Amsterdam of the 50s, 60s and 70s is

viewed from the perspective of Inni Wintrop, a man who leads a capricious life, floating comfortably on open possibilities.  
*The Testing* Houghton Mifflin Harcourt  
• New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this point in time, the Drawdown book is exactly what is needed; a credible,

conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* “There’s been no real way for ordinary people to get an

understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, Vox “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward,

not just to slow the earth’s warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

*Reading List on Ethics* Graywolf Press

While living in Holland, Michael meets Judith, who is frightened, bullied, and beaten by her mother and blames herself for the abuse she is enduring.

*The Two Hearts Of Kwasi Boachi* Hogarth

In 1837, two young African princes arrive at the court of Willem I in the Netherlands. They have been given to the Dutch by the King of the Ashanti as surety in a deal over illegal slave trading. The two boys think they have been sent to acquire a European education, but time passes. They forget their native language and become exiles. Treated as curiosities by white people, their friendship suffers and their paths diverge. Years later, as the twentieth century dawns, the elderly Kwasi, now owner of a coffee plantation in Java, sits down to write his autobiography.

Based on a true story, *The Two Hearts of Kwasi Boachi* is both a brilliant piece of storytelling and a moving portrayal of the search for identity and belonging.

**Red, White & Royal Blue** Harper Collins

It is the winter of 1945, the last dark days of World War II in occupied Holland. A Nazi collaborator, infamous for his cruelty, is assassinated as he rides home on his bicycle. The Germans retaliate by burning down the home of an innocent family; only twelve-year-old Anton survives. Based on actual events, *The Assault* traces the complex repercussions of this horrific incident on Anton's life. Determined to forget, he opts for a carefully normal existence: a prudent marriage, a successful career, and colorless passivity. But the past keeps breaking through, in relentless memories and in chance encounters with others who were involved in the assassination and its aftermath, until Anton finally learns what really happened that night in 1945—and why. *Naamlijst van uitgekomen boeken, kaarten, prentiverken, enz* Wendy Lamb Books

#### Talking to Alaska Penguin

This book deals with the development of private secondary schooling during the Second World War in Belgium. It focuses on how the German occupier used education to gain acceptance of the regime, and discusses the attitudes of Belgian education authorities, schools, teachers and pupils towards the German occupation. Suggesting that the occupation forced Belgian education authorities, such as the Roman Catholic Church, to take certain positions, the book explores the wartime experiences and memories of pupils and teachers. It explains that the German Culture Department was relatively weak in establishing total control over education and that Catholic schools were able to maintain their education project during the war. However, the book also reveals that, in some cases, the German occupation did not need total control over education in order to find support for some

authoritarian ideas. As such, Van Ruyskenvelde's analysis presents a nuanced view of the image of the Catholic Church, schools, teachers and pupils as mere victims of war.
