charts the
dramatic and
disturbing rise
of a post-
literate
society that
craves
fantasy,
ecstasy and
illusion. Chris
Hedges
argues that
we now live in
two societies:
One, the

minority,
functions in a
print-based,
literate world,
that can cope
with
complexity
and can
separate
illusion from
truth. The
other, a
growing
majority, is
retreating

from a reality-based world into one of false certainty and magic. In this “other society,” serious film and theatre, as well as newspapers and books, are being pushed to the margins. In the tradition of Christopher Lasch’s *The Culture of Narcissism* and Neil Postman’s *Amusing Ourselves to Death*, Hedges navigates this culture — attending WWF contests as well as Ivy League graduation

ceremonies — exposing an age of terrifying decline and heightened self-delusion. *A Revolution of the Mind* Macmillan *Named one of TIME’s Top 100 Fantasy Books Of All Time A nobleman’s daughter with magic in her blood. An empire built on the dreams of enslaved gods. Empire of Sand is Tasha Suri’s lush, dazzling, Mughal India-inspired debut fantasy. The Amrithi are outcasts; nomads

descended of desert spirits, they are coveted and persecuted throughout the Ambhan Empire for the power in their blood. Mehr is the illegitimate daughter of an imperial governor and an exiled Amrithi mother she can barely remember, but whose face and magic she has inherited. When Mehr’s power comes to the attention of the Emperor’s most feared mystics, she must use

every ounce of will, subtlety, and power she possesses to resist their cruel agenda. And should she fail, the gods themselves may awaken seeking vengeance. . . NOTABLE BOOK OF THE YEAR • A grand, devastating portrait of three generations of the Sackler family, famed for their philanthropy, whose fortune was built by Valium and whose reputation was destroyed by OxyContin. From the prize-winning and bestselling author of *Say Nothing*. "A real-life version of the HBO series *Succession* with a lethal sting in its tail...a

masterful work of narrative reportage.” – Laura Miller, Slate The history of the Sackler dynasty is rife with drama—baroque personal lives; bitter disputes over estates; fistfights in boardrooms; glittering art collections; Machiavellian courtroom maneuvers; and the calculated use of money to burnish reputations and crush the less powerful. The Sackler name has adorned the

walls of many storied institutions—Harvard, the Metropolitan Museum of Art, Oxford, the Louvre. They are one of the richest families in the world, but the source of the family fortune was vague—until it emerged that the Sacklers were responsible for making and marketing a blockbuster painkiller that was the catalyst for the opioid crisis. Empire of Pain is the saga of three generations of a single family

and the mark they would leave on the world, a tale that moves from the bustling streets of early twentieth-century Brooklyn to the seaside palaces of Greenwich, Connecticut, and Cap d’Antibes to the corridors of power in Washington, D.C. It follows the family’s early success with Valium to the much more potent OxyContin, marketed with a ruthless technique of co-opting

doctors, influencing the FDA, downplaying the drug's addictiveness. *Empire of Pain* chronicles the multiple investigations of the Sacklers and their company, and the scorched-earth legal tactics that the family has used to evade accountability. A masterpiece of narrative reporting, *Empire of Pain* is a ferociously compelling portrait of America's second Gilded Age, a study of impunity among the

super-elite and a relentless investigation of the naked greed that built one of the world's great fortunes. [Empire of the Stars](#) Cambridge University Press Declaration of Human Rights. *Nabobs* Simon and Schuster For seven months, Manny Howard—a lifelong urbanite—woke up every morning and ventured into his eight-hundred-square-foot backyard to

maintain the first farm in Flatbush, Brooklyn, in generations. His goal was simple: to subsist on what he could produce on this farm, and only this farm, for at least a month. The project came at a time in Manny's life when he most needed it—even if his family, and especially his wife, seemingly did not. But a farmer's life, he discovered—after a string of catastrophes, including a tornado,

countless animal deaths (natural, accidental, and inflicted), and even a severed finger—is not an easy one. And it can be just as hard on those he shares it with. Manny’s James Beard Foundation Award-winning New York magazine cover story—the impetus for this project—began as an assessment of the locavore movement. We now think more about what we eat than ever

before, buying organic for our health and local for the environment, often making those decisions into political statements in the process. My Empire of Dirt is a ground-level examination—trenchant, touching, and outrageous—of the cultural reflex to control one of the most elemental aspects of our lives: feeding ourselves. Unlike most foodies with a farm fetish, Manny didn’t put on overalls with

much of a philosophy in mind, save a healthy dose of skepticism about some of the more doctrinaire tendencies of locavores. He did not set out to grow all of his own food because he thought it was the right thing to do or because he thought the rest of us should do the same. Rather, he did it because he was just crazy enough to want to find out how hard it would actually be to take on a challenge

based on a radical interpretation of a trendy (if well-meaning) idea and see if he could rise to the occasion. A chronicle of the experiment that took slow-food to the extreme, *My Empire of Dirt* tells the story of one man's struggle against environmental , familial, and agricultural chaos, and in the process asks us to consider what it really takes (and what it really means) to produce our

own food. It's one thing to know the farmer, it turns out—it's another thing entirely to be the farmer. For most of us, farming is about food. For the farmer, and his family, it's about work. *Empire of Borders* Encounter Books A history of the idea of "black holes" explores the tumultuous debate over the existence of this now well-accepted phenomenon, focusing particular attention on

Indian scientist Subrahmanyan Chandrasekhar. *Empire of Illusion* New York, Doubleday, Page Reprint: Originally published: New York: Doubleday, Page & Company, 1902. **The Empire of Chance** Verso Books This book considers the controversy caused by 'nabobs', and the debate regarding British identity and British imperialism in

the late eighteenth century. The Empire of Civilization Penguin In Revolutionary Iran, Michael Axworthy offers a richly textured and authoritative history of Iran from the 1979 revolution to the present. Empires of the Mind Oxford University Press, USA Shedding new light on the history of the book in antiquity, Empire of Letters tells the story of writing at Rome at the pivotal

moment of transition from Republic to Empire (c. 55 BCE-15 CE). By uniting close readings of the period's major authors with detailed analysis of material texts, it argues that the physical embodiments of writing were essential to the worldviews and self-fashioning of authors whose works took shape in them. Whether in wooden tablets, papyrus bookrolls, monumental writing in

stone and bronze, or through the alphabet itself, Roman authors both idealized and competed with writing's textual forms. The academic study of the history of the book has arisen largely out of the textual abundance of the age of print, focusing on the Renaissance and after. But fewer than fifty fragments of classical Roman bookrolls survive, and even fewer lines of poetry.

Understanding the history of the ancient Roman book requires us to think differently about this evidence, placing it into the context of other kinds of textual forms that survive in greater numbers, from the fragments of Greek papyri preserved in the garbage heaps of Egypt to the Latin graffiti still visible on the walls of the cities destroyed by Vesuvius. By attending carefully to this kind of

material in conjunction with the rich literary testimony of the period, Empire of Letters exposes the importance of textuality itself to Roman authors, and puts the written word back at the center of Roman literature.

Anchor In the White Drake's war, the price of freedom is paid in blood and fire.... For hundreds of years, the

Ironship Trading Syndicate was fueled by drake blood—and protected by the Blood-blessed, those few who could drink it and wield fearsome powers. But now the very thing that sustained the corporate world threatens to destroy it. A drake of unimaginable power has risen, and it commands an army of both beasts and men. Rogue Blood-blessed Claydon Torcreek,

Syndicate agent Lizanne Lethridge and Ironship captain Corrick Hilemore have been spread to disparate corners of the world, but they are united in their desire to defeat the White Drake and the Spoiled who follow it. Humanity itself is at stake, but with the aid of ancient knowledge, revolutionary technology and unexpected allies, all hope is not lost. Saving the

world will require sacrifice, as Clay, Lizanne and Hilemore will see all they know either consumed by flames or reborn from the ashes. **Empires of the Mind** Yale University Press Film producer Charles Robert Band is one of the last great B-movie survivors - a genuine pioneer who, over four decades, forged such a unique path through the no man's land of independent

genre cinema that many thought him more than capable of seizing legendary indie producer Roger Corman's long-held crown as 'King of the B Movies.' The 1970s through to the late 1980s was the last great 'golden age' for the B-movie community, and with a non-stop series of grind house classics like 'Laserblast', 'Parasite', 'Re-Animator' and 'Dolls' for his company

were the early symptoms of multiple sclerosis, an incurable and degenerative neurological illness. As Leontine starts to investigate the world around her, Donlan too finds himself in a new environment, a "spook country" he calls the "Inward Empire," where reality starts to break down in bizarre, frightening, sometimes beautiful ways. Rather than turning away from this

landscape, Donlan summons courage and curiosity and sets out to explore, a tourist in his own body. The result is this exquisitely observed, heartbreaking, and uplifting investigation into the history of neurology, the joys and anxieties of fatherhood, and what remains after everything we take for granted - including the functions that make us feel like ourselves - has been stripped away.

Like Andrew Solomon, Paul Kalathini, and William Styron, Donlan brings meaning, grace, playfulness, and dignity to an experience that terrifies and confounds us all. portrait of
American
rapper Jay Z
and his rise
from the
Brooklyn
projects to the

top of the business world. Only a handful of people embody the legacy of hip-hop and entrepreneurs hip like Jay Z. A modern-day King Midas, everything he touches-- sports bars, streaming services, record labels, and cognac-- turns to gold. How exactly did he do it? Forbes senior editor Zack O'Malley Greenburg reveals the story of Jay Z's legendary rise from the Marcy Projects of Brooklyn to

stages and corner offices worldwide. He draws on over 100 interviews with those who knew Jay Z from the beginning: his classmates at George Westinghouse High School; the childhood friend who got him into the drug trade; and the DJ who convinced him to stop dealing and focus on the music. Also bearing witness are the artists who worked alongside him, including J. Cole and Alicia Keys. Jay Z's

life is a blueprint for any hustler, businessperson, and entrepreneur who seeks to build something spectacular. **The Empire of Ashes** Grove Press *Finalist for the Pulitzer Prize and the National Book Critics Circle Award* *A New York Times Notable Book* *Winner of the Texas Book Award and the Oklahoma Book Award* This New York Times bestseller and stunning historical

account of the forty-year battle between Comanche Indians and white settlers for control of the American West “is nothing short of a revelation...will leave dust and blood on your jeans” (The New York Times Book Review). Empire of the Summer Moon spans two astonishing stories. The first traces the rise and fall of the Comanches, the most powerful Indian tribe in American

history. The second entails one of the most remarkable narratives ever to come out of the Old West: the epic saga of the pioneer woman Cynthia Ann Parker and her mixed-blood son Quanah, who became the last and greatest chief of the Comanches. Although readers may be more familiar with the tribal names Apache and Sioux, it was in fact the legendary fighting ability of the

Comanches that determined when the American West opened up. Comanche boys became adept bareback riders by age six; full Comanche braves were considered the best horsemen who ever rode. They were so masterful at war and so skillful with their arrows and lances that they stopped the northern drive of colonial Spain from Mexico and halted the French

expansion westward from Louisiana. White settlers arriving in Texas from the eastern United States were surprised to find the frontier being rolled backward by Comanches incensed by the invasion of their tribal lands. The war with the Comanches lasted four decades, in effect holding up the development of the new American nation. Gwynne's exhilarating account

delivers a sweeping narrative that encompasses Spanish colonialism, the Civil War, the destruction of the buffalo herds, and the arrival of the railroads, and the amazing story of Cynthia Ann Parker and her son Quanah—a historical feast for anyone interested in how the United States came into being. Hailed by critics, S. C. Gwynne's account of these events is meticulously

researched, intellectually provocative, and, above all, thrillingly told. Empire of the Summer Moon announces him as a major new writer of American history. [The Empire of Mind](#) University Press of Kentucky The definitive history of Iran, from the ancient Persian empires to today Iran is a land of contradictions. It is an Islamic republic, but one in which only 1.4 percent of the

population attend Friday prayers. Iran's religious culture encompasses the most censorious and dogmatic Shi'a Muslim clerics in the world, yet its poetry insistently dwells on the joys of life: wine, beauty, sex. Iranian women are subject to one of the most restrictive dress codes in the Islamic world, but make up nearly 60 percent of the student population of the nation's universities. In

A History of Iran, acclaimed historian Michael Axworthy chronicles the rich history of this complex nation from the Achaemenid Empire of sixth century BC to the revolution of 1979 to today, including a close look at Iran's ongoing attempts to become a nuclear power. A History of Iran offers general readers an essential guide to understanding this volatile nation, which

is once again at the center of the world's attention. *An Empire of Ice* Oxford University Press Where many critics see the Internet as an instrument of corporate hegemony, Michael Strangelove sees something else: an alternative space inhabited by communities dedicated to anarchic freedom, culture jamming, alternative journalism, and resistance to

authoritarian forms of consumer capitalism and globalization. In *The Empire of Mind*, "Dr. Strangelove," the scholar Canadian Business referred to as the "acknowledged dean of Internet entrepreneurs" and Wired called "the Canadian guru of Internet advertising," presents the compelling argument that the Internet and new digital communication technology actually undermine the

power of capital, producing an alternative symbolic economy. Strangelove contends that the Internet breaks with the capitalist logic of commodification and that, while television produces a passive consumer audience, Internet audiences are more active, creative, and subversive. Writers, activists, and artists on the Internet undermine commercial media and its

management of consumer behaviour, a behaviour that is challenged by the Web's tendency toward the disintegration of intellectual property rights. Case studies describe the invention of new meaning given to cultural and consumer icons like Barbie and McDonald's and explore how novel modes of online news production alter the representation of the world as it is produced by the

mainstream, corporate press. In the course of exploring new media, The Empire of Mind also makes apparent that digital piracy will not be eliminated. The Internet community effectively converts private property into public, thereby presenting serious obstacles for the management of consumer behaviour and significantly eroding brand value. Much to the dismay of

the corporate sector, online communities are disinterested in the ethics of private property. In fact, the entire philosophical framework on which capitalism is based is threatened by these alternative means of cultural production. **Empire of the Summer Moon** Harper Collins "George Black rediscovers the history and lore of one of the planet's most magnificent

landscapes. Read *Empire of Shadows*, and you'll never think of our first—in many ways our greatest—national park in the same way again." —Hampton Sides, author of *Blood and Thunder* *Empire of Shadows* is the epic story of the conquest of Yellowstone, a landscape uninhabited, inaccessible and shrouded in myth in the aftermath of the Civil War. In a radical reinterpretation of the

nineteenth century West, George Black casts Yellowstone's creation as the culmination of three interwoven strands of history - the passion for exploration, the violence of the Indian Wars and the "civilizing" of the frontier - and charts its course through the lives of those who sought to lay bare its mysteries: Lt. Gustavus Cheyney Doane, a gifted but tormented cavalryman known as "the man who invented Wonderland"; the ambitious former vigilante leader Nathaniel Langford; scientist Ferdinand Hayden, who brought photographer William Henry Jackson and painter Thomas Moran to Yellowstone; and Gen. Phil Sheridan, Civil War hero and architect of the Indian Wars, who finally succeeded in having the new National Park placed under the protection of the US Cavalry. George Black's Empire of Shadows is a groundbreaking historical account of the origins of America's majestic national landmark.
