## DEANNA EMERSON

### Commerce Business Daily Macmillan

This book investigates the impact of the COVID-19 pandemic on the health and well-being of Indigenous Peoples and assesses the policy responses taken by governments and Indigenous communities across the world. Bringing together innovative research and policy insights from a range of disciplines, this book investigates the impact of the COVID-19 pandemic on the health and well-being of Indigenous Peoples across the world, with coverage of North America, Central America, Africa, and Oceania. Further, it explores the actions taken by governments and Indigenous communities in addressing the challenges posed by this public health crisis. The book emphasises the social determinants of health and well-being, reflecting on issues such as self-governance, human rights law, housing, socioeconomic conditions, access to health care, culture, environmental deprivation, and resource extraction. Chapters also highlight the resilience and agency of Indigenous Peoples in combating the COVID-19 pandemic, despite the legacy of colonialism, patterns of systemic discrimination, and social exclusion. Providing concrete pathways for improving the conditions of Indigenous Peoples in the wake of the COVID-19 pandemic, this book is essential reading for researchers across indigenous studies, public health, and social policy.

### Monthly Catalog of United States Government Publications Bloomsbury Publishing

The Atlantic Walrus: Multidisciplinary insights into human-animal interactions addresses the key dimensions of long-term human walrus interactions across the Atlantic Arctic and subarctic regions, over the past millennia. This book brings together research from across the social and natural sciences to explore walrus biology, human culture, environmental conditions and their reciprocal effects. Together, 13 chapters of this book reconstruct the early evolution of walruses, walrus biology, the cultural significance and ecological impact of prehistoric and indigenous hunting practices, as well as the effects of commercial hunting and international trade. This book also examines historic and ongoing management strategies and, the importance of new research methodologies in revealing hitherto unknown details of the past, and concludes by discussing the future for Atlantic walruses in the face of climate change and increased human activities in the Arctic. This volume is an ideal resource for those who are seeking to understand an iconic Arctic species and its long and complex relationship with humans. This includes individuals and researchers with a personal or professional connection to walruses or the Arctic, as well as marine biologists,

zoologists, conservationists, paleontologists, archaeologists, anthropologists, historians, indigenous communities, natural resource managers and government agencies. - Provides succinct overviews of the biology of the Atlantic Walrus (*Odobenus rosmarus rosmarus*) as well as human cultures within the North Atlantic Arctic and the surrounding region by consolidating research which until now has been scattered across fields and academic publications - Editorial team of inter-disciplinary researchers ensuring the breadth, depth and integration of material covered throughout the volume - Thirteen chapters, each authored by leading international researchers and experts on the Atlantic Walrus - Considers the inter-relatedness and complexity of species biology, ecological change, human culture, and anthropogenic pressures onto the Atlantic Walrus, all while remaining accessible to readers from different disciplines or a more generalist audience - Draws upon the latest methods in marine mammal and archaeological research - Assesses historical management of the species, while also considering current and future conservation efforts in light of human activities and climate change - Text supported by striking and insightful new maps and scientific illustrations, ideal for teaching and outreach

### Cloud Native Lexington Books

This report calls for a halt on Arctic oil drilling until: a pan-Arctic oil spill response standard is in place; a stricter financial liability regime for oil and gas operations is introduced that requires companies to prove that they can meet the costs of cleaning up; an oil and gas industry group is set up to peer-review companies' spill response plans and operating practices, reporting publicly; further independent research and testing on oil spill response techniques in Arctic conditions is conducted, including an assessment of their environmental side-effects; an internationally recognised environmental sanctuary is established in at least part of the Arctic. Drilling is only currently feasible in the Arctic during a short summer window and if a blow-out occurred just before the dark Arctic winter returned it may not be possible to cap it until the following summer - potentially leaving oil spewing out under the ice for six months or more with devastating consequences for wildlife. This report also warns that a collapse in summer Arctic sea-ice, increased methane emissions from thawing permafrost, melting of the Greenland ice-sheet and changes to the thermohaline circulation could all have disastrous consequences for the world - pushing up sea levels and transforming weather patterns. Temperature rises in the Arctic are already affecting the UK's weather. The report points out that there are already more proven fossil fuel reserves in the world than can be burnt safely and calls on the Government to rethink its approach to combating climate change by tackling the supply of fossil fuels, as well as demand

### Building Smart TeamsSAGE

### British Plant Communities Springer

This book explores the challenges facing food security, sustainability, sovereignty, and supply chains in the Arctic, with a specific focus on Indigenous Peoples. Offering multidisciplinary insights and with a particular focus on populations in the European High North region, the book highlights the importance of accessible and sustainable traditional foods for the dietary needs of local and Indigenous Peoples. It focuses on foods and natural products that are unique to this region and considers how they play a significant role towards food security and sovereignty. The book captures the tremendous complexity facing populations here as they strive to maintain sustainable food systems - both subsistent and commercial - and regain sovereignty over traditional food production policies. A range of issues are explored including food contamination risks, due to increasing human activities in the region, such as mining, to changing livelihoods and gender roles in the maintenance of traditional food security and sovereignty. The book also considers processing methods that combine indigenous and traditional knowledge to convert the traditional foods, that are harvested and hunted, into local foods. This book offers a broader understanding of food security and sovereignty and will be of interest to academics, scholars and policy makers working in food studies; geography and environmental studies; agricultural studies; sociology; anthropology; political science; health studies and biology.

### Sustainable Food System Assessment Routledge

This book describes the work of the North Pacific Marine Science Organization (PICES) since its launch 1992. Mapping the evolution of its agenda gives insight into the development of modern marine science in the context of competing demands of stakeholders within and outside the organization. The opening chapter consider the challenges of marine science as a large scale, and places PICES in the contexts of internationalism and science-based resource management. They also lay out the organization's longstanding focus on the development of climate science and its applications. Subsequent chapters explore the pros and cons of national vs. international science, negotiating the nature of investigation and cooperation across scientific, political and institutional boundaries in the region; national perspectives on purpose, scope, and mandates; assessing two major initiatives undertaken to date; the challenges of incorporating social science into an organization of mainly natural scientists.

### Leadership Resources Routledge

Building Smart Teams is an essential guide to creating a smart team fast. Based on research results from close to 2,000 individuals organized in more than 250 teams, Building Smart Teams identifies the three critical skill sets that teams need and

shows how to transfer these skills to a group. The authors' research and experience shows that, by concentrating on these three critical skills sets, a group is almost certain to quickly become a high performing team. High-functioning teams are increasingly important to organizational success, but just throwing a team together will not give the desired results. Building Smart Teams gives you the theory and rationale behind high performance teams, but, in addition, it is packed with exercises, diagnostic tools, tips, and techniques to use with groups. The exercises are time-tested with the more than 100 groups trained by the authors. The approach is not to dictate the one best way for teams to behave, but, rather, to help team members build skills and implement processes to increase success. Within this model, there is ample room for teams to discover their own unique culture, performance strategies, and paths to success.

[Indigenous Health and Well-Being in the COVID-19 Pandemic](#) Academic Press

Spirit Wars is an exploration of the ways in which the destruction of spiritual practices and beliefs of native peoples in North America has led to conditions of collective suffering--a process sometimes referred to as cultural genocide. Ronald Niezen approaches this topic through wide-ranging case studies involving different colonial powers and state governments: the seventeenth-century Spanish occupation of the Southwest, the colonization of the Northeast by the French and British, nineteenth-century westward expansion and nationalism in the swelling United States and Canada, and twentieth-century struggles for native people's spiritual integrity and freedom. Each chapter deals with a specific dimension of the relationship between native peoples and non-native institutions, and together these topics yield a new understanding of the forces directed against the underpinnings of native cultures.

[Youth Ministry Camping](#) Univ of California Press

Housing, Homelessness, and Social Policy in the Urban North brings together leading scholars on northern urban housing across the Canadian North, Alaska, and Greenland. Through various case studies, the contributors examine the ways in which housing insecurity and homelessness provide a critical lens on the social dimensions of northern urbanization. They also present key considerations in the development of effective and sustainable social policy for these areas. The book kickstarts a conversation between multiple stakeholders from different cultural and national regions across the North American north. It asks key questions including these: What are the common problems of, and responses to, housing insecurity and homelessness across these northern regions? Is a single definition of "homelessness" even possible, or desirable? And if not, can a shared language around how to end the housing crisis and homelessness in our northern regions still occur? The contributors explore how experiences of northern towns and cities inform an overall understanding of urban forms and processes in the contemporary world, and speak directly to the emerging body of literature on cities. Highlighting key limitations to federal, state, and provincial policy, Housing, Homelessness, and Social Policy in the Urban North raises important implications for developing policy that is responsive to northern realities.

[Building Smart Teams](#) Routledge

Making the Arctic City explores the unwritten history of city-building in the Arctic over the last 100 years. Spanning northern regions of North America, through Greenland, Svalbard to Russia, this is the first book to provide a truly circumpolar account of historical and contemporary architecture and urbanism in the Arctic - and it shows how the Arctic city offers valuable lessons for the post-colonial study of architectural and urban planning history elsewhere. Examining architects' and planners' designs for Arctic urban futures, it considers the impact of 20th-century models of urban design and planning in Arctic cities, and reveals how contemporary architectural approaches continue to this day to essentialize 'extreme' climate conditions and disregard the agency of Arctic city-dwellers - a critical perspective that is vital to the formulation of future design and planning practices in the region.

University of Ottawa Press

Rich with photos, maps, and sidebars, Native Peoples of the Americas covers native peoples from the past and present. Readers will learn about early civilizations, languages, religions, arts, and cultures of the indigenous peoples of the United States, Canada, and Middle and South America

[Annual Report](#) Springer

This guide provides over 300 pages of resources suggested by leadership educators in surveys, Center for Creative Leadership staff, and search of library resources. This eighth edition is half-new, including web sites and listserv discussion groups, and it places a stronger focus on meeting the needs of human resources professionals and corporate trainers. An annotated bibliography groups leadership materials in several broad categories: overview; in context; history, biography and literature; competencies; research, theories, and models; training and development; social, global, and diversity issues; team leadership; and organizational leadership (180 pages). Includes annotated lists of: journals and newsletters (9 pages);

instruments (21 pages); exercises (41 pages); instrument and exercise vendors (5 pages); videos (29 pages); video distributors (4 pages); web sites (6 pages); organizations (21 pages); and conferences (9 pages). (Contains a 66-page index of all resources.) (TEJ)

[The Wolf in the Whale](#) Addison Wesley Publishing Company  
British Plant Communities is the first systematic and comprehensive account of the vegetation types of this country. It covers all natural, semi-natural and major artificial habitats in Great Britain (but not Northern Ireland), representing the fruits of fifteen years of research by leading plant ecologists. The book breaks new ground in wedding the rigorous interest in the classification of plant communities that has characterized Continental phytosociology with the deep concern traditional in Great Britain to understand how vegetation works. The published volumes have been greeted with universal acclaim, and the series has become firmly established as a framework for a wide variety of teaching, research and management activities in ecology, conservation and land-use planning.

[Reconceptualizing Teacher Education](#) O'Reilly Media

In this collection, Canadian scholars articulate a response to their collective concerns about the impact of global policy on teacher education, provoking a far-reaching dialogue about teacher education in and for our times. The first two decades of the new millennium have witnessed unprecedented appraisal, analysis, and educational policy formulations related to teaching (K-12) across the Western world. In turn, teacher education has been greatly impacted, as governments around the world see the reform and management of teacher education as a key component in restructuring education toward greater economic competitiveness. The result has been an unwarranted and undesirable level of standardization. It is vital to the future of teacher education, and concomitantly public education, that we imagine alternatives to the homogenization of the educational experience that globalizing policies install. What is needed are vocabularies that enable educators and teacher educators to discern and articulate educational purposes beyond capital and which focus on the kinds of educational experiences that can help prepare the young to lead good and worthwhile lives. Using lessons learned from the Canadian context, the authors identify and investigate the importance of initial and continuing professional education that fosters teachers' intellectual freedom and study; advances an informed and critical appreciation of civic particularity and historical circumstance; and cultivates ethical (i.e., pedagogical) engagement with ideas and histories--teachers' own and their students--as crucial themes of teacher education globally. This book is published in English - Les chercheurs canadiens qui ont participé à cet ouvrage collectif proposent une réponse à leurs préoccupations collectives qui portent essentiellement sur l'impact de la politique globale sur la formation des enseignants, et ce, afin d'établir un dialogue franc et approfondi sur la formation des enseignants telle que pratiquée à notre époque. Durant les deux premières décennies du nouveau millénaire, le monde occidental a connu une augmentation sans précédent des analyses, des évaluations et des propositions les plus diverses portant sur la politique éducative (du jardin d'enfant à la fin du secondaire). En conséquence, la formation des enseignants a été très fortement impactée dans un contexte global où les gouvernements considèrent la réforme et la gestion de la formation des enseignants comme une composante clef de la restructuration de l'enseignement, et ce, afin que l'enseignement dispensé soit plus compétitif sur le plan économique. Force est de constater que cette approche s'est traduite par un niveau de standardisation indésirable et totalement injustifié. Pour garantir l'avenir de la formation des enseignants et donc de l'éducation publique, il est aujourd'hui fondamental d'imaginer des alternatives à l'homogénéisation de l'expérience éducative, qui résulte des politiques adoptées dans le cadre de la mondialisation. Dans cette perspective, il est nécessaire de fournir aux enseignants et aux éducateurs un vocabulaire et une terminologie spécifiques qui leur permettent de définir et d'articuler leurs objectifs éducatifs, au-delà de la notion réductrice de capital, tout en privilégiant les différents types d'expérience éducative qui préparent les jeunes à mener des vies satisfaisantes et utiles. En s'inspirant des enseignements tirés du contexte canadien, les auteurs de cet ouvrage ont identifié et évalué l'importance d'une éducation professionnelle initiale et qui continue de favoriser l'apprentissage et la liberté intellectuelle des enseignants ; promeut une appréciation critique et informée des spécificités civiques et des circonstances historiques ; et favorise un engagement éthique (et donc pédagogique) qui prend en compte les idées et les antécédents des enseignants et de leurs élèves et les considère comme des thèmes cruciaux de la formation globale des enseignants. Ce livre est publié en anglais.

[CHI 2005 Building Smart Teams](#)

This book investigates the multifaceted nature of change in today's Nordic Arctic and the necessary research and policy development required to address the challenges and opportunities currently faced by this region. It focuses its attention on the recent efforts of the Nordic community to create specialized Centers of Excellence in Arctic Research in order to

facilitate this process of scientific inquiry and policy articulation. The volume seeks to describe both the steps that lead to this decision and the manner in which this undertaking as evolved. The work highlights the research efforts of the four Centers and their investigations of a variety of issues including those related to ecosystem and wildlife management, the revitalization resource dependent communities, the emergence of new climate-born diseases and the development of adequate modeling techniques to assist northern communities in their efforts at adaptation and resilience building. Major discoveries and insights arising from these and other efforts are detailed and possible policy implications considered. The book also focuses attention on the challenges of creating and supporting multidisciplinary teams of researchers to investigate such concerns and the methods and means for facilitating their collaboration and the integration of their findings to form new and useful perspectives on the nature of change in the contemporary Arctic. It also provides helpful consideration and examples of how local and indigenous communities can be engaged in the co-production of knowledge regarding the region. The volume discusses how such research findings can be best communicated and shared between scientists, policymakers and northern residents. It considers the challenges of building common concern not just among different research disciplines but also between bureaucracies and the public. Only when this bridge-building effort is undertaken can true pathways to action be established.

[The 3 Keys to Empowerment](#) Bloomsbury Publishing

Developers often struggle when first encountering the cloud. Learning about distributed systems, becoming familiar with technologies such as containers and functions, and knowing how to put everything together can be daunting. With this practical guide, you'll get up to speed on patterns for building cloud native applications and best practices for common tasks such as messaging, eventing, and DevOps. Authors Boris Scholl, Trent Swanson, and Peter Jausovec describe the architectural building blocks for a modern cloud native application. You'll learn how to use microservices, containers, serverless computing, storage types, portability, and functions. You'll also explore the fundamentals of cloud native applications, including how to design, develop, and operate them. Explore the technologies you need to design a cloud native application Distinguish between containers and functions, and learn when to use them Architect applications for data-related requirements Learn DevOps fundamentals and practices for developing, testing, and operating your applications Use tips, techniques, and best practices for building and managing cloud native applications Understand the costs and trade-offs necessary to make an application portable

[Extracting Home in the Oil Sands](#) SAGE

"He has spent nearly three decades studying, learning from, crusading for, and thinking about hunter-gatherers, who survive at the margins of the vast, fertile lands occupied by farming peoples and their descendants, now the great majority of the world's population. In material terms, the hunters have been all but vanquished, yet in this profound and passionate book, Brody utterly dispels the notion that theirs is a lesser way of life."-- Jacket.

[Environmental Cultures in Soviet East Europe](#) Encyclopaedia Britannica, Inc.

Museums throughout the world are under increasing pressure in the wake of the 2008/2009 economic recession and the many pressing social and environmental issues that are assuming priority. The major focus of concern in the global museum community is the sustainability of museums in light of these pressures, not to mention falling attendance and the challenges of the digital world. Museums and the Paradox of Change provides a detailed account of how a major Canadian museum suffered a 40 percent loss in its operating budget and went on to become the most financially self-sufficient of the ten largest museums in Canada. This book is the most detailed case study of its kind and is indispensable for students and practitioners alike. It is also the most incisive published account of organizational change within a museum, in part because it is honest, open and reflexive. Janes is the first to bring perspectives drawn from complexity science into the discussion of organizational change in museums and he introduces the key concepts of complexity, uncertainty, nonlinearity, emergence, chaos and paradox. This revised and expanded third edition also includes new writing on strengthening museum management, as well as reflections on new opportunities

and hazards for museums. It concludes with six ethical responsibilities for museum leaders and managers to consider. Janes provides pragmatic solutions grounded in a theoretical context, and highlights important issues in the management of museums that cannot be ignored.

**The Other Side of Eden** Association for Computing Machinery (ACM)

An action guide and macro-level understanding of the process required to foster the workplace culture envisioned in *Empowerment Takes More Than a Minute*. As Ken Blanchard, John Carlos, and Alan Randolph clearly demonstrated in their previous

bestseller, *Empowerment Takes More Than a Minute*, empowerment is not a goal that can be achieved in a minute. Empowerment is a process that requires ongoing effort, awareness, and commitment to transforming the hierarchy. This essential guide offers managers detailed, hands-on answers to their real-life questions about how, exactly, they can navigate the journey to empowerment. Written in an easily accessible Q&A format, the book closely examines and expands on the three keys to empowerment originally presented in *Empowerment Takes More Than a Minute*—sharing information, creating autonomy through boundaries, and replacing the hierarchy with teams. It clearly outlines the promises and challenges of each stage of the

journey, providing managers with thought-provoking questions, clear advice, effective activities, and action tools that will help them create a culture of empowerment. Wherever they are in the journey, managers will find a clear roadmap in this user-friendly action guide. Praise for *Empowerment Takes More Than a Minute* "The most truthful, straight-talk book on managing people to come along in eons. This is an exceptional tool for business." —Harvey MacKay, #1 New York Times bestselling author "One of the very best organized, thought out, planned, and written books on any business subject I have read." —Stanley Bass, Human Resources Consultant, Stan Bass Consulting
