Are you bored of playing the same old jazz guitar chords? Playing rhythm guitar is one thing, but going beyond that to connect the chords with beautiful melodic phrasing is called comping. John Pisano is one of the all-time greats of jazz rhythm guitar and has worked with Frank Sinatra, Tony Bennett, Burt Bacharach, Natalie Cole, Barbra Streisand, Diana Krall and many more. Plus, for over

35 years, he was also Joe Pass' guitar duo partner, racking up dozens of iconic jazz guitar recordings. Learn Authentic Jazz Comping Skills with a Master In Jazz Guitar Comping Masterclass, John Pisano shares his creative guitar chord movements over a selection of the most famous jazz standards. Naturally, you'll learn some immaculately crafted comping arrangements, but there's so much more! You'll go way beyond the typical jazz rhythm guitar parts most guitarists use, and learn to play beautifully voiced movements that decorate the chords and become an integral part of the tune itself... ... If you took away the rest of the band, your guitar part would stand alone and still entertain the crowd. What You'll Learn First, you'll take a deep dive into John's unique strategies for creating comping movements. Here, you'll discover the tools you can use to develop your own stunning arrangements. In a clearly illustrated, step-by-step guide, you'll learn how to: - Artistically embellish any chord sequence with inside and outside movements - Add related chords to create moving chord phrases - Connect multiple voicings of chords across the range of the neck to expand your palette - Arrange any voicing to triple your creative options - Harmonize chords

using 6th voicings for a fresh new approach to rhythm - Use diminished shapes to connect chords and add harmonic tension to any sequence

Basic Walking Bass Lines for Jazz Guitar explores the creation of walking bass lines played over chord sequence using only chord tones. This is the usual path for beginner players who want to start with walking bass before moving to more complex techniques as scalar or chromatic lines. A progressive approach is used to introduce walking bass technique: we begin with lines starting from the root of the chord, then we explore lines starting from chord guide tones (third and seventh) and then we create lines starting from any chord tone. On each step player discovers a new set of lines moving from very mechanical and repetitive examples to more melodic and professional lines. In the first part of this book many exercises on single chord progression are presented, instead in the second part, studied lines are applied to most common jazz progressions.

Intermediate Walking Bass Lines for Jazz Guitar explores the creation of walking bass lines played over chord sequence using scale tones. This is the usual second step for players who want to master walking bass before moving to chromatic lines. A progressive approach is used to introduce walking bass technique: we start with a preliminary section to approach scalar walking bass on a single chord progression. In the second part we present lines related to most common jazz progressions. In our examples a bass line is added above chord (in this case drop2 and drop3 voicing are used) progression. Playing also suggested chord position is a good exercise for solo guitar.
