chapter 9 physics Flashcards Ch 9
Forces Inside Earth So when one of the
objects is earth, then the relevant
distance $d = \text{radius of the earth} +$
distance of other object from earth's
surface. $6.4 \times 10^6 \text{ m}$ (2) Even very very
far from earth, its gravitational force is
never actually zero, but it does decrease
rapidly and forces from other more
nearby objects would overwhelm the
grav force from earth. Chapter 9

(Gravity) Inside Our Earth. The earth, is a
dynamic planet. It is constantly
undergoing changes inside and outside.
Inside Our Earth (UPSC Notes):-Download
PDF Here. Interior of the Earth. The earth
is made up of several concentric layers
with one inside another. Crust - The
uppermost layer over the earth's
surface. It is the thinnest of all the
layers. NCERT Notes: Geography - Inside
