Sons Occupational health issues have been identified as crucially important in the debate about socio-economic determinants of health and illness. Yet few texts have addressed issues of work and health in any depth, while interest in the field continues to grow. *Health and Work* explores current debates about inequalities in health, focusing on the consequences of new patterns of employment for health, stress and the quality of working life.

Drawing on multidisciplinary perspectives in an international, global context, each chapter examines changing discourses of risk and health and identifies implications for policy and practice within the health care arena, as well as in relation to the management of the work environment. *BMA Carer's Manual* Dorling Kindersley Ltd This comprehensive clinical practice manual emphasises evidence-based best practice,

focusing on inter-disciplinary care of the child in hospital and community settings. The additional needs of neonates and adolescents are highlighted. *The British Medical Association Guide* Wiley-Blackwell The student edition of *The Royal Marsden Manual of Clinical Nursing Procedures* has been the definitive, market-leading textbook of clinical nursing skills for fifteen years. This internationally best-selling title sets the gold standard for nursing

care, providing the procedures, rationale, and guidance required by pre-registration students to deliver clinically effective, patient-focused care with expertise and confidence. With over two-hundred detailed procedures which reflect the skills required to meet The Standards of Proficiency for Registered Nurses (NMC 2019), this comprehensive manual presents the evidence and underlying theory alongside full-colour illustrations and a range of learning activities designed to support

student nurses in clinical practice. Loved and trusted by millions, The Royal Marsden Manual of Clinical Nursing Procedures, Student Edition continues to be a truly indispensable textbook for students, and includes coverage of patient assessment and discharge planning, communication, infection prevention and control, perioperative care, wound management, nutrition, diagnostic testing, medicines management, and much more. Learning features in this revised

tenth edition include:
Learning outcomes – summarise the focus of the information in each chapter
Learning in practice – asks you to consider issues within your practice environment
Case studies – provide learning around a particular patient scenario
Clinical applications – ask you to consider how you would apply your knowledge to a clinical situation
Stretch activities – challenge you with more nuanced, advanced issues to reflect upon
Many of the features in the book

are relevant to trainee nursing associates, especially when used in conjunction with supervision from academic and clinical teachers. A companion website to this title is available at www.royalmarsdenmanual.com/student10e

The safe transfer of all hospital patients, especially those who are critically ill, is of crucial importance, demanding organisational, as well as clinical skills. Safe Transfer and Retrieval of Patients (STaR) is aimed at all health care workers involved with inter and intra-hospital transfers. It provides a much needed structured approach to transfer medicine, together with sound guidance on relevant clinical procedures. The second edition has been

extensively revised in line with new developments in transfer medicine. The book has been redesigned with five distinct sections covering: the principles of the STaR structured approach to transfers the management of the transfer or retrieval practical procedures related to transfer medicine an overview of clinical care during the assessment and stabilisation phases of transfer. the legal and safety aspects of transfers, specific differences in helicopter

transfers and transfers involving children A new chapter, the infectious or contaminated patient, has been added, in light of current concerns around the potential transfer of infection between patients and staff. The major revisions to this STaR coursebook bring it into line with the latest thinking on patient transfers, making it an invaluable guide for anyone involved in this aspect of health care.

Intensive Care Nursing
DK Publishing (Dorling Kindersley)

This care manual offers an holistic approach to care for people with dementia. It is written as a practical manual for health and social care professionals working in multi-disciplinary teams with people who have this debilitating neurodegenerative illness.

It is also highly relevant to those in non-mental health settings as the population ages and increasing numbers of people with dementia present with other medical conditions alongside their mental health problems. This manual covers a wide range of information in a short, easily accessible handbook format. It follows the pathway of dementia, from first presentation through to final stages of the illness. Fully revised and following the National Institute of Clinical Excellence guidelines, BMA When Your Child is Ill, 4th Edition, is perfect for parents and carers of children of any age. Oxford University Press Intensive care is a rapidly developing area of healthcare. This introductory textbook is written specifically for

qualified nurses who are working in intensive care units and also for those undertaking post-registration courses in the speciality. It is structured in four parts:

"Fundamentals of Care" explores patient-focused issues of bedside nursing; "Monitoring the Critically Ill Patient" describes the technical knowledge necessary to care safely for ICU patients; "Pathophysiology and Treatments" illustrates the more common and specialized disease processes and

treatments encountered; and "Advanced Nursing Practice" looks at how nurses can use their knowledge and skills to develop their own and others' practice. This accessible text: covers all the key areas of knowledge needed; includes fundamental knowledge sections, introductions, chapter summaries, a glossary of key terms, extensive and up-to-date references and a comprehensive index; and is clearly written by an experienced university lecturer with a strong

clinical background of working in intensive care nursing.

The Practical Approach

Highly Commended, BMA Medical Book Awards 2014
The fifth edition of this highly successful and well-regarded book continues to provide those working in neonatal intensive care units with precise instructions on the diagnosis and management of common neonatal problems. This edition has been extensively updated and revised, while retaining

the background physiology, key references, and diagrams that made previous editions so successful. Several new chapters have been added, including the subjects of fetal medicine, antenatal diagnosis, and obstetrics for the neonatologist. Using a clear, accessible style, this edition features discussions of evidence-based medicine and the introduction of additional easy-to-digest lists. The text has been made more internationally applicable, including a re-focus of the

chapter on organization of neonatal care away from UK-specific admission criteria and more towards general reasons for admitting a baby to the intensive care ward. A Manual for Neonatal Intensive Care provides invaluable guidance for trainees in pediatrics, neonatology, and neonatal nursing and forms a useful ready-reference for the practicing pediatrician and nurse.

Highly Commended, BMA Medical Book Awards 2015. In 2008, Paul

Farmer and Jim Yong Kim described global surgery as the "neglected stepchild" of healthcare, and now leaders from around the world are working to redefine it as a human right through the Lancet Commission on Global Surgery. In order to help advance global surgery and anesthesia as a public health intervention, providers require a practical, hands-on manual to train and educate them to provide safe and effective surgery and anesthesia in resource-limited settings.

In an effort to respond to that need, over 140 clinicians from high-, low-, and middle-income countries collaborated to create the Global Surgery and Anesthesia Manual: Providing Care in Resource-Limited Settings.

Living with Risk The Stationery Office Palliative Care Nursing at a Glance is the perfect companion for nursing students, health and social care practitioners, and all those involved in palliative care delivery, both in the clinical and

home setting. Written by an expert team of academics, nurses, educators and researchers it provides a concise and easy-to-read overview of all the concepts and clinical decision-making skills necessary for the provision of good-quality palliative and end-of-life care. Divided into six sections, the book includes coverage of all key clinical applications, principles of symptom management, palliative care approaches for a range of conditions and

patient groups, exploration of the roles of the multi-professional team, as well as ethical challenges. Superbly illustrated, with full colour illustrations throughout Provides information on delivery of care in a range of settings Broad coverage makes it ideal reading for anyone involved in palliative care delivery User-friendly and accessible resource for those working in both specialist and non-specialist adult settings *Global Surgery and Anesthesia Manual*

Dorling Kindersley Ltd The standard work for all those involved in the field of clinical nutrition and dietetics, *The Manual of Dietetic Practice* has been equipping health care professionals with the essential foundations on which to build expertise and specialist skill since it was first published in 1988. The fourth edition responds to the changing demand for multidisciplinary, patient-centred, evidence-based practice and has been expanded to include dedicated chapters

covering adult nutrition, freelance dietetics, complementary and alternative therapies.

Compiled from the knowledge of both individual experts and the British Dietetic Association's Specialist

Groups, this truly is the essential guide to the principles of dietetics across its whole range.
