This book critically examines the relationship between civility, citizenship and democracy. It engages with the oft-neglected idea of civility (as a Western concept) to explore the paradox of high democracy and low civility that plagues India. This concept helps analyse why democratic consolidation translates into limited justice and minimal equality, along with increased exclusion and performative violence against marginal groups in India. The volume brings together key themes such as minority citizens and the incivility of caste,

civility and urbanity, the struggles for 'dignity' and equality pursued by subaltern groups along with feminism and queer politics, and the exclusionary politics of the Citizenship Amendment Act, to argue that civility provides crucial insights into the functioning and social life of a democracy. In doing so, the book illustrates how a successful democracy may also harbour illiberal values and normalised violence and civil societies may have uncivil tendencies. Enriched with case studies from various states in India, this book will be of interest to scholars and researchers of political science, political philosophy, South Asian studies, minority

and exclusion studies, political sociology and social anthropology.

Divided into three parts, the book provides, in Part I, a macro perspective of the Indian market. Part II offers an analytical discussion interspersed with vivid illustrations on conceptual issues

like branding, segmentation, positioning and differentiation. Part III features several new products; it also provides latest information on the products presented in the earlier edition. In addition, it analyzes the current market situation prevailing for a particular product in India. Finally, here, each chapter shows how leading companies are successfully marketing the particular product in the Indian market.

WHAT IS NEW IN THIS EDITION : The new edition incorporates the challenges offered by many new trends like growth of modern trade, explosion of the media, and the increasing influence of rural market in India. Chapters on The Indian

The book unfolds my professional performance. I have revealed my best and the worst both. It is a saga of a journalist though many would doubt whether work as proof -reader counts for journalism as it was not considered the mainstream of journalism, rather a stigma attached with the likes of me for 16 years in a row. Then there is reporting stint for 20 years which had its pitfalls and glory. Expressing views on contemporary issues has been changeable because I hold opinion and opinion does not hold me. Non-payment to my contribution to periodicals as free-lance journalist may sound grumbling, but it is pain of a pen- pusher

who at last surmises that one cannot survive with free-lancing in Bihar. Readers may ask why I don't write for the periodicals published outside Bihar. Frankly speaking I don't consider myself as a journalist of calibre. I am still a student of journalism. Moreover, I have been interested in matters Bihar from very beginning and am still groping in darkness as far as knowledge about my native state is concerned. The book is a not a literary piece that would involve your attention. As journalism is a literature in hurry, my writing in English may not be considered upto the mark and for many literary geniuses and eminent journalists it may be a foolish

exercise. But I am sure that whoever came into my journalistic sphere his resemblance can be found in me somewhat or more. Journalism is cynic business and one can find fault with himself also. It is a human nature and if I have complained or ridiculed anyone, I seek his pardon. I forgive and forget myself and others. The book may not be for the use of many but may hold interest of the journalists and if it is so, then I am a success. It is for you readers to decide. Book dedication To my mother who has always been an inspiring force to me.

In today's world of science, if just from the

impression of your thumb somebody accurately tells you, your name, the names of your mother, father, husband/wife, your birth-date, month, age etc. what would you call such prediction? Would you regard it as an amazing divination or as black magic? No, it is neither black magic nor a hand trick. Such prediction, which defies all logic and boggles one's mind, forms the subject-matter of the Agastya Naadi. Those predictions were visualized at different places by various ancient Sages, with their divine insight and factually noted by their chosen disciples, thousands of years ago, to be handed down from generation to generation. This great work makes us

realize the limitations of human sciences. That great compilation predicting the future of all human beings born or yet to be born, eclipses the achievements of all other sciences put together!

In a democratic society, police are expected to be accountable to the people they serve, upholding the rights of citizens and following due process. In India, however, political pressure in the competitive electoral arena forces the police to adopt questionable means and dubious strategies. As a hierarchical bureaucratic organization, disciplined in a military tradition and schooled in colonial traditions of deference to authority figures, India's police personnel have effectively alienated the very people they are supposed to serve and protect. In response to the

overwhelmingly bleak pessimism of researchers and analysts scrutinizing India's police force, *The New Khaki: The Evolving Nature of Policing in India* highlights those unobtrusive and indirect paths toward effective transformation in spite of politicians and bureaucrats. Analyzing the obstacles to reform, the book argues forcefully and systematically to present areas of potential innovation and successful case studies. Focusing on practical and actionable options, the book examines how the use of new technology, the judiciary, and other creative administrative mechanisms can give determined police

leaders the methods to change the policing system and its practices. It also provides strong evidence for the role of research and scholarship in transforming the police organization, offering illustrative examples and creative responses to endemic problems. The case studies presented here suggest that even when the powerful sections of society and those who control the police are not ready to bring changes, imaginative police leadership can find creative means to transform their organization to serve the people. *The New Khaki: The Evolving Nature of Policing in India* is a must-read for all those who are concerned about

policing and interested in its improvement for a better world.

Wing Commander (Retd.) Shashikant Oak of Pune has a great contribution in bringing the Naadi palm leaf based astrological system into limelight.

For about past 18 years, he has been conducting an original research on the aforesaid system. His research includes various scientific angles, and has given the whole subject a new dimension. To conduct the original research, he has visited almost all the

Naadi centers in India during the course of last 18 years, apart from individually meeting a thousands of persons to take on account the firsthand experiences. He has also presented a detailed paper called 'Comparative Study: Nostradamus and Naadi Granthas.' This revised and enlarged edition includes fresh astonishing experiences such as:- readings from blank paper, appearance of vibhooti upon the palm leaf, shocking episodes of Group Caption Rakesh Nanda throwing light on the ancient Maharishi's wisdom available in India. First time more than 220 addresses from all over Indian states have been presented in alphabetical order.

Excerpts from the interview of Padamshree Dr. Vijay Bhaskar: "As I am a scientist; while thinking about the Naadi palm leaves, my entire focal point was the computational aspect of it. How do the Maharishis know in advance the names and other information about the native? After an in-depth study, I conclude: if the supercomputers of ten years from today compute this information, it will take 10,00,00,00,00,00,00,00,00,000 calculations to collect information of one native. Simply putting, it is mathematically impossible. In the terms of computer science, this is referred to as the NP complete problem." Here is sample how the name

of a person appears in the leaf:

As cities become habitat for most of humanity, the question of their ecological capacity to sustain lives worth living becomes ever more critical. Yet, when we listen to debates about city planning and governance, and observe urban environmental campaigns on the ground, we notice that they have little to do with ecology or justice. To examine this contradiction, *Uncivil City: Ecology, Equity and the Commons in Delhi* looks at two decades of environmental politics in Delhi—across homes and workplaces, ordinary streets and extraordinary spectacles, and the river and the Ridge. It

argues that the terms of the discourse—what is an environmental issue, who is authorised to speak, and which modes of action count as legitimate—are partial, particularistic and perverse. ‘Bourgeois environmentalists’, who claim to speak in the public interest, for nature and society, have made the city what it is: unfair and unliveable. Only citizenship and civility will save the commons—air, water, space and trees—upon which cities depend for survival.
