of the Golden Ratio and the Fibonacci sequence in an easy, enthusiastic, and accessible manner. Examples illustrate how the Golden Ratio appears in nature ...Golden Ratio = Mind Blown! There are many examples of the Golden Section or Divine Proportion in nature. Below are just a few: The eye, fins and tail all fall at golden sections of the length of a dolphin's body. The dimensions of the dorsal fin are golden sections (yellow and green). The Golden Section in Nature: Animals The Golden Ratio is a common mathematical ratio found in nature, which can be used to create pleasing, organic-looking compositions in your design projects or artwork. It's also known as the Golden Mean, The Golden Section, or the Greek letter phi. The Golden Ratio: A designer's guide | Creative Bloq The golden-section search is a technique for finding an extremum (minimum or maximum) of a function inside a specified interval. For a strictly unimodal function with an extremum inside the interval, it will find that extremum, while for an interval containing multiple extrema (possibly including the interval boundaries), it will converge to one of them. Golden-section

search - Wikipedia It is an excellent introduction to the golden section. I spoke on it about the occurrence in nature of the golden section and also the Change Puzzle.
