There's no question that Americans are bitterly divided by politics. But in *Partisans and Partners*, Josh Pacewicz finds that our traditional understanding of red/blue, right/left, urban/rural division is too simplistic. Wheels-down in Iowa—that most important of primary states—Pacewicz looks to two cities, one traditionally Democratic, the other traditionally Republican, and finds that younger voters are rejecting older-timers' strict political affiliations. A paradox is emerging—as the dividing lines between America's political parties have sharpened, Americans are at the same time growing distrustful of traditional party politics in favor of becoming apolitical or embracing outside-the-beltway candidates. Pacewicz sees this change coming not from politicians and voters, but from the fundamental reorganization of the community institutions in which political parties have traditionally been rooted. Weaving together major themes in American political history—including globalization, the decline of organized labor, loss of locally owned industries, uneven economic development, and the emergence of grassroots populist movements—*Partisans and Partners* is a timely and comprehensive analysis of American politics as it happens on the ground.

*Advances in Experimental Moral Psychology* brings together leading scholars in the field to provide fresh theoretical perspectives on research in philosophy and psychology. Reflecting a diverse and active field of study, contributors are drawn from across both subjects to pursue central questions concerning moral psychology. Covering a wide-ranging selection of arguments, issues and debates, topics includes the role of emotion in moral judgment (both at a general theoretical level and with regards to specific topics); the moral psychology behind political orientation; the nature and content of moral character and more higher-order questions concerning the status of morality itself. For philosophers and researchers in the social and behavioral science, this exciting new volume reveals the beneficial results of integrating these two disciplines and illustrates the promise of this experimental approach to moral psychology.

In 1995 John Searle published *The Construction of Social Reality*, a text which not only promises to disclose the institutional backdrop against which speech takes place, but initiate a new "philosophy of society." Since then *The Construction of Social Reality* has been subject to a flurry of criticism. While many of Searle's interlocutors share the sense that the text marks an important breakthrough, he has time and again accused critics of misunderstanding his claims. Despite Searle's characteristic crispness and clarity there remains some confusion, among both philosophers and sociologists, regarding the significance of his proposals. This book traces some of the high points of this dialogue, leveraging Searle's own clarifications to propose a new way of understanding the text. In particular, Joshua Rust looks to Max Weber in suggesting that Searle has articulated an ideal type. In locating *The Construction of Social Reality* under the umbrella of one of sociology's founding fathers, this book not only makes Searle's text more accessible to the readers in the social sciences, but presents Max Weber as a thinker worthy of philosophical reconsideration. Moreover, the recharacterization of Searle's claims in terms of the ideal type helps facilitate a comparison between Searle and other social theorists such as Talcott Parsons.
