought to lead his country to change but instead ignited a conflict which destroyed Liberia in over a decade of violence, greed and personal ambition. Taylor's takeover threw much of the neighbouring region into turmoil, until he was finally brought to face justice in The Hague for his role in Sierra Leone's civil war. In this remarkable and eye-opening book, Colin Waugh draws on a variety of sources, testimonies and original interviews - including

with Taylor himself - to recount the story of what really happened during these turbulent years. In doing so, he examines both the life of Charles Taylor, as well as the often self-interested efforts of the international community to first save Liberia from disaster, then, having failed to do so, to bring to justice the man it deems most to blame for its disintegration.
