The Art of Contrarian Trading Anchor

A year ago it would have been difficult to conceive of an anthology of stories solely devoted to corporate malfeasance. Today, the challenge has been to keep it confined to one volume. From P.J. O'Rourke's hilarious "How To Stuff A Wild Enron," in which he compares trying to understand Enron's finances to trying to buy an airline ticket at the best price, to Marc Peyser's's perceptive look at that American institution, Martha Stewart, to Joe Nocera's investigation of how it all went wrong, the stories here are sometimes infuriating, often entertaining, and invariably informative. Best Business Crime Writing Of The Year is a report from the front lines of the war zone that has become American business today by some of our most talented and perceptive writers. Includes: • "The New Bull Market" by Michael

Kinsley from Slate • "In Praise of Corporate Corruption Boom" by Michael Lewis from Bloomberg News • "HardBall" by David McClintick from Forbes • "The Accountants' War" by Jane Mayer from the New Yorker • "Enron Debacle Highlights the Trouble With Stock Options" by Thomas Stewart from Business 2.0 • "Investigating ImClone" by Alex Prud'homme from Vanity Fair

From two influential and visionary thinkers comes a big idea that is changing the way movements catch fire and ideas spread in our highly connected world. For the vast majority of human history, power has been held by the few. "Old power" is closed, inaccessible, and leader-driven. Once gained, it is jealously guarded, and the powerful spend it carefully, like currency. But the technological revolution of the past two decades has made possible a new form of power, one that operates differently, like a current. "New power" is made by many; it is open,

participatory, often leaderless, and peer-driven. Like water or electricity, it is most forceful when it surges. The goal with new power is not to hoard it, but to channel it. New power is behind the rise of participatory communities like Facebook and YouTube, sharing services like Uber and Airbnb, and rapid-fire social movements like Brexit and #BlackLivesMatter. It explains the unlikely success of Barack Obama's 2008 campaign and the unlikelier victory of Donald Trump in 2016. And it gives ISIS its power to propagate its brand and distribute its violence. Even old power institutions like the Papacy, NASA, and LEGO have tapped into the strength of the crowd to stage improbable reinventions. In New Power, the business leaders/social visionaries Jeremy Heimans and Henry Timms provide the tools for using new power to successfully spread an idea or lead a movement in the twenty-first century. Drawing on examples from business, politics, and social justice, they explain the new

world we live in--a world where connectivity has made change shocking and swift and a world in which everyone expects to participate.

 "If someone says I'm doing this out of faith, I say, Why don't you do it out of conviction?"

—CHRISTOPHER HITCHENS One of his generation's greatest public intellectuals, and perhaps its fiercest, Christopher Hitchens was a brilliant interview subject. This collection—which spans from his early prominence as a hero of the Left to his controversial support for the wars in Iraq and Afghanistan toward the end of his life—showcases Hitch's trademark wit on subjects as diverse as his mistrust of the media, his love of literature, his dislike of the Clintons, and his condemnation of all things religious. Beginning with an introduction and tribute from his longtime friend Stephen Fry, this collection culminates in Hitchens's fearless final interview with Richard Dawkins, which shows a man as unafraid of death as he was of everything in life.

 HarperCollins UK

"The final book in a stirring new epic fantasy trilogy following Half a King and Half the World. Yarvi is the unlikely heir to the throne--a clever, thoughtful boy with a crippled hand who feels out of place in a violent, Viking-like society. Thorn is a young girl, determined to follow in the footsteps of her dead father and become a famous warrior, whatever it takes. Now Yarvi has avenged the murder of his father, and sets out on an epic journey with Thorn that will embroil his kingdom in all-out war"--

A fragile peace gives way to conspiracy, betrayal, and rebellion in this sequel to the New York Times bestselling A Little Hatred from epic fantasy master Joe Abercrombie. "A master of his craft."
 —Forbes "No one writes with the seismic scope or primal intensity of Joe

Abercrombie." —Pierce Brown Peace is just another kind of battlefield . . . Savine dan Glokta, once Adua's most powerful investor, finds her judgement, fortune and reputation in tatters. But she still has all her ambitions, and no scruple will be permitted to stand in her way. For heroes like Leo dan Brock and Stour Nightfall, only happy with swords drawn, peace is an ordeal to end as soon as possible. But grievances must be nursed, power seized, and allies gathered first, while Rikke must master the power of the Long Eye . . . before it kills her. Unrest worms into every layer of society. The Breakers still lurk in the shadows, plotting to free the common man from his shackles, while noblemen bicker for their own advantage. Orso struggles to find a safe path through the maze of knives that is politics, only for his enemies, and his debts, to multiply. The old ways are swept aside, and the old leaders with them, but those who would seize the reins of power will find no alliance, no friendship, and no peace lasts forever. An incisive, humorous,

on the road to perform. In
the early 2000s, with the

whenever the bears see a

remarkable stories of
people throughout
Eastern Europe and in

a fascinating portrait of
social and economic

authoritarian rule. From

Fear of a changing world,

. . . who will promise that
life will be the same as it
was in the past, are not
confined to Regime-

West, empty promises are
made, wrapped in shiny
paper like candy. And for
this candy, people are
happy to get up on their

Collected together for the
first time, here are the
three hard-hitting
standalone novels set in
the world of Joe
Abercrombie's bestselling
FIRST LAW trilogy. BEST
SERVED COLD: War may
be hell but for Monza
Murcatto, the Snake of
Talins, the most feared
and famous mercenary in
Duke Orso's employ, it's a
damn good way of making
money too. Her victories
have made her popular - a
shade too popular for her
employer's taste.
Betrayed, thrown down a
mountain and left for
dead, Murcatto's reward is
a broken body and a
burning hunger for
vengeance. Whatever the
cost, seven men must die.
THE HEROES: Over three
bloody days of battle, the
fate of the North will be
decided. But with both
sides riddled by intrigues,

follies, feuds and petty jealousies, it is unlikely to be the noblest hearts, or even the strongest arms that prevail. Three men. One battle. No Heroes. RED COUNTRY: Shy South hoped to bury her bloody past and ride away smiling, but she'll have to sharpen up some bad old ways to get her family back, and she's not a woman to flinch from what needs doing. She sets off in pursuit off her family's killers with only a pair of oxen and her cowardly old stepfather Lamb for company. But it turns out Lamb's buried a bloody past of his own, and out in the lawless Far Country, the past never stays buried.

The authors of Thinking Strategically demonstrate how to apply the principles in game theory to achieve greater personal and professional successes, drawing on a diverse array of case studies to explain how to develop a win-oriented way of seeing the world. *Why People Go Mad in Groups* Random House Canada Bruce Greenwald, one of the nation's leading business professors, presents a new and simplified approach to

strategy that cuts through much of the fog that has surrounded the subject. Based on his hugely popular course at Columbia Business School, Greenwald and his coauthor, Judd Kahn, offer an easy-to-follow method for understanding the competitive structure of your industry and developing an appropriate strategy for your specific position. Over the last two decades, the conventional approach to strategy has become frustratingly complex. It's easy to get lost in a sophisticated model of your competitors, suppliers, buyers, substitutes, and other players, while losing sight of the big question: Are there barriers to entry that allow you to do things that other firms cannot?

The Complete Magnolia Bakery Cookbook Abacus Software Wikinomics and The Wisdom of Crowds identified the phenomena of emerging social networks, but they do not confront how businesses can profit from the wisdom of crowds. WE ARE SMARTER THAN ME by Barry Libert and Jon Spector, Foreword by Wikinomics author Don Tapscott, is the first book to show anyone in

business how to profit from the wisdom of crowds. Drawing on their own research and the insights from an enormous community of more than 4,000 people, Barry Libert and Jon Spector have written a book that reveals what works, and what doesn't, when you are building community into your decision making and business processes. In *We Are Smarter Than Me*, you will discover exactly how to use social networking and community in your business, driving better decision-making and greater profitability. The book shares powerful insights and new case studies from product development, manufacturing, marketing, customer service, finance, management, and beyond. You'll learn which business functions can best be accomplished or supported by communities; how to provide effective moderation, balance structure with independence, manage risk, define success, implement effective metrics, and much more. From tools and processes to culture and leadership, *We Are Smarter than Me* will help you transform

the promise of social networking into a profitable reality.

The first novel in the First Law Trilogy and debut fantasy novel from New York Times bestseller, Joe Abercrombie. Logen Ninefingers, infamous barbarian, has finally run out of luck. Caught in one feud too many, he's on the verge of becoming a dead barbarian -- leaving nothing behind him but bad songs, dead friends, and a lot of happy enemies. Nobleman, dashing officer, and paragon of selfishness, Captain Jezal dan Luthar has nothing more dangerous in mind than fleecing his friends at cards and dreaming of glory in the fencing circle. But war is brewing, and on the battlefields of the frozen North they fight by altogether bloodier rules. Inquisitor Glokta, cripple turned torturer, would like nothing better than to see Jezal come home in a box. But then Glokta hates everyone: cutting treason out of the Union one confession at a time leaves little room for friendship. His latest trail of corpses may lead him right to the rotten heart of government, if he can

stay alive long enough to follow it. Enter the wizard, Bayaz. A bald old man with a terrible temper and a pathetic assistant, he could be the First of the Magi, he could be a spectacular fraud, but whatever he is, he's about to make the lives of Logen, Jezal, and Glokta a whole lot more difficult. Murderous conspiracies rise to the surface, old scores are ready to be settled, and the line between hero and villain is sharp enough to draw blood. Unpredictable, compelling, wickedly funny, and packed with unforgettable characters, *The Blade Itself* is noir fantasy with a real cutting edge.

"The amount of knowledge and talent dispersed among the human race has always outstripped our capacity to harness it.

Crowdsourcing corrects that—but in doing so, it also unleashes the forces of creative destruction."

—From *Crowdsourcing First* identified by journalist Jeff Howe in a June 2006 *Wired* article, "crowdsourcing" describes the process by which the power of the many can be leveraged to accomplish feats that were once the province of the specialized few. Howe reveals that the crowd is more than wise—it's talented, creative, and

stunningly productive. Crowdsourcing activates the transformative power of today's technology, liberating the latent potential within us all. It's a perfect meritocracy, where age, gender, race, education, and job history no longer matter; the quality of work is all that counts; and every field is open to people of every imaginable background. If you can perform the service, design the product, or solve the problem, you've got the job. But crowdsourcing has also triggered a dramatic shift in the way work is organized, talent is employed, research is conducted, and products are made and marketed. As the crowd comes to supplant traditional forms of labor, pain and disruption are inevitable. Jeff Howe delves into both the positive and negative consequences of this intriguing phenomenon. Through extensive reporting from the front lines of this revolution, he employs a brilliant array of stories to look at the economic, cultural, business, and political implications of crowdsourcing. How were a bunch of part-time dabblers in finance able to help an investment company consistently

beat the market? Why does Procter & Gamble repeatedly call on enthusiastic amateurs to solve scientific and technical challenges? How can companies as diverse as iStockphoto and Threadless employ just a handful of people, yet generate millions of dollars in revenue every year? The answers lie within these pages. The blueprint for crowdsourcing originated from a handful of computer programmers who showed that a community of like-minded peers could create better products than a corporate behemoth like Microsoft. Jeff Howe tracks the amazing migration of this new model of production, showing the potential of the Internet to create human networks that can divvy up and make quick work of otherwise overwhelming tasks. One of the most intriguing ideas of Crowdsourcing is that the knowledge to solve intractable problems—a cure for cancer, for instance—may already exist within the warp and weave of this infinite and, as yet, largely untapped resource. But first, Howe proposes, we need to banish preconceived notions of how such

problems are solved. The very concept of crowdsourcing stands at odds with centuries of practice. Yet, for the digital natives soon to enter the workforce, the technologies and principles behind crowdsourcing are perfectly intuitive. This generation collaborates, shares, remixes, and creates with a fluency and ease the rest of us can hardly understand. Crowdsourcing, just now starting to emerge, will in a short time simply be the way things are done.

Build systems faster and more effectively with Mob Programming. Mob Programming is an approach to developing software that radically reduces defects and key-person dependencies by having a group of people work together at a single

machine. See how to avoid the most common pitfalls that teams make when first starting out. Discover what it takes to create and support a successful mob. Now you can take collaborative programming to the next level with Mob Programming. Mob Programming is a natural extension of the popular Pair Programming concept, and is not restricted to a specific programming language or technology. It can be used by anyone who develops software, including dev leads, software developers, and agile coaches. The more people working on a bug or feature results in fewer dependencies on individuals, and overall increased learning for everyone involved. With more eyes on the code, you'll find you develop better solutions with fewer defects. Set up your team for success by introducing Mob Programming in a way that benefits them. Create a good first Mobbing experience for your team with a template that avoids the common traps beginners may fall into. Master a collaborative and empathic mindset to help optimize the Mobbing experience. Learn how to

make adjustments when things go wrong. Adapt your mobbing to different types of development tasks. Get management buy-in for your Mobbing experiment by demonstrating the benefits.
