Lesson Planning for Language Teachers Corwin Press
 A complete guide to the methodology and practice of task-based language teaching. For those who wish to adopt a genuinely learner-centred approach to their teaching. Probably the definitive guide to task-based language teaching.

The Routledge Handbook of Instructed Second Language Acquisition Taylor & Francis
 Task-based language teaching is now a well-established pedagogic approach but problematic issues remain, such as whether it is appropriate for all learners and in all instructional contexts. This book draws on the author's experience of working with teachers, together with his knowledge of relevant research and theory, to examine the key issues. It proposes flexible ways in which tasks can be designed and implemented in the language classroom to address the problems that teachers often face with task-based language teaching. It will appeal to researchers and teachers who are interested in task-based language teaching and the practical and theoretical issues involved. It will also be of

interest to students and researchers working in the areas of applied linguistics, TESOL and second language acquisition.

This text introduces teachers to techniques for exploring their own classroom experiences. The paperback edition introduces teachers to techniques for exploring their own classroom experiences. Numerous books deal with classroom observation and research, but this is the first to offer a carefully structured approach to self-observation and self-evaluation. Richards and Lockhart aim to develop a reflective approach to teaching, one in which teachers collect data about their own teaching; examine their attitudes, beliefs, and assumptions; and use the information they obtain as a basis for critical reflection on teaching practices. The approach is not linked to a particular method, but rather can be applied to a variety of methodologies and teaching situations. Each chapter includes questions and activities appropriate for group discussion or self-study.

Effective and practical coaching strategies for new educators plus valuable online coaching tools Many teachers are only observed one or two times per year on average—and, even among those who are observed, scarcely any are given feedback as to how they could improve. The bottom line is clear: teachers do not need to be evaluated so much as they need to be developed and coached. In *Get Better Faster: A 90-Day Plan for Coaching New Teachers*, Paul Bambrick-Santoyo shares instructive tools of how school leaders can effectively guide new teachers to success. Over the course of the book, he breaks down the most critical actions leaders and teachers must take to achieve exemplary results. Designed for coaches as well as beginning teachers, *Get Better Faster* is an integral coaching tool for any school leader eager to help their teachers succeed. *Get Better Faster* focuses on what's practical and actionable which makes the book's approach to coaching so effective. By practicing the concrete actions and micro-skills listed in *Get Better Faster*, teachers will markedly improve their ability to lead a class, producing a steady chain reaction of future teaching success. Though focused heavily on the first 90 days of teacher development, it's possible to implement this work at any time. Junior and experienced teachers alike can benefit from the guidance of *Get Better Faster* while at the same time closing existing instructional gaps. Featuring valuable and practical online training tools available at <http://www.wiley.com/go/getbetterfaster>, *Get Better Faster* provides agendas, presentation slides, a coach's guide, handouts, planning templates, and 35 video clips of real teachers at work to help other educators apply the lessons learned in their own classrooms. *Get Better Faster* will teach you: The core principles of coaching: Go Granular; Plan, Practice, Follow Up, Repeat; Make Feedback More Frequent Top action steps to launch a teacher's development in an easy-to-read scope and sequence guide It also walks you through the four phases of skill building: Phase 1 (Pre-Teaching): Dress Rehearsal Phase 2: Instant Immersion Phase 3: Getting into Gear Phase 4: The Power of Discourse Perfect for new educators and those who supervise them, *Get Better Faster* will also earn a place in the libraries of veteran teachers and school administrators seeking a one-stop coaching resource.

This Element is a guide to task-based language teaching (TBLT), for language instructors, teacher educators, and other interested parties. The work first provides clear definitions and principles related to communication task design. It then explains how tasks can inform all stages of curriculum development. Diverse, localized cases demonstrate the scope of task-based approaches.

Recent research illustrates the impact of task design (complexity, mode) and task implementation (preparation, interaction, repetition) on various second language outcomes. The Element also describes particular challenges and opportunities for teachers using tasks. The epilogue considers the potential of TBLT to transform classrooms, institutions, and society.

Syllabus Design Task-Based Language Teaching

These days, there is more focus than ever on a truly communicative classroom. This can be daunting for teachers as more often than not, text books are not truly communicative. With this series, we aim to make tasks based on the Common European Reference Framework available to teachers. Ready-made, clearly structured tasks involving topics which students will find fun and engaging. This series is based on years of teaching experience and based on over two years of research and study. In each level, there are 12 tasks. The topics are designed to be exam preparation friendly as well as to be used as complimentary material in the classroom. So, if you are thinking about making your classroom (be it for teens or adults) truly communicative, then this should be the series of books for you!

Research Methods in Language Learning John Benjamins Publishing

What is understanding and how does it differ from knowledge? How can we determine the big ideas worth understanding? Why is understanding an important teaching goal, and how do we know when students have attained it? How can we create a rigorous and engaging curriculum that focuses on understanding and leads to improved student performance in today's high-stakes, standards-based environment? Authors Grant Wiggins and Jay McTighe answer these and many other questions in this second edition of *Understanding by Design*. Drawing on feedback from thousands of educators around the world who have used the UbD framework since its introduction in 1998, the authors have greatly revised and expanded their original work to guide educators across the K-16 spectrum in the design of curriculum, assessment, and instruction. With an improved UbD Template at its core, the book explains the rationale of backward design and explores in greater depth the meaning of such key ideas as essential questions and transfer tasks. Readers will learn why the familiar coverage- and activity-based approaches to curriculum design fall short, and how a focus on the six facets of understanding can enrich student learning. With an expanded array of practical strategies, tools, and examples from all subject areas, the book demonstrates how the research-based principles of *Understanding by Design* apply to district frameworks as well as to individual units of curriculum. Combining provocative ideas, thoughtful analysis, and tested approaches, this new edition of *Understanding by Design* offers teacher-designers a clear path to the creation of curriculum that ensures better learning and a more stimulating experience for students and teachers alike.

Widgets Inc.: A task-based course in workplace English is a business communication course for English as a second or foreign language (ESL/EFL) classes. It is the second edition of the course,

which was originally published by Pearson Longman (Hong Kong: 2008). Students simulate being interns working for a fictional company called Widgets Inc. The course is designed to be compatible with a range of English proficiency levels (from CEFR A2 to C1), including mixed-level classes. It requires a class of 12 or more motivated adults who meet for between 22-45 hours (fifteen to thirty 90-minute periods). Students are placed into teams and follow a project-based product development cycle across 6 stages. Stage 1 introduces the company and a cast of fictional characters who interact with the class via online streamed video. Stage 2 is an R&D stage in which students brainstorm product ideas. In Stage 3, they are given several product ideas proposed by a different team, and must select the best one to go into production. In Stage 4, they are given another team's selected product and must perform market research on it. In Stage 5 they prepare a proposed marketing campaign for yet another product passed from a different team. Stage 6 is the conclusion, in which students prepare a resume and interview for a promotion within the company. Each stage is punctuated by a presentation and/or a writing task which is related to the stage's topic. Students are assessed via can-do statements built into the simulation as "employee evaluations" which include self, peer, and instructor assessments. The course features a task-complexity based syllabus rather than the traditional grammar syllabus or functional-notional syllabus.
