International trade has
shaped the modern world,
yet until now no single
book has been available
for both economists and
general readers that
traces the history of the
international economy
from its earliest
beginnings to the present
day. *Power and Plenty* fills
this gap, providing the
first full account of world
trade and development
over the course of the last
millennium. Ronald
Findlay and Kevin
O'Rourke examine the
successive waves of
globalization and
"deglobalization" that
have occurred during the
past thousand years,
looking closely at the
technological and political
causes behind these long-
term trends. They show

how the expansion and
contraction of the world
economy has been
directly tied to the two-
way interplay of trade and
geopolitics, and how war
and peace have been
critical determinants of
international trade over
the very long run. The
story they tell is sweeping
in scope, one that links
the emergence of the
Western economies with
economic and political
developments throughout
Eurasia centuries ago.
Drawing extensively upon
empirical evidence and
informing their systematic
analysis with insights from
contemporary economic
theory, Findlay and
O'Rourke demonstrate the
close interrelationships of
trade and warfare, the
mutual interdependence
of the world's different
regions, and the crucial
role these factors have
played in explaining
modern economic growth.
Power and Plenty is a
must-read for anyone
seeking to understand the
origins of today's
international economy,
the forces that continue to
shape it, and the
economic and political
challenges confronting
policymakers in the
twenty-first century.

A *Financial Times* and *Economist* Best Book of the Year exploring world trade from Mesopotamia in 3,000 BC to modern globalization. How did trade evolve to the point where we don't think twice about biting into an apple from the other side of the world? In *A Splendid Exchange*, William J. Bernstein, bestselling author of *The Birth of Plenty*, traces the story of global commerce from its prehistoric origins to the myriad controversies surrounding it today. Journey from ancient sailing ships carrying silk from China to Rome in the second century to the rise and fall of the Portuguese monopoly on spices in the

sixteenth; from the American trade battles of the early twentieth century to the modern era of televisions from Taiwan, lettuce from Mexico, and T-shirts from China. Bernstein conveys trade and globalization not in political terms, but rather as an ever-evolving historical constant, like war or religion, that will continue to foster the growth of intellectual capital, shrink the world, and propel the trajectory of the human species. "[An] entertaining and greatly enlightening book." —*The New York Times* "A work of which Adam Smith and Max Weber would have approved." —*Foreign Affairs* "[Weaves] skillfully between rollicking adventures and scholarship." —Pietra Rivoli, author of *The Travels of a T-Shirt in the Global Economy* *Pictures at a Revolution* Graywolf Press "The Ages of the Investor: A Critical Look at Life-cycle Investing" is intended to be the first installment in the "Investing for Adults" series. Just as grown-ups do not believe in the Tooth Fairy, the Easter Bunny, or Santa Claus, "Investing adults" know that there is no such

creature as the Stock-picking Fairy or the Market-timing Fairy. Further, there is no Risk Fairy who will write you cheap options that will protect your stock holdings against loss. Investing adults are familiar with Gene Fama, Zvi Bodie, Jack Bogle, and Burton Malkiel, and understand that a mean variance optimizer does not blend vegetables. In other words, this series is not for beginners. Future topics will, with luck, include the limits of market efficiency and diversification in increasingly non-segmented global markets.

In this captivating double life, Adam Gopnik searches for the men behind the icons of emancipation and evolution. Born by cosmic coincidence on the same day in 1809 and separated by an ocean, Lincoln and Darwin coauthored our sense of history and our understanding of man's place in the world. Here Gopnik reveals these two men as they really were: family men and social climbers, ambitious manipulators and courageous adventurers,

grieving parents and brilliant scholars. Above all we see them as thinkers and writers, making and witnessing the great changes in thought that mark truly modern times.

The Investor's

Manifesto

Harvard University Press
Alessandra Cecchi is not quite fifteen when her father, a prosperous cloth merchant, brings a young painter back from northern Europe to decorate the chapel walls in the family's Florentine palazzo. A child of the Renaissance, with a precocious mind and a talent for drawing, Alessandra is intoxicated by the painter's abilities. But their burgeoning relationship is interrupted when Alessandra's parents arrange her marriage to a wealthy, much older man. Meanwhile, Florence is changing, increasingly subject to the growing suppression imposed by the fundamentalist monk Savonarola, who is seizing religious and political control. Alessandra and her native city are caught between the Medici state, with its love of luxury, learning, and dazzling art, and the hellfire preaching and increasing violence of Savonarola's reactionary

followers. Played out against this turbulent backdrop, Alessandra's married life is a misery, except for the surprising freedom it allows her to pursue her powerful attraction to the young painter and his art. The Birth of Venus is a tour de force, the first historical novel from one of Britain's most innovative writers of literary suspense. It brings alive the history of Florence at its most dramatic period, telling a compulsively absorbing story of love, art, religion, and power through the passionate voice of Alessandra, a heroine with the same vibrancy of spirit as her beloved city. [The Airbnb Story](#) Hogarth "Compact and immensely readable . . . a tour de force. Prepare to be amazed." — John C. Bogle, Founder and Former CEO, The Vanguard Group "Vital—a cogent, timely journey through the economic history of the modern world." — Publishers Weekly In *The Birth of Plenty*, William Bernstein, the bestselling author of *The Four Pillars of Investing*, presents his provocative, highly acclaimed theory of why prosperity has been the engine of civilization for the last 200 years. This is

a fascinating, irresistibly written "big-picture" work that highlights and explains the impact of four elements that when occurring simultaneously, are the fundamental building blocks for human progress: Property rights, which drive creativity; Scientific rationalism, which permits the freedom to innovate without fear of retribution; Capital markets, which provide funding for people to pursue their visions; Transportation/communication, which allows for the effective transfer of ideas and products.

Meticulously researched, splendidly told, and featuring a new preface and introduction, *The Birth of Plenty* explains the interplay of the events, philosophies, and related phenomena that were nothing less than the crucible of the modern age. This is one of the rare books that will change how you look at the world.

the Modern World was
Created** Madison :

Please note: This is a companion version & not the original book. Sample Book Insights: #1 There are four institutions that

are prerequisite for economic growth: secure property rights, a scientific method, a capital marketplace, and rapid communication. #2 The world has gotten better in the past fifty years, not worse. The proportion of the world's population subjected to totalitarianism, genocide, starvation, war, and pestilence has been decreasing over the past two centuries. #3 The modern world seems to stagger under the load of ever-increasing population, with each year adding scores of millions of new mouths to feed. Overcrowding on our planet is a recent phenomenon, an artifact of the world's newfound prosperity. #4 The Malthusian trap is the idea that as a nation's population grows, its food supply does not, and thus the standard of living is inversely proportional to the number of mouths to feed. If population increases, there won't be enough food to go around, and prices will rise while wages fall.

[The Four Pillars of Investing: Lessons for Building a Winning Portfolio](#) Bloomsbury Publishing USA

This Violent Empire traces the origins of American

violence, racism, and paranoia to the founding moments of the new nation and the initial instability of Americans' national sense of self. Fusing cultural and political analyses to create a new form of political history, Carroll Smith-Rosenberg explores the ways the founding generation, lacking a common history, governmental infrastructures, and shared culture, solidified their national sense of self by imagining a series of "Others" (African Americans, Native Americans, women, the propertyless) whose differences from European American male founders overshadowed the differences that divided those founders. These "Others," dangerous and polluting, had to be excluded from the European American body politic. Feared, but also desired, they refused to be marginalized, incurring increasingly enraged enactments of their political and social exclusion that shaped our long history of racism, xenophobia, and sexism. Close readings of political rhetoric during the Constitutional debates reveal the genesis of this long history.

The classic guide to
constructing a solid
portfolio—without a
financial advisor! "With
relatively little effort, you
can design and assemble
an investment portfolio
that, because of its wide
diversification and
minimal expenses, will
prove superior to the
most professionally
managed accounts. Great
intelligence and good luck
are not required." William
Bernstein's commonsense
approach to portfolio
construction has served
investors well during the
past turbulent
decade—and it's what
made *The Four Pillars of
Investing* an instant
classic when it was first
published nearly a decade
ago. This down-to-earth
book lays out in easy-to-

understand prose the four essential topics that every investor must master: the relationship of risk and reward, the history of the market, the psychology of the investor and the market, and the folly of taking financial advice from investment salespeople. Bernstein pulls back the curtain to reveal what really goes on in today's financial industry as he outlines a simple program for building wealth while controlling risk. Straightforward in its presentation and generous in its real-life examples, *The Four Pillars of Investing* presents a no-nonsense discussion of: The art and science of mixing different asset classes into an effective blend The dangers of actively picking stocks, as opposed to investing in the whole market Behavioral finance and how state of mind can adversely affect decision making Reasons the mutual fund and brokerage industries, rather than your partners, are often your most direct competitors Strategies for managing all of your assets—savings, 401(k)s, home equity—as one portfolio Investing is not a destination. It is a journey, and along the

way are stockbrokers, journalists, and mutual fund companies whose interests are diametrically opposed to yours. More relevant today than ever, *The Four Pillars of Investing* shows you how to determine your own financial direction and assemble an investment program with the sole goal of building long-term wealth for you and your family.

Normal People Penguin

A captivating, illuminating, and sweeping historical narrative revealing the fascinating role media has played throughout the course of history. In “an engaging mix of theory, fact and enlightenment from across the millennia that wears its rich scholarship lightly,” *Masters of the Word* explains how new communication technologies and in particular our access to them, impacted human society (*The Guardian*). Writing was born thousands of years ago in Mesopotamia. Spreading to Sumer, and then Egypt, this revolutionary tool allowed rulers to extend their control far and wide, giving rise to the world's first empires. When Phoenician traders took their alphabet to Greece,

literacy's first boom led to the birth of drama and democracy. In Rome, it helped spell the downfall of the Republic. Later, medieval scriptoria and vernacular bibles gave rise to religious dissent, and with the combination of cheaper paper and Gutenberg's printing press, the fuse of Reformation was lit. The Industrial Revolution brought the telegraph and the steam driven printing press, allowing information to move faster than ever before and to reach an even larger audience. But along with radio and television, these new technologies were more easily exploited by the powerful, as seen in Germany, the Soviet Union, even Rwanda, where radio incited genocide. With the rise of carbon duplicates (Russian samizdat), photocopying (the Pentagon Papers), the internet, social media and cell phones (the recent Arab Spring) more people have access to communications, making the world more connected than ever before. This “accessible, quite enjoyable, and highly informative read” will change the way you look at technology, history, and power (Booklist).

"[Bernstein] enables us to see what remains the same, even as much has changed." —Library Journal, "Editors' Picks" "Riveting and thoroughly researched, it brims with interesting ideas and astonishing connections." —Phil Lapsley, author of *Exploding the Phone: The Untold Story of the Teenagers and Outlaws Who Hacked Ma Bell* "[Bernstein's] narrative is succinct and extremely well sourced. . . . [He] reminds us of a number of technologies whose changed roles are less widely chronicled in conventional histories of the media." —Irish Times [Stamped from the Beginning](#) McGraw-Hill From one of the brightest and most acclaimed new

lights in YA fiction, a fantastic new novel about a bi Black boy finding first love . . . and facing the return of the mother who abandoned his preacher family when he was nine. There's always been a hole in Gio's life. Not because he's into both guys and girls. Not because his father has some drinking issues. Not because his friends are always bringing him their drama. No, the hole in Gio's life takes the shape of his birth mom, who left Gio, his brother, and his father when Gio was nine years old. For eight years, he never heard a word from her . . . and now, just as he's started to get his life together, she's back. It's hard for Gio to know what to do. Can he forgive

her like she wants to be forgiven? Or should he tell her she lost her chance to be in his life? Complicating things further, Gio's started to hang out with David, a new guy on the basketball team. Are they friends? More than friends? At first, Gio's not sure . . . especially because he's not sure what he wants from anyone right now. There are no easy answers to love -- whether it's family love or friend love or romantic love. In *Things We Couldn't Say*, Jay Coles, acclaimed author of *Tyler Johnson Was Here*, shows us a guy trying to navigate love in all its ambiguity -- hoping at the other end he'll be able to figure out who is and who he should be.
