Climate change is now creating enhanced risks of coastal erosion through storms and rising sea levels. This text provides a comprehensive review of the entire coastline of Europe, and provides a comparative analysis of the various erosion problems and solutions from across the continent.

Annali Legare Street Press

This heavily-illustrated book covers recent developments in archaeometry and offers a multidisciplinary approach to reconstructing complex cultural histories. It also presents a detailed history of human development in South America's Nasca region.

New Technologies for Archaeology Springer Science & Business Media

Antibodies are indispensable tools for research, diagnosis, and therapy. Recombinant approaches allow the modification and improvement of nearly all antibody properties, such as affinity, valency, specificity, stability, serum half-life, effector functions, and immunogenicity. "Antibody Engineering" provides a comprehensive toolbox covering the well-established basics but also many exciting new techniques. The protocols reflect the latest "hands on" knowledge of key laboratories in this still fast-moving field. Newcomers will benefit from the proven step-by-step protocols, which include helpful practical advice; experienced antibody engineers will appreciate the new ideas and approaches. The book is an invaluable resource for all those engaged in antibody research and development.

The Earth and Its Inhabitants Peter Lang Incorporated, International Academic Publishers

"The workshop considered potential contributions of the organization, functioning and governance of food value chains to the sustainability of food systems. The various sessions were focused on different aspects in order to integrate perspectives of

various actors, the private sector and civil society along with contributions from FAO, research and academia."--Publisher's description.

Handbook of Chiral Chemicals Food & Agriculture Organization of the UN (FAO)

This four-volume catalogue, published 1848-54, provides an extensive list of the zoological and geological literature available at the time.

Le grotte d'Italia organo ufficiale dell'azienda autonoma di Stato delle R. Grotte demaniali di Postumia University of Chicago Press
Questa raccolta di poesie e di racconti popolari anonimi in dialetto molisano tracciano il percorso di due storie che, pur diversificate, si compenetrano e si completano a vicenda: la storia individuale dell' autore e la storia collettiva della società di un paese del Sud. Le immagini di un mondo apparentemente immobile e arcaico si alternano alle vicende di una realtà storica complessa e tormentata, nel cui magma vecchio e nuovo si scontrano e si fondono. This collection of poems and anonymous folktales in the Molisan dialect traces the unfolding of two stories which, although distinct, interweave and complete each other: the author's individual story and the story of a town in the South of Italy. The images of an apparently immobile and archaic world alternate with the events of a complex and tormented historical reality, in whose magma the new and the old clash and fuse.

Antibody Engineering Volume 2 Springer

Environmental Contamination and Remediation Practices at Former and Present Military Bases outlines the different strategies that are useful in the investigation and subsequent remediation of military bases, Particular attention is paid to the pollution of groundwater. The book contains an excellent review of useful remediation techniques and several examples of their application to polluted military bases. Several mathematical models are demonstrated, showing their predictive value for real examples. A detailed list is given of chemical pollutants that can be found on a military base. Strategies are described for the investigation and determination of the future of a polluted military site. Examples are given, obtained from practical experience of dealing with old, contaminated sites.

Storia di CuneoThe Frontiers of Language and Nationality in EuropeBeach Management Tools - Concepts, Methodologies and Case Studies

This book provides an overview of beach management tools, including carrying capacity, beach nourishment, environmental and tourism awards (like Blue Flag or others), bathing water quality, zoning, beach typologies, quality index, user's perception, interdisciplinary beach monitoring, coastal legislation, shore protection, social and economic indicators, ecosystem services, and coastal governance (applied in beach case studies). Beaches are one of the most intensely used coastal ecosystems and are responsible for more than half of all global tourism revenues, and as such the book introduces a wide range of state-of-the-art tools that can be used to deal with a variety of beach challenges. Each chapter features specific types of tools that can be applied to advantage in beach management practices. With examples of local and regional case studies from around the globe, this is a valuable resource for anyone involved in beach management.

As pharmaceutical companies look to develop single enantiomers as drug candidates, chemists are increasingly faced with the problems associated with this subclass of organic synthesis. "The Handbook of Chiral Chemicals, Second Edition" highlights the problems associated with the production of chiral compounds on a commercial scale. The handbook fir

A beautifully clear, detailed, and fully revised and updated guide, DK's Reference World Atlas gives a superb overview of all the world's regions. Providing a detailed reference map set, the atlas also features computer-generated terrain-modeled maps and the landscapes, bringing an all-new dimension to cartography. This ninth edition of DK's respected Reference World Atlas includes all recent border, place name, and flag changes from around the world, including the emerging state of South Sudan.

The Soils of Italy is the first comprehensive book on Italian pedology in seventy years. Taking advantage of the authors' large experience and of the most up-to-date information and technology, this book treats the main soil types of Italy, their diffusion, their functions, ecological use, and the threats to which they are subjected during centuries of intensive management. It also deals with future scenarios of the relationships between soil science and other disciplines, such as urban development, medicine, economics, sociology, and archaeology. The description of the soils is accompanied by a complete set of data, pictures and maps, including benchmark profiles. Factors of soil formation are also treated, making use of new, unpublished data and elaborations. The book also includes a history of pedological research in Italy, spanning over a century.

Bibliographia Zoologiae Et Geologiae Architettura

This thorough volume delves into antiepileptic drug discovery with a comprehensive collection of innovative approaches for the

development of antiepileptic therapies, focusing on novel molecular targets for antiepileptic drugs, computer-aided approaches for the identification of new drug candidates, and therapeutic strategies to overcome refractory epilepsy. The last section illustrates the potential benefits that network pharmacology and rational drug repurposing could bring to the antiepileptic drug discovery community. Written for the Methods in Pharmacology and Toxicology series, chapters include the kind of detailed description and implementation advice to ensure results in the laboratory. Authoritative and practical, Antiepileptic Drug Discovery: Novel Approaches aims to provide medicinal chemists, pharmacologists, and other researchers with the tools need to further explore the study of pharmaco-resistant epilepsy and the discovery of new antiepileptic drugs.
