5G: The New Network Arrives Springer
This book constitutes the refereed proceedings of the 21st IFIP WG 5.5 Working Conference on Virtual Enterprises, PRO-VE 2020, held in Valencia, Spain, in November 2020. The conference was held virtually. The 53 full papers were carefully reviewed and selected from 135 submissions. They provide a comprehensive overview of major challenges and recent advances in various domains related to the digital transformation and collaborative networks and their applications with a strong focus on the following areas related to the main theme of the conference: collaborative business ecosystems; collaborative business models; collaboration platform; data and knowledge services; blockchain and knowledge graphs; maintenance, compliance and liability; digital transformation; skills for organizations of the future; collaboration in open innovation; collaboration in supply chain; simulation and analysis in collaborative systems; product and service systems; collaboration impacts; boosting sustainability through collaboration in Agri-food 4.0; digital innovation hubs for digitalizing European industry; and

collaborative networks for health and wellness data management.

Authentic Marketing Springer Nature

This book provides a contemporary theoretical insight into the fashion and luxury industry, addressing potential gray areas within the literature. The authors analyze the luxury and fashion industry using multiple perspectives, allowing for a critical comprehensive overview of the phenomenon across diverse streams. The book provides insight into fashion and luxury retailing in the context of both online and brick and mortar retailers based on a variety of market scenarios. It deciphers the rationale of customer behavioral and decision making in online and offline luxury and fashion purchasing contexts. It provides an overview of the challenges that the industry faces with the advent of the evolving omni-channel environment. The multiple theoretical and practical nuances of the fashion and luxury industry are presented. In this sense, the book is a fundamental reference point for the students and academics. This book will be of interest to practitioners in the fashion and luxury retailing sectors. Also, many policy makers will find the conceptual and exploratory insight of this book relevant to their organizational and retailing policies. The new knowledge that is produced in this book is a ground breaker in the fashion and luxury

literature. It offers insight from both theoretical and practical perspectives from both retailer and customer perspectives.

Consumer Protection in E-Retailing in ASEAN Harvard Business Press

This book addresses emerging issues in usability, interface design, human-computer interaction, user experience and assistive technology. It highlights research aimed at understanding human interactions with products, services and systems and focuses on finding effective approaches for improving the user experience. It also discusses key issues in designing and providing assistive devices and services for individuals with disabilities or impairment, offering them support with mobility, communication, positioning, environmental control and daily living. The book covers modeling as well as innovative design concepts, with a special emphasis on user-centered design, and design for specific populations, particularly the elderly. Further topics include virtual reality, digital environments, gaming, heuristic evaluation and forms of device interface feedback (e.g. visual and haptic). Based on the AHFE 2020 Virtual Conference on Usability and User Experience, the AHFE 2020 Virtual Conference on Human Factors and Assistive Technology, the AHFE Virtual Conference on Human Factors and Wearable Technologies, and the AHFE 2020 Virtual Conference on Virtual Environments and Game Design, held on July 16–20, 2020, it provides academics and professionals with an extensive source of information and a timely guide to tools, applications and future challenges in these fields.

Master Data Analytics Hands-On by Solving Fascinating Problems You'll

Actually Enjoy! Harvard Business Review recently called data science “The Sexiest Job of the 21st Century.” It’s not just sexy: For millions of managers, analysts, and students who need to solve real business problems, it’s indispensable. Unfortunately, there’s been nothing easy about learning data science—until now. Getting Started with Data Science takes its inspiration from worldwide best-sellers like Freakonomics and Malcolm Gladwell’s Outliers: It teaches through a powerful narrative packed with unforgettable stories. Murtaza Haider offers informative, jargon-free coverage of basic theory and technique, backed with plenty of vivid examples and hands-on practice opportunities. Everything’s software and platform agnostic, so you can learn data science whether you work with R, Stata, SPSS, or SAS. Best of all, Haider teaches a crucial skillset most data science books ignore: how to tell powerful stories using graphics and tables. Every chapter is built around real research challenges, so you’ll always know why you’re doing what you’re doing. You’ll master data science by answering fascinating questions, such as:

- Are religious individuals more or less likely to have extramarital affairs?
- Do attractive professors get better teaching evaluations?
- Does the higher price of cigarettes deter smoking?
- What determines housing prices more: lot size or the number of bedrooms?
- How do teenagers and older people differ in the way they use social media?
- Who is more likely to use online dating services?
- Why do some purchase iPhones and others Blackberry devices?
- Does the presence of children influence a family’s spending on alcohol?

For each problem, you’ll walk through defining your question and the answers you’ll need; exploring how others have

approached similar challenges; selecting your data and methods; generating your statistics; organizing your report; and telling your story. Throughout, the focus is squarely on what matters most: transforming data into insights that are clear, accurate, and can be acted upon. *A Casebook for Reaching Your Socially Responsible Consumers through Marketing Science* John Wiley & Sons

The study on the impact of the digital consumer's emotional intelligence based on the moral values promoted in e-business presents an actual interdisciplinary topic in the context of the digital age. The research proposes an original approach to e-business and digital consumer in terms of moral values and emotional intelligence. The Internet has positive effects on consumers and organizations when it is used properly to improve the quality of life. New consumers are more selective, receptive and interested in new technologies. Digital consumers have the opportunity to get informed quickly about products/services offers and e-business provides a simplified acquisition process through diversity and accessibility.

The Consumer Financial Protection Bureau's Semiannual Report to Congress Marshall Cavendish

International Asia Pte Ltd
Dedicated to Professor Peter Buckley, OBE, this volume of Progress in International Business Research explores the new challenges for MNEs, SMEs (small and medium sized enterprises) and INVs (International New Ventures) emerging from this changing and increasingly unpredictable political, economic, social and technological VUCA world.

Business Expert Press

Fashion is a lot more than providing an answer to primary needs. It is a way of communication, of distinction, of proclaiming a unique taste and expressing the belonging to a group. Sometimes to an exclusive group. Currently, the fashion industry is moving towards hyperspace, to a multidimensional world that is springing from the integration of smart textiles and wearable technologies. It is far beyond aesthetics. New properties of smart textiles let designers experiment with astonishing forms and expressions. There are also surprising contrasts and challenges: a new life for natural fibers, sustainable fabrics and dyeing techniques, rediscovered by eco-fashion, and "artificial apparel," made of wearable electronic components. How is this revolution affecting the strategies of the fashion industry?

Allegations of Discrimination and Retaliation Within the Consumer Financial Protection Bureau Emerald Group Publishing

Engage on a deeper level by disrupting the typical business development script Authentic Marketing offers a forward-thinking approach to achieving an entirely new level of engagement with today's purpose-driven and skeptical audiences. The heart of this process involves finding the soul of your organization. When moral purpose becomes central to your organization, it can deliver benefits to both the bottom line and mankind: a profit meets purpose proposition. This path requires a reinvention of today's dated business model, abolishing the inefficient, siloed approach of developing a business strategy first and then later creating

separate strategies for marketing, HR, manufacturing, R&D, etc. The new integrated model fuses a tight integration of business, technology innovation and engagement strategies, all of which are bound together by a company's moral purpose. When moral purpose is central to an organization's core, everything branches out from a place of authenticity. Rather than a siloed CSR effort, you develop employee and customer relationships based on real—not curated—connections with a brand's moral mission. You build true engagement, trust and evangelism. And, along the way, your customers will actually help to co-create your brand. This book shows you how to transform your business by putting moral purpose to work for your stakeholders and the planet. Embrace a new model that integrates business, technology innovation, and engagement strategies with moral purpose as the glue that binds them together. Learn the key steps to find your moral purpose. Discover how to engage audiences with a transparent, authentic marketing approach that forges powerful connections and builds trust. With a world of options at their fingertips, today's purpose-driven customers want a brand they can identify with and trust. Authentic Marketing shows you how to make your brand more human, more likeable, more genuine and guides you on how to connect with audiences on a moral level. This process will build a new level of engagement that will benefit both your long-term value and the world.

Optimizing Millennial Consumer Engagement With Mood Analysis

BoD – Books on Demand

This timely Handbook on Digital Business Ecosystems provides a comprehensive overview of current research and

industrial applications as well as suggestions for future developments. Multi-disciplinary in scope, the Handbook includes rigorously researched contributions from over 80 global expert authors from a variety of areas including administration and management, economics, computer science, industrial engineering, and media and communication.

Playing to Win IBM Press

This book examines how consumers are protected on the online marketplace in the context of ASEAN countries. While many sectors have been badly affected by the COVID-19 pandemic, e-retailing is one of the booming sectors during this period. Actually, the e-retailing sector was already booming even before the global pandemic. Although e-retailing offers many opportunities for businesses and consumers, there are several issues associated with e-consumer protection. This book examines how consumers are protected on the online marketplace in the context of ASEAN countries. Specifically, this project: (i) Discusses the six issues of e-consumer protection (e.g., information about transaction, product quality, privacy, security, redress, and jurisdiction); (ii) Examines the policy/governance approach adopted by different sectors to address the issues of e-consumer protection; and (iii) Proposes a multi-sector governance framework for e-consumer protection. Three short case studies on Lazada in Singapore, Shopee in Vietnam, and Zalora in Malaysia are also included to illustrate how well-known e-retailers protect their e-customers. Overall, this book is interdisciplinary, including research on consumer protection, governance, management, and policy/regulation. It provides sources of information and knowledge which focus

on both theoretical and practical aspects of e-consumer protection in ASEAN countries. Also, the roles from different sectors are examined to produce comprehensive findings and analysis of the governance process.

How Design in Great Organizations Produces Great Leadership Universal-Publishers

A data-driven assessment of what enables some companies to outperform over the long term in spite of comparable constraints analyzes the practices of thousands of high- and low-performing companies over a 45-year period to reveal unique thinking habits and counterintuitive strategies.

An Itinerary Between Feelings and Technology Emerald Group Publishing

The book includes new theory, original empirical evidence, and applied case studies synthesizing advances in innovation and technology for the retail sector. Chapters identify the challenges retailers face in response to new practices, suggesting how the sector can respond to technological developments, ethical considerations and privacy issues.

Social and Sustainability Marketing Academic Press

Fashion has been steadily moving from the brick and mortar to the digital market. As such, it is increasingly vital to research new methods that will help businesses to grow and succeed in this new sphere. *Advanced Fashion Technology and Operations Management* is a pivotal reference source for the latest development management strategies, fashion marketing, international business, and fashion entrepreneurship. Featuring extensive coverage across a range of relevant perspectives and topics, such as online shopping behavior, digital fashion, and

e-commerce, this book is ideally designed for professionals, entrepreneurs, students, and researchers.

Optimizing Digital Solutions for Hyper-Personalization in Tourism and Hospitality Springer

Policy Implications of Autonomous Vehicles, Volume Five in the Advances in Transport Policy and Planning series systematically reviews policy relevant implications of AVs and the associated possible policy responses, and discusses future avenues for policy making and research. It comprises 13 chapters discussing: (a) short-term implications of AVs for traffic flow, human-automated bus systems interaction, cyber-security and safety, cybersecurity certification and auditing, non-commuting journeys; (b) long-term implications of AVs for carbon dioxide (CO₂) emissions and energy, health and well-being, data protection, ethics, governance; (c) implications of AVs for the maritime industry and urban deliveries; and (d) overall synthesis and conclusions.

Provides the authority and expertise of leading contributors from an international board of authors Presents the latest release in the Advances in Transport Policy and Planning series Updated release includes the latest information on the policy implications of autonomous vehicles

The Deloitte Consumer Review IGI Global Product-driven process design – from molecule to enterprise provides process engineers and process engineering students with access to a modern and stimulating methodology to process and product design. Throughout the book the links between product design and process design become evident while the reader is guided step-by-step through the different stages of the intertwining product and process design activities. Both molecular and enterprise-wide considerations in design are introduced and addressed in detail. Several examples and case studies in emerging areas such as bio- and food-systems, pharmaceuticals and energy are discussed and presented. This book is an excellent guide and companion for undergraduate, graduate students as well as professional practitioners.

Advanced Fashion Technology and Operations Management IGI Global Design and Operation of Production Networks for Mass Personalization in the Era of Cloud Technology draws on the latest industry advances to provide everything needed for the effective implementation of this powerful tool. Shorter product lifecycles have increased pressure on manufacturers through the increasing variety and complexity of production, challenging their workforce to remain competitive and profitable. This has led to innovation in production network methodologies, which together with opportunities provided by new digital technologies has fed a rapid evolution of production engineering that has opened new solutions to the challenges of mass personalization and market uncertainty. In addition to the latest developments in cloud technology, reference is made to key enabling technologies, including artificial intelligence, the digital twin, big data analytics, and the internet of things (IoT) to help users integrate the cloud approach with a fully digitalized production system. Presents diverse cases that show how cloud-based technologies can be used in different ways as part of the standard operation of global production networks Provides detailed reviews of new technologies like the digital twin, big data analytics, and blockchain to provide context on the role of cloud technologies in a fully digitalized system Explores future trends for cloud technology and production engineering

Boosting Collaborative Networks 4.0 Springer Nature Big Data is the biggest game-changing

opportunity for marketing and sales since the Internet went mainstream almost 20 years ago. The data big bang has unleashed torrents of terabytes about everything from customer behaviors to weather patterns to demographic consumer shifts in emerging markets. This collection of articles, videos, interviews, and slideshows highlights the most important lessons for companies looking to turn data into above-market growth: Using analytics to identify valuable business opportunities from the data to drive decisions and improve marketing return on investment (MROI) Turning those insights into well-designed products and offers that delight customers Delivering those products and offers effectively to the marketplace. The

goldmine of data represents a pivot-point moment for marketing and sales leaders. Companies that inject big data and analytics into their operations show productivity rates and profitability that are 5 percent to 6 percent higher than those of their peers. That's an advantage no company can afford to ignore.

Analysis and Development of Sustainable Urban Production Systems

Emerald Group Publishing

This collection of stories, examples and narratives about exceptional leadership by design provides tangible, examples of how the design process can be applied to leadership practice. It uses evidence-based organizational, behavioral, and leadership science to inform a framework that will equip leaders and organizations to be more effective.
