Difference Between Economic Growth and Development | Bizfluent Economic

Growth And Development
AEconomic Growth does not take into account the depletion of natural resources, which might lead to pollution, congestion & disease. Development, however, is concerned with sustainability, which means meeting the needs of the

present without compromising future needs. A. Economic Growth Definition. Economic Growth is an increase in a country's output. Economic Growth And Development | Intelligent Economist Economic growth can be measured when there is a positive change in the national income, whereas economic development can be seen when there is an increase in real national income. Economic growth is a short-term process which takes into account yearly growth of the economy. But if we talk about economic development it is a long term process. Difference Between Economic Growth and Economic ... Economic Growth is a

narrower concept than economic development. It is an increase in a country's real level of national output which can be caused by an increase in the quality of resources (by education etc.), increase in the quantity of resources & improvements in technology or in another way an increase in the value of goods and services produced by every sector of the economy. Economic Development vs Economic Growth - Difference and ... Conclusion - Economic Growth vs Economic Development. After examining the above information, we can say that Economic Growth is a subset of Economic

development.

Economic

Development is a bigger concept than economic growth.

Economic

Development uses various indicators to measure the progress in an economy as a whole, however, Economic growth uses only specific indicators like the gross domestic product, individual income, etc for the calculation. Economic Growth vs Economic Development | Best 7 Differences Economic Growth Economic Development;
Economic growth is the quantitative variation in the output of an economy at a specific time period. Economic development is growth in the output of an economy along with the development in HDI index which

considers living standards of citizens, overall happiness index, and advancement in technology of an economy. Difference Between Economic Growth and Economic Development Economic growth is a quantitative factor which measures what is the total output or production of a country whereas economic development is the qualitative factor which gives emphasize on improvement in the quality of living standards of its people. Differences between Economic Growth and Economic Development Economic Growth is considered as one of the instruments for achieving Economic Development. On the contrary Economic growth alone can't
