First-Person Stories from the Twenty-First Century Routledge

This book gathers together recent international research in intellectual disability (ID), examining the diverse modes of existence that characterise living with

intellectual disabilities in the 21st century. Ranging from people with no speech and little mobility who need 24-hour care, to people who marry or hold down jobs, this book moves beyond the typical person with ID imagined by public policy: healthy, with mild ID and a supportive family, and living in a welcoming community. The book is divided into three sections. The first, 'A richer picture of people and relationships', expands our understanding of different

people and lifestyles associated with ID. The second section, 'Where current policies fall short', finds that Supported Living provides just as 'mediocre' a form of care as group homes, and concludes that services for people with challenging behaviour are unrelated to need. The contributors' research identifies no effective employment support strategies, as well as technological and legal changes that prevent organisations from employing people with ID.

With nearly a quarter of this population in poor health, the contributors reflect on whether 'social model' approaches should be allowed to trump medical considerations. The third section, 'New thinking about well-being', reveals that being old, poor, and living alone increases health risk, and that medication administration is significantly more complex for people with ID. Moving beyond 20th century certainties surrounding intellectual disability, this book will be

of interest to those studying contemporary issues facing those living with ID, as well as those studying public health policy more widely. The chapters in this book were originally published in issues of the Journal of Intellectual & Developmental Disability. **Technology Use by Adults with Learning Disabilities** Columbia University Press Providing an exposition of recent legislation, this book discusses the Disability Discrimination Act 1995 and all related

statutory instruments and codes of practice. It also offers expert guidance on the practical issues which arise when advising disabled clients. Each key area is considered, including discrimination in relation to employment, goods and services, premises and transport. Additionally, the far-reaching implications of the legislation in these areas are discussed from the point of view of both the person subject to discrimination and that of the public bodies and commercial or other

concerns that need to comply with, or resist claims under, the Act. *Information from HEATH* Bloomsbury Publishing Issues in Disability, Rehabilitation, Wound Treatment, and Disease Management: 2013 Edition is a ScholarlyEditions™ book that delivers timely, authoritative, and comprehensive information about Additional Research. Manager and New York's work-advice columnist comes a witty, practical guide to 200 difficult professional conversations—featuring all-new advice! There's a reason Alison Green has been called "the Dear Abby of the work world." Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say. Thankfully, Green does—and in this incredibly helpful book,

she tackles the tough discussions you may need to have during your career. You'll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit "reply all" • you're being micromanaged—or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate's loud speakerphone is making you homicidal • you got drunk at the holiday party

 This handbook provides a much-needed holistic overview of disability and sexuality research and scholarship. With authors from a wide range of disciplines and

representing a diversity of nationalities, it provides a multi-perspectival view that fully captures the diversity of issues and outlooks. Organised into six parts, the contributors explore long-standing issues such as the psychological, interpersonal, social, political and cultural barriers to sexual access that disabled people face and their struggle for sexual rights and participation. The volume also engages issues that have been on the periphery of the

discourse, such as sexual accommodations and support aimed at facilitating disabled people's sexual well-being; the socio-sexual tensions confronting disabled people with intersecting stigmatised identities such as LGBTBI or asexual; and the sexual concerns of disabled people in the Global South. It interrogates disability and sexuality from diverse perspectives, from more traditional psychological and sociological models, to various subversive and

post-theoretical perspectives and queer theory. This handbook examines the cutting-edge, and sometimes ethically contentious, concerns that have been repressed in the field. With current, international and comprehensive content, this book is essential reading for students, academics and researchers in the areas of disability, gender and sexuality, as well as applied disciplines such as healthcare practitioners, counsellors, psychology trainees and social

workers.

The Disabled Worker Under OASDI

HarperCollins Leadership
This comprehensive volume assesses the relationship between legal

rights and disability and the effect of law, legal process and third party professional intervention on the lives of people with disabilities. Stressing the crucial role played by disabled people themselves in fulfilling the promise of the worldwide rights movement, the chapters examine this relationship across a variety of themes, stressing the legal elements of each issue, and the extent to which law can assist in strengthening individual rights in that area. The

contributors, who are all either academics or other professional experts in their field, write in a jargon free accessible style. The volume will be of interest to lawyers, human rights activists, health care professionals and to disabled people generally. The main areas covered in the volume are: * new perspectives on working in partnership with disabled people; * the changing attitudes to the rights of people with disabilities across the globe; * improvements to the rights of disabled

people through legal process, using national and international law; * an examination of the rights and entitlement of disabled people to community care, housing, employment, education, and special services for children; * disabled people and mental health law; * messages from disability research for law, practice and reform implications for research. Elsevier Health Sciences This groundbreaking reference offers mental health professionals a rigorous, nuanced guide

to working with abuse survivors with disabilities in religious communities. Expert contributors unravel complex intersections of disability, religion, and identity in the context of gender violence (including spotlights on racial, gender, and sexual minorities, Deaf persons, and men), and offer survivor-centered best practices for intervention. Chapters explore how responses from clergy and other religious figures may sometimes prevent survivors from seeking

help, and how faith leaders can help to empower survivors. The concepts and research presented here support multiple purposes, from removing barriers to survivor services to working with religious communities to be more inclusive and transparent. Among the topics featured: From barriers to belonging for people with disabilities: Promising pathways toward inclusive ministry. Empowering women with intellectual disabilities to resist abuse in interpersonal

relationships. Race, culture, and abuse of persons with disabilities. Ableist shame and disruptive bodies: Survivorship at the intersection of queer, trans, and disabled existence. From the narratives of survivors with disabilities: Strengths and gaps between faith-based communities and domestic violence shelters. Religion, Disability, and Interpersonal Violence brings transformative insights to psychologists, social workers, and

mental health professionals across disciplines providing guidance within religious and disabled communities in their clinical practice. It also provides valuable background for researchers seeking to examine the interface between religious culture and the abuse of persons with disabilities.

Now, just in time for the thirtieth anniversary of the Americans with Disabilities Act, activist Alice Wong brings

together an urgent, galvanizing collection of personal essays by contemporary disabled writers. There is Harriet McBryde Johnson's "Unspeakable Conversations," which describes her famous debate with Princeton philosopher Peter Singer over her own personhood. There is columnist s. e. smith's celebratory review of a work of theater by disabled performers. There are original pieces by up-and-coming authors like Keah Brown and Haben Girma. There are

blog posts, manifestos, eulogies, and testimonies to Congress. Taken together, this anthology gives a glimpse of the vast richness and complexity of the disabled experience, highlighting the passions, talents, and everyday lives of this community. It invites readers to question their own assumptions and understandings. It celebrates and documents disability culture in the now. It looks to the future and past with hope and love.

The only textbook to outline the skills social workers need to conduct

effective client interviews, this volume synthesizes recent research on interviewing and demonstrates its value in unique settings and with a variety of clients and issues. Connecting evidence-based approaches to the quality of practitioner-client relationships and the achievement of different objectives at each phase of the interview, the text shows students how to apply their learning systematically and develop specialized techniques for culturally

competent interviewing and challenging client situations. For this fifth edition, the authors have updated the text's research throughout and have adopted a more coherent chapter organization for teaching. The volume also includes new sections on breaking bad news and interviewing with aged, racial/ethnic, and sexual minority populations. Revised vignettes reflect the challenges practitioners now face in the field and represent the interests of diverse

students and scholars.
