VelocityVelocity definition is - quickness of motion : speed. How to use velocity in a sentence.Velocity | Definition of Velocity by Merriam-WebsterThe velocity of an object is the rate of change of its position with respect to a

frame of reference, and is a function of time.Velocity is equivalent to a specification of an object's speed and direction of motion (e.g. 60 km/h to the north). Velocity is a fundamental concept in kinematics, the branch of classical mechanics that describes the motion of bodies.Velocity - WikipediaLike speed, velocity refers to the at which an object is moving—the distance per unit of time. But velocity

in physics also includes the direction in which the object is moving, whereas direction has no bearing on an object's speed. For example, if two cars were driving at a of 50 miles per hour, and both headed due north,...Velocity - definition of velocity by The Free Dictionaryrapidity of motion or operation; swiftness; speed: a high wind velocity. Mechanics. the time rate of change of

position of a body in a specified direction. the rate of speed with which something happens; rapidity of action or reaction. Velocity High Speed Internet Service Velocity Is an Important Concept in Physics. Velocity is defined as a vector measurement of the rate and direction of motion or, in simpler terms, the rate and direction of the change in the position of an object. The scalar (absolute value)

magnitude of the velocity vector is the speed of the motion. In calculus terms, velocity is the first derivative of position with respect to time.
