Gain the nursing skills you need to provide wellness-based care for older adults! Ebersole and Hess' Gerontological Nursing & Healthy Aging, 6th Edition uses a holistic approach to describe compassionate care along a continuum of wellness. Designed to promote healthy aging regardless of the patient's situation or disorder, this text provides best-practice guidelines in covering physical, psychosocial, spiritual, and cognitive health. New to this edition are Next Generation NCLEX®-style case studies, updates on measuring clinical judgment, expanded coverage of core competencies, and more. Written by gerontological nursing experts Theris Touhy and Kathleen Jett, this concise text provides a solid foundation in every aspect of healthy aging. Focus on health and wellness provides the evidence-based information and strategies needed to promote healthy aging. Key concepts, learning activities, and discussion questions in every chapter emphasize the information needed to enhance care. Recommended competencies from the AACN and the Hartford Institute for Geriatric Nursing are integrated throughout. Discussion of disease processes is placed in the context of healthy adaptation, nursing support, and responsibilities. Easy-to-use information on nursing techniques and communication appears with the associated disorders, symptoms, and situations. Tips for Best Practice and Resources for Best Practice boxes provide insight into proven methods of nursing care. Discussions of nursing and interprofessional actions help students learn to enhance wellness, maintain optimal function, and prevent unnecessary disability. Coverage of age, cultural, racial, and gender differences highlights these important considerations in caring for older adults. NEW! Updates reflect the NCSBN Clinical Judgment Model. NEW! Next Generation NCLEX® (NGN)-style case studies provide optimal preparation for the Next Generation NCLEX Examination. NEW! Specialized information addresses the unique needs of older adults such as atypical disease presentation, geriatric syndromes, neurocognitive disorders, quality of life with chronic illness, legal and ethical issues, and mental health challenges such as depression and substance abuse. NEW! Coverage of competencies of expanding nursing roles in the care of older adults addresses the continuum of care. NEW! Gerontological expertise is incorporated into nursing actions and complements other nursing texts (including med-surg, community health, mental health, and assessment books) used in programs without a freestanding gerontological nursing course. NEW! Expanded content includes information on COPD guidelines, medication use and misuse, Alzheimer's Disease, wound care guidelines, diagnosis and treatment of sleep-disordered breathing, joint replacement, caregiver strain, hospice and transitional care, and more.

Since the early 1990s, long-term care policies have undergone significant transformations across OECD countries. In some countries these changes have responded to the introduction of major policy reforms while in others, significant transformations have come about through the accumulation of incremental policy changes. The book brings together evidence from over 15 years of care reform to examine changes in long-term care systems occurring in OECD countries. It discusses and compares key changes in national policies and examines the main successes and failures of recent reforms. Finally, it suggests possible policy strategies for the future in the sector. With contributions from a wide range of experts across EEC countries, this book is essential reading for academics, researchers and policy-makers in the field of long-term care policy.

This title was first published in 2001: Employing an interdisciplinary and comparative approach to equity in long-term care, this book addresses the fact that demographic changes leading to ageing populations, financial pressures and changes in traditional support systems have brought long-term care and the redesign of care systems to the top of the European social policy agenda. Despite the importance of this issue, however, the question of equity in long-term care has until now received relatively little attention in social policy research. Rather than focusing on theories of social justice or the analysis of specific interpretations of equity, this book develops key dimensions of equity choices in a framework for systematic comparative analysis. This tool is then used to investigate long-term care policies in Europe, exploring equity choices in both the provision and the finance of long-term care. These choices are discussed comparatively with regard to the implications for the various actors and are also contrasted with basic welfare state objectives. This book represents an important addition to comparative research into several key areas of welfare and welfare state design. It explores the division of responsibilities in long-term care systems between the public and private and formal and informal sectors, the relationships between different welfare state objectives, the different types of welfare state intervention, and the principles and choices surrounding the allocation of resources and burdens.

The Lums are cursed. Their early deaths come randomly, strangely, and often, be it by tainted cheeseburger or speeding ice cream truck. The most recent victim is Louis Lum's mother. Now Louis must move back home with his gangsta rap-obsessed father, Sonny, to prevent him from enacting the revenge he promises. But soon Louis's concern shifts to his uncle Bo Lum, who has disappeared in Hong Kong. As Louis's search progresses, the tragicomic story of three generations of Lums in America is revealed. Chieh Chieng graduated from the creative writing program at the University of California, Irvine, and has been published in Glimmer Train, the Threepenny Review, and the Santa Monica Review. * Chosen for Barnes and Noble's Discover Great New Writers Program * "This is a dazzling debut: poignant, prickly, and deliciously absurd."-Booklist "[Chieng is] a fresh comic voice...a touching and auspicious debut."-Orange Country Register

First published in 1993. This present volume, co-edited by two sociologists, Jon Hendricks of the United States and Carolyn Rosenthal of Canada, focuses on a comparative, cross-national discussion of social policies of the United States and Canada, especially those related to health care. The uniqueness of this work lies in the fact that it views family experiences from both a Canadian and an American perspective. In addition, this book not only fills a gap in our knowledge of social policies, but contributes to our understanding of how these policies shape and effect the lives of older families in both countries.

"A riveting account that reaches beyond the market landscape to say something universal about risk and triumph, about hubris and failure."—The New York Times NAMED ONE OF THE BEST BOOKS OF

THE YEAR BY BUSINESSWEEK In this business classic—now with a new Afterword in which the author draws parallels to the recent financial crisis—Roger Lowenstein captures the gripping roller-coaster ride of Long-Term Capital Management. Drawing on confidential internal memos and interviews with dozens of key players, Lowenstein explains not just how the fund made and lost its money but also how the personalities of Long-Term's partners, the arrogance of their mathematical certainties, and the culture of Wall Street itself contributed to both their rise and their fall. When it was founded in 1993, Long-Term was hailed as the most impressive hedge fund in history. But after four years in which the firm dazzled Wall Street as a \$100 billion moneymaking juggernaut, it suddenly suffered catastrophic losses that jeopardized not only the biggest banks on Wall Street but the stability of the financial system itself. The dramatic story of Long-Term's fall is now a chilling harbinger of the crisis that would strike all of Wall Street, from Lehman Brothers to AIG, a decade later. In his new Afterword, Lowenstein shows that LTCM's implosion should be seen not as a one-off drama but as a template for market meltdowns in an age of instability—and as a wake-up call that Wall Street and government alike tragically ignored. Praise for *When Genius Failed* "[Roger] Lowenstein has written a squalid and fascinating tale of world-class greed and, above all, hubris."—*BusinessWeek* "Compelling . . . The fund was long cloaked in secrecy, making the story of its rise . . . and its ultimate destruction that much more fascinating."—*The Washington Post* "Story-telling journalism at its best."—*The Economist*

The ideal value-added tax (VAT) would carry an economic efficiency ratio of 100 as, in theory, VAT should not be susceptible to exemptions and rate variations. However, practical reality tells a different story, and it will come as no surprise to learn that the VAT systems of almost all countries remain far from the benchmark, and that this is particularly the case when VAT is applied to real estate. This book describes and analyses VAT treatment of real estate transactions in six representative countries: Australia, Canada, Germany, Japan, Mexico, and the United Kingdom. As in any jurisdiction, the VAT schemes covered must accommodate complex factual matrices that demand consistent, fair, and equal treatment. Among these VAT determinants the authors, each an expert in the national tax law of one of the six countries, address the following: types of real estate sales; long versus short term leases; commercial versus residential use; newly constructed versus existing property; status of the parties involved as taxable or non-taxable for VAT; taxable and tax-free supplies; special rules for charities, mooring facilities, aircraft, sports facilities, etc.; subdivision of apartments into title units; commercial residential premises; construction work; cross-border supply of construction work and services; and transfer of a 'going concern'. The discussions also include the practical areas of accounting for VAT, administrative compliance, personal tax liability, and VAT refund and overpayment certification processes, as well as thorough consideration of relevant case law and examination of frequently litigated matters. Each author has designed his or her chapter to ensure that the technical nuances of each system are explained. An introductory chapter outlines economic theory and preferred VAT treatment of real estate transactions, and compares the variety of solutions applied in the six countries covered. Although a number of legal works exist on real estate under VAT in single jurisdictions, this is the first book to combine a multi-jurisdictional approach with attention to relevant economic theory, allowing for a very useful assessment of best practices. For this reason it is sure to be welcomed by practitioners and academics not only as an overview of the problem areas encountered when designing VAT policy, but also as a reference in applying VAT to real estate transactions.

A Wall Street Journal Bestseller Your personal goals need a long-term strategy. It's no secret that we're pushed to the limit. Today's professionals feel rushed, overwhelmed, and perennially behind. So we keep our heads down, focused on the next thing, and the next, without a moment to breathe. How can we break out of this endless cycle and create the kind of interesting, meaningful lives we all seek? Just as CEOs who optimize for quarterly profits often fail to make the strategic investments necessary for long-term growth, the same is true in our own personal and professional lives. We need to reorient ourselves to see the big picture so we can tap into the power of small changes that, made today, will have an enormous and disproportionate impact on our future success. We need to start playing *The Long Game*. As top business thinker and Duke University professor Dorie Clark explains, we all know intellectually that lasting success takes persistence and effort. And yet so much of the relentless pressure in our culture pushes us toward doing what's easy, what's guaranteed, or what looks glamorous in the moment. In *The Long Game*, she argues for a different path. It's about doing small things over time to achieve our goals—and being willing to keep at them, even when they seem pointless, boring, or hard. In *The Long Game*, Clark shares unique principles and frameworks you can apply to your specific situation, as well as vivid stories from her own career and other professionals' experiences. Everyone is allotted the same twenty-four hours—but with the right strategies, you can leverage those hours in more efficient and powerful ways than you ever imagined. It's never an overnight process, but the long-term payoff is immense: to finally break out of the frenetic day-to-day routine and transform your life and your career.

Covering the full spectrum of long-term care, Pratt's *Long-Term Care: Managing Across the Continuum*, Fifth Edition is an ideal introduction to management in this dynamic industry. Concise, yet complete, it begins with a look at recent changes in long-term care and health care reform, before examining the various long-term care providers and their interaction with competition, payment systems, quality, and ethical issues. It moves on to explore managing in the long-term care system looking at administration, leadership, culture change, technology and community relations, and concludes with a look at future trends and managing continuing change. The Fifth Edition is a comprehensive revision reflecting new Federal Requirements of Participation from CMS for skilled nursing facilities and changes the Medicare-fee-for-service payment system (PDP). It also addresses the Affordable Care Act and its impact on long-term care, as well as the growth of technology in care, and more.

Since the first edition of this book was published there have been considerable changes in continuing care. NHS nursing homes have been created, enthusiasts have developed new initiatives, and attempts have been made to improve attitudes. The recent White Paper on Community Care is likely to accelerate the transfer of large numbers of elderly patients from long-stay hospital beds to private-sector accommodation: a move often accompanied by much anxiety about standards of care. Although Health Authorities visit private nursing homes and apply the National Association of Health Authorities' standards to them, anxieties continue. Unfortunately for the patients who remain in hospital, many Health Authorities seem reluctant to apply these same standards to their own long-stay departments, since many would fail abysmally. The 1987 annual report of the Health Advisory Service (see Chapter 3) presents a damning indictment of the care given to old people: A recent review of twelve consecutive HAS Reports on services for older people in hospitals shows that long-stay wards consistently offered environments which were unable to offer privacy, homely surroundings, personal space and possessions or adequate furniture. In the twelve districts there was not one comprehensive personalised clothing service. Half of the reports commented on the lack of effective management of continence. Catering was often provided according to the needs of the institution rather than those of the resident patients.

With estimates of their numbers ranging from one million to almost four million people, allied health care personnel make up a large part of the health care work force. Yet, they are among the least studied elements of our health care system. This book describes the forces that drive the demand for and the supply of allied health practitioners—forces that include demographic change, health care financing policies, and career choices available to women. Exploring such areas as credentialing systems and the employment market, the study offers a broad range of recommendations for action in both the public and private sectors, so that enough trained people will be in the right place at the right time.
