By the time I'd established a camp in the covered breezeway of the Luxor obelisk—"Cleopatra's Needle" it was called, at least according to a bronze placard on its wall—and bound her hands and feet, the sun had set and a slight rain had started to fall; something I fully welcomed after so much time in the desert. As to whether the girl welcomed it also, who could say. For even though I set her near the opening (as well as the fire) and provided her my own bedroll to sit on, she only continued to glare—probably due to us eating in front of her; for I had decided, though you might think it cruel, that I would starve her into speaking, if necessary. Which, of course, she finally did—speak, that is—although only after a considerable time, saying, hoarsely, yet clearly, assertively, "Is this some kind of torture? I mean, don't you have to feed prisoners before killing them? Isn't that what the Geneva Convention says?" I looked at her through the flames, saying nothing, even as Kesabe snarled. At length I carved a piece of meat from the spit and dropped it on a paper plate, which I carried around to her—but didn't hand over. Instead, I knelt and sliced off a single bite-sized morsel—then held it close to her nose. "Trade," I said, matter-of-factly. "One bite per something about you. It can be your name. Where you're from. How you've survived ... Just talk."

T-Rex on Noah's Ark? Right! How did Noah feed him without being fed to him? Not only does this
 book address the issues of Creation and evolution from scientific and biblical perspectives, it also
 chronicles the author's personal journey to discover and document the remains of Noah's Ark (1997,
 '98, '99, 2000, '01, '03, '05) and discusses the overwhelming significance of potential discovery. For
 anyone educated in American schools (especially secular colleges and universities), the topics, such
 as those addressed below, will be both challenging and eye-opening. Discover compelling answers
 to these questions: [What if the story of dinosaurs existing millions of years ago is a myth designed
 to bolster belief in an evolutionary process, but completely devoid of actual evidence? [What if
 dinosaurs were brought onto Noah's Ark along with all other air-breathing land animals and survived
 a global flood? [What if the various (and varying) accounts of "Ice Ages" on Earth are fictitious and
 have spiritual roots linked to the belief in evolution? [What if the remains of Noah's Ark were found
 in the upper reaches of Mt. Ararat in eastern Turkey?

Science communication, as a multidisciplinary field, has developed remarkably in recent years. It is
 now a distinct and exceedingly dynamic science that melds theoretical approaches with practical
 experience. Formerly well-established theoretical models now seem out of step with the social
 reality of the sciences, and the previously clear-cut delineations and interacting domains between
 cultural fields have blurred. *Communicating Science in Social Contexts* examines that shift, which
 itself depicts a profound recomposition of knowledge fields, activities and dissemination practices,
 and the value accorded to science and technology. *Communicating Science in Social Contexts* is the
 product of long-term effort that would not have been possible without the research and expertise of
 the Public Communication of Science and Technology (PCST) Network and the editors. For nearly 20
 years, this informal, international network has been organizing events and forums for discussion of

Both volumes of the WWII aerial combat classic now in one complete softcover edition! A WAR IS A
 DIFFICULT THING TO KILL The Second World War is almost over, but no one seems to have told the
 Germans - as Royal Air Force pilot Jamie McKenzie finds out when he's assigned to deadly shipping
 strikes along the enemy coast. Flying the Mosquito fighter-bomber against heavily armed targets is
 dangerous enough at the best of times, but after incurring the wrath of his vengeful commanding
 officer, Jamie is assigned the most unpopular navigator in the unit- not to mention the least reliable
 aircraft. Worse still, the commander's sights are firmly set on Jamie's beautiful young wife, Beth.
 Writer Garth Ennis (Preacher, The Boys) and artist Keith Burns (War Stories) re-unite after the
 success of their series Johnny Red, presenting another tale of World War Two aerial combat -
 featuring skies black with flak and enemy fighters, nail-biting low-level action, and the dark humor of
 men whose lives can be snatched away at any second... Out of the Blue.
