A practical guide to philanthropy at all levels of giving that seeks to educate and inspire A majority of American households give to charity in some form or another--from local donations to food banks, religious organizations, or schools, to contributions to prevent disease or protect basic freedoms. Whether you're in a position to give \$1 or \$1 million, every giver needs to answer the same question: How do I channel my giving effectively to make the greatest difference? In *Giving Done Right*, Phil Buchanan, the president of the Center for Effective Philanthropy, arms donors with what it takes to do more good more quickly and to avoid predictable errors that lead too many astray. This crucial book will reveal the secrets and lessons learned from some of the

biggest givers, from the work of software entrepreneur Tim Gill and his foundation to expand rights for LGBTQ people to the efforts of a midwestern entrepreneur whose faith told him he must do something about childhood slavery in Ghana. It busts commonly held myths and challenging the idea that "business thinking" holds the answer to effective philanthropy. And it offers the intellectual frameworks, data-driven insights, tools, and practical examples to allow readers to understand exactly what it takes to make a difference.

Life is full of challenges. There are times when you will feel like you've done everything to the best of your ability, but in the end,

it still didn't work. Have you ever wondered why? Was it because life is unfair, or was it because you were actually "expecting the worst"? Have you considered expecting the best instead? You may think, "Of course, I considered great things to happen!," but science says otherwise. People who are preparing for something are found to be thinking more of the bad things that could happen than the positive outcomes. More often than not, thinking about unfortunate events actually make it happen. Hoping that you will not be late for a meeting will cause you to be late. Thinking of saying a complex sentence inappropriately actually makes you tongue-tied. Do you know why? It is because your thoughts have the power to change things and events. In this book, you will learn how to master positive thinking by learning about the power of thought and the Law of Attraction. With these core principles, this book will teach you ways on how to think positively by hacking your body, your speech, and your actions. You will know about scientific studies that proved the benefits of positive thinking. You will also be introduced to the successful life teachers who used positivity to become successful. Finally, you will be provided with step-by-step guides on how you can do it yourself. You are on your way to becoming a positive person who will enjoy living a good life by spreading the positive vibrations to the world! After downloading this book you will learn... Reimagining our global economy so it becomes more sustainable and prosperous for all Our global economic system is broken. But we can replace the current picture of global upheaval, unsustainability, and uncertainty with one of an economy that works for all people, and the planet. First, we must eliminate rising income inequality within societies where productivity and wage growth has slowed. Second, we must reduce the dampening effect of monopoly market power wielded by large corporations on innovation and productivity gains. And finally, the short-sighted exploitation of natural resources that is corroding the environment and affecting the lives of many for the worse must end. The debate over the causes of the broken economy—laissez-faire government, poorly managed globalization, the rise of technology in favor of the few, or yet another reason—is wide open. Stakeholder Capitalism: A Global Economy that Works for Progress, People and Planet argues convincingly that if we don't start with recognizing the true shape of our problems, our current system will continue to fail us. To help us see our challenges more clearly, Schwab—the Founder and Executive Chairman of the World Economic Forum—looks for the real causes of our system's shortcomings, and for solutions in best practices from around the world in places as diverse as China, Denmark, Ethiopia, Germany, Indonesia, New Zealand, and Singapore. And in doing so, Schwab finds emerging examples of new ways of doing things that provide grounds for hope,

including: Individual agency: how countries and policies can make a difference against large external forces A clearly defined social contract: agreement on shared values and goals allows government, business, and individuals to produce the most optimal outcomes Planning for future generations: short-sighted presentism harms our shared future, and that of those yet to be born Better measures of economic success: move beyond a myopic focus on GDP to more complete, human-scaled measures of societal flourishing By accurately describing our real situation, Stakeholder Capitalism is able to pinpoint achievable ways to deal with our problems. Chapter by chapter, Professor Schwab shows us that there are ways for everyone at all levels of society to reshape the broken pieces of the global economy and—country by country, company by company, and citizen by citizen—glue them back together in a way that benefits us all.

In over 45 years as a practicing psychologist, social entrepreneur, and professor, I have learned that emotional intelligence is the key to success in work and in life. I also know that becoming more self-aware is the key to developing strong emotional intelligence. I have taught, coached, and counseled people on how to become more self-aware and how to develop their social-emotional competencies. Both activities lead to higher emotional intelligence. This book presents the best practices developed and delivered in my teaching and in my psychology practice. Some of the stories and exercises in this book came from my previous book *Balanced Leadership in Unbalanced Times* (2009). I published some of the stories and exercises as articles on my blog at RobPasick.com. Please visit as I will continue to write there. I wrote this book because not everyone who needs this information is here at the University of Michigan to take my class. While it's nice to have a teacher and coach to help you through the process, you can learn a lot by yourself through reading this book and working on its exercises. If you follow the process, you'll end up with a self-made vision for success in both work and life. Furthermore, you will learn to set goals and develop the support

that will enable you to make your dreams come true. How to Use this Book This book reflects the process I use in my coaching and teaching. You will be asked to read, reflect, answer questions, and engage actively in a series of exercises. Some exercises will require the participation of significant people in your life. You will be guided through exercises designed to: Help you find your career sweet spot. Establish a vivid vision of your dream success in career and life. Establish goals in the key spheres of your life: family, friends, mind, body, spirit, career, and community. Determine how the right balance in these spheres will lead to choices that maximize your chances to be happy and successfully choose the right mate. Better understand others. Better manage your relationship with yourself. Better manage your relationship with others. Endorsements "When a successful person has 45 years of experience, and chooses to boil all he knows down to the essence, it is wise to pay attention. In this book, one of the most successful coaches I have ever known promises to mentor you into an elevated version of yourself. I think it is a must read." - Robert E. Quinn, Author of *The Positive Organization* "When Rob Pasick speaks, people listen...and when he writes, people want to read it...and that's because Rob has a clear mission in mind with all his words...he wants to help people put everything in their lives in perspective, in the proper place. "Self-Aware: A Guide for Success in Work and Life is a book that is clear, concise and easy to understand. It will make a difference in how you balance your professional and personal life and it may make a difference in what you end up doing.
