Key Performance Indicators Manual Penguin

Marketers globally rate email marketing as the most powerful online marketing strategy and the one which delivers the best return on investment (ROI). Email marketing has the lowest cost per acquisition. In other words, it is very cheap to acquire and retain customers through emails compared to other marketing channels. There is a reason why your inbox is always full of emails. Email marketing works and it works wonders, provided you know how to keep your inbox placement

rate and conversion rate consistently high. If you wish to dramatically reduce your cost per acquisition and increase marketing ROI, you need to become extremely good at tracking the performance of the various KPIs and metrics used for email marketing. A lot has been written about email marketing over the years. However, the majority of books out there talk about growing your email marketing list and perfecting your email marketing messages. This book is not about that. This book is not about finding the best email subject lines, getting started with email marketing or providing you with any sort of blueprint or template that promises to skyrocket your sales. This book focuses solely on the 'analytics' that power your email marketing optimization program. Inside this expert guide, you will discover: 1. Various KPIs and metrics for measuring email deliverability. 2. Various KPIs and metrics for measuring subscriber engagement. 3. Various KPIs and metrics for measuring email conversions and ROI. 4. Improving KPI performance for email marketing.

Implementing and Applying Better Practices Independently Published

Finding winning KPIs is not about picking some smart-sounding candidates from the long list of options. The best performance metrics are those that are born in the discussion and are tailor-made for your organization. This book is for those business professionals who are looking beyond standard performance metrics; this book will guide you step-by-step to develop the most effective KPIs.

The Balanced Scorecard translates a company's vision and strategy into a coherent set of performance measures. The four perspectives of the scorecard--financial measures, customer knowledge, internal business processes, and learning and growth--offer a balance between short-term and long-term objectives, between outcomes desired and performance drivers of those outcomes, and between hard objective measures and softer, more subjective measures. In the first part, Kaplan and Norton provide the theoretical foundations for the Balanced Scorecard; in the second part, they describe the steps organizations must take to build their own Scorecards; and, finally, they discuss how the Balanced Scorecard can be used as a driver of change.

Attribution modelling is the process of understanding and assigning conversion credit to marketing channels. The primary objective of attribution modelling is to understand the buying behaviour of your website visitors and to determine the most effective marketing channels for investment at a particular point in time. A lot has been said about attribution modelling over the years. However, talking about attribution is the easy bit. Implementing it is the real challenge. This book has been written to help you implement attribution modelling in your organisation. This expert guide will help your organisation think about marketing holistically. It will teach you to leverage the knowledge of attribution modelling while allocating your marketing budget and helping you understand your users' buying behaviour. In this book, there is a strong focus on using Google Analytics and other Google tools and technologies, such as Google Ads (AdWords). I have explained various attribution models mainly in the context of Google Analytics. However, a large portion of this book does not deal with Google Analytics at all. So even if you have never used Google Analytics before, you can still benefit from this book. To get the maximum benefit from this book, you will need a working knowledge of Google Analytics and ecommerce. No knowledge of statistics or traditional marketing mix modelling is required. Any person who wants to improve the online performance of their business and marketing campaigns should read this book. Online marketers, web analysts, and data scientists will benefit the most from this book. If you have a strong background in traditional marketing mix modelling you will benefit tremendously from this book because it will enable you to integrate attribution modelling data with your MMM data. By feeding the attribution modelling data to your MMM model you can truly measure your overall marketing effectiveness and fix attribution issues.
