NATALEE COPELAND

Fifteenth Century Studies Duke University Press

This is the first thorough investigation of the Brummer brothers' remarkable career as dealers in antiques, curiosities and modernism in Paris and New York over six decades (1906-1964). A dozen specialists aggregate their expertise to explore extant dealer records and museum archives, parse the wide-ranging Brummer stock, and assess how objects were sourced, marketed, labelled, restored, and displayed. The research provides insights into emerging collecting fields as they crystallised, at the crossroads between market and museum. It questions the trope of the tastemaker; the translocation of material culture, and the dealers' prolific relationships with illustrious collectors, curators, scholars, artists, and fellow dealers.

Cabinets of Curiosities Univ of California Press

"Depuis la haute antiquité, la fonction royale s'est systématiquement trouvée associée à un riche répertoire symbolique. La représentation du roi constitue un enjeu de pouvoir, et témoigne des modes de pensée et des ambitions de toute une société. La diffusion d'une certaine image de la royauté ? celle de son prestige est indissociable d'une démonstration de splendeur. Aussi l'accumulation de sculptures, de pièces d'orfèvrerie, de tableaux, d'armes ou encore de bijoux représente-t-elle une donnée essentielle de la politique des cours financières. Ces trésors en disent autant de la figure du monarque que de son évolution à travers les âges et les civilisations..."-- Page 4 of cover.

The New York Times Index Giles

In this book, Suzanne Preston Blier examines the intersection of art, risk and creativity in early African arts from the Yoruba center of Ife and the striking ways that ancient Ife artworks inform society, politics, history and religion. Yoruba art offers a unique lens into one of Africa's most important and least understood early civilizations, one whose historic arts have long been of interest to local residents and Westerners alike because of their tour-de-force visual power and technical complexity. Among the complementary subjects explored are questions of art making, art viewing and aesthetics in the famed ancient Nigerian city-state, as well as the attendant risks and danger assumed by artists, patrons and viewers alike in certain forms of subject matter and modes of portrayal, including unique genres of body marking, portraiture, animal symbolism and regalia. This volume celebrates art, history and the shared passion and skill with which the remarkable artists of early Ife sought to define their past for generations of viewers.

The nine turquoise mosaics from Mexico are some of the most striking pieces in the collections of the British Museum. Among the few surviving such artifacts, these exquisite objects include two masks, a shield, a knife, a helmet, a double-headed serpent, a mosaic on a human skull, a jaguar, and an animal head. They all originate from the Mixtec and Aztec civilizations first encountered by Europeans during the Spanish conquest in the early sixteenth century. The mosaics have long excited admiration for their masterful blend of technical skill and artistry and fascination regarding their association with ritual and ceremony. Only recently though, have scientific investigations undertaken by the British Museum dramatically advanced knowledge of the mosaics by characterizing, for the first time, the variety of natural materials that were used to create them. Illustrated with more than 160 color images, this book describes the recent scientific findings about the mosaics in detail, revealing them to be rich repositories of information about ancient Mexico. The materials used to construct the mosaics demonstrate their makers' deep knowledge of the natural world and its resources. The effort that would have been involved in procuring the materials testifies to the mosaics' value and significance in a society imbued with myths and religious beliefs. The British Museum's analyses have provided evidence of the way that the materials were prepared and assembled, the tools used, and the choices that were made by artisans. In addition, by drawing on historical accounts including early codices, as well as recent archaeological discoveries, specialists have learned more about the place of the mosaics in ancient Mexican culture. Filled with information about the religion, art, and natural and cultural history as well as the extraordinary ability of modern science to enable detailed insight into past eras, *Turquoise Mosaics from Mexico* offers an overview of the production, utilization, and eventual fate of these beautiful and mysterious objects.

Archaeological discoveries relating to the Bible are prominent in the public square. Even archaeological controversies normally confined to the pages of obscure journals are considered newsworthy when they touch on biblical themes, people, or places. However, scholars are not always equipped to handle this sort of attention. Thus, the conference published in this book was organized to bring scholars into conversation with representatives of the media and to help them become better prepared to address the general public. Participants included the print media and the visual media as well as academics. The relation between archaeological controversies and Middle East politics emerged as a fraught subject in several essays, with the situation of the City of David in Jerusalem as a case in point. Other essays consider looting in Iraq and in other regions in the Middle East and highlight the legal and moral issues involved—for when legal norms recognized in international law and archaeological standards are violated, chaos reigns. This volume opens a dialogue between scholars and the media, providing both with perspectives that will enable them to become better at communicating what they do to a wide audience. And it offers lay communities who learn about archaeology and the Bible through the popular media information that will make them more sensitive to the way discoveries and issues are presented.

American Paintings in the Brooklyn Museum Philip Wilson Publishers

Four Wisconsin artists, Martha Glowacki, Mark Lorenzi, Natasha Nicholson, and Mary Alice Wimmer, are passionate collectors who use objects from their own collections to inform their individual artwork. This catalog documents an installation by each of the four artists that is reminiscent of the 16th- and 17th- century Wunderkammer, or cabinet of wonders, private collections of natural and man-made objects. Distributed for the Chazen Museum of Art, University of Wisconsin-Madison
