In the early morning hours of October 1, 1965, a group calling itself the September 30th Movement kidnapped and executed six generals of the Indonesian army, including its highest commander. The group claimed that it was attempting to preempt a coup, but it was quickly defeated as the senior surviving general, Haji Mohammad Suharto, drove the movement's partisans out of Jakarta. Riding the crest of mass violence, Suharto blamed the Communist Party of Indonesia for masterminding the movement and used the emergency as a pretext for gradually eroding President Sukarno's powers and installing himself as a ruler. Imprisoning and killing hundreds of thousands of alleged communists over the next year, Suharto remade the events of October 1, 1965 into the central event of modern Indonesian history and the cornerstone of his thirty-two-year dictatorship. Despite its importance as a trigger for one of the twentieth century's worst cases of mass violence, the September 30th Movement has remained shrouded in uncertainty. Who actually masterminded it? What did they hope to achieve? Why did they fail so miserably? And what was the movement's connection to international Cold War politics? In *Pretext for Mass Murder*, John Roosa draws on a wealth of new primary source material to suggest a solution to the mystery behind the movement and the enabling myth of Suharto's repressive regime. His book is a remarkable feat of historical

investigation. Finalist, Social Sciences Book Award, the International Convention of Asian Scholars *From Jail to Jail* Waveland Press
The premise of *Social Science and Power in Indonesia* is that the role and development of social sciences in Indonesia over the past fifty years are inextricably related to the shifting requirements of power. What is researched and what is not, which frameworks achieve paradigmatic status while others are marginalized, and which kinds of social scientists become influential while others are ignored are all matters of power. These and other important themes and issues are critically explored by some of Indonesia's foremost social scientists in this seminal work.

Among maternal deities of the Greek pantheon, the Mother of the Gods was a paradox. Conflict and resolution were played out symbolically, Munn shows, and the goddess of Lydian tyranny was eventually accepted by the Athenians as the Mother of the Gods and a symbol of their own sovereignty.

 "From Jail to Jail" is the political
 autobiography of a central though
 enigmatic figure of the Indonesian
 Revolution. Variouslly labeled a
 communist, Trotskyite, and nationalist,
 Tan Malaka managed, during the several
 decades of his political activity, to run
 afoul of nearly every political group and
 faction involved in the Indonesian
 struggle for independence. He was
 elected Chairman of the Indonesian
 Communist Party (PKI) in 1921 and
 barely five years later opposed the PKI-
 led uprising in Indonesia. He openly
 opposed Sukarno s support for
 negotiations with the Dutch, yet Sukarno
 issued a decree in 1963 recognizing Tan
 Malaka as a hero of national
 independence. During his several
 decades of political activity he spent
 periods of exile and hiding in nearly
 every country in Southeast Asia. From
 Jail to Jail is one of the few known
 autobiographies by an Asian Marxist of
 the 1930 s and 1940 s."

What can we learn from looking at
 married partners who live apart? In
Commuter Spouses, Danielle Lindemann
 explores how couples cope when they
 live apart to meet the demands of their
 dual professional careers. Based on the
 personal stories of almost one-hundred
 commuter spouses, Lindemann shows
 how these atypical relationships embody

(and sometimes disrupt!) gendered
 constructions of marriage in the United
 States. These narratives of couples who
 physically separate to maintain their
 professional lives reveal the ways in
 which traditional dynamics within a
 marriage are highlighted even as they
 are turned on their heads. *Commuter
 Spouses* follows the journeys of these
 couples as they adapt to change and
 shed light on the durability of some
 cultural ideals, all while working to
 maintain intimacy in a non-normative
 relationship. Lindemann suggests that
 everything we know about marriage, and
 relationships in general, promotes the
 idea that couples are focusing more and
 more on their individual and personal
 betterment and less on their marriage.
 Commuter spouses, she argues, might
 be expected to exemplify in an extreme
 manner that kind of self-prioritization.
 Yet, as this book details, commuter
 spouses actually maintain a strong
 commitment to their marriage. These
 partners illustrate the stickiness of
 traditional marriage ideals while
 simultaneously subverting expectations.

This book provides an empirically grounded, theoretically informed account of recent changes to the youth justice system in England and Wales, focusing on the introduction of elements of restorative justice into the heart of the criminal justice system, and the implementation of referral orders and youth offender panels. Taken together, this amounts to the most radical overhaul of the youth justice system in the last half century, fundamentally changing the underlying values of the system away from an 'exclusionary punitive justice' and towards an 'inclusionary restorative justice'. The book explores the implications of these changes by using the lens of a detailed study of the implementation of referral orders and youth offender panels to explore wider issues about youth justice policy and the integration of restorative justice principles. It draws upon the

findings of an in-depth study of the pilots established prior to the national rollout of referral orders in April 2002. The book will be essential reading not only for those involved in the task of implementing the new youth justice, but others with an interest in the criminal justice system and in restorative justice who need to know about the far reaching reforms to the youth justice system and their impact.

Instructional-Design Theories and Models, Volume III: Building a Common Knowledge Base is perhaps best described by its new subtitle. Whereas

Volume II sought to comprehensively review the proliferating theories and models of instruction of the 1980's and 1990's, Volume III takes on an even more daunting task: starting to build a common knowledge base that underlies and supports the vast array of instructional theories, models and strategies that constitute the field of Instructional Design. Unit I describes the need for a common knowledge base, offers some universal principles of instruction, and addresses the need for variation and detailed guidance when implementing the universal principles. Unit II describes how the universal principles apply to some major approaches to instruction such as direct instruction or problem-based instruction. Unit III describes how to apply the universal principles to some major types of learning such as understandings and skills. Unit IV provides a deeper understanding of instructional theory using the structural layers of a house as its metaphor and discusses instructional theory in the broader context of paradigm change in education.

It is designed to help clarify some of the linkages between the international economy and domestic strategies in the developing countries against the background of growing interdependence

and increasing complexity in the world economy. It assesses the prospects for progress in accelerating growth and alleviating poverty, and identifies some of the major policy issues which will affect these prospects.

In that *The Anatomy of Speech Notions* (1976) was the precursor to *The Grammar of Discourse* (1983), this revision embodies a third "edition" of some of the material that is found here. The original intent of the 1976 volume was to construct a hierarchical arrangement of notional categories, which find surface realization in the grammatical constructions of the various languages of the world. The idea was to marshal the categories that every analyst—regardless of theoretical bent—had to take account of as cognitive entities. The volume began with a couple of chapters on what was then popularly known as "case grammar," then expanded upward and downward to include other notional categories on other levels. Chapters on discourse, monologue, and dialogue were buried in the center of the volume. In the 1983 volume, the chapters on monologue and dialogue discourse were moved to the fore of the book and the chapters on case grammar were made less prominent; the volume was then renamed *The Grammar of Discourse*. The current revision features more clearly than its predecessors the intersection of discourse and pragmatic concerns with grammatical structures on various levels. It retains and expands much of the former material but includes new material reflecting current advances in such topics as salience cline for discourse, rhetorical relations, paragraph structures, transitivity, ergativity, agency hierarchy, and word order

typologies.
