General Knowledge MANUAL 2017 Springer Science & Business Media

This monograph was assembled to honor Professor Norman Bowery and his work on the 30th anniversary of his discovery of the GABA_B receptor. In the present volume, leading neuroscientists from academia and industry provide a perspective of current research, both basic and translational, in the discovery of drugs acting at the GABA_B receptor. The topics covered provide a comprehensive review of the field and the current state of research in this area. Included are chapters on

the chemistry of GABA_B agonists and antagonists, on the genetics and molecular composition of the site, its regulation and trafficking, and its role in controlling cellular, autonomic, and behavioral function. There are also chapters describing the potential clinical utility of drugs regulating GABA_B activity receptor in the areas of hypertension, gastroesophageal reflux disease, Down syndrome, depression, and substance abuse. The information contained in this text will be of particular interest to neuroscientists in general and to neuropharmacologists in particular. Articles written by leading investigators in the field informs and updates on all the latest developments

The book presents research work on face recognition using edge information as features for face recognition with ICA algorithms. The independent components are extracted from edge information. These independent components are used with classifiers to match the facial images for recognition purpose. In their study, authors have explored Canny and LOG edge detectors as standard edge detection methods. Oriented Laplacian of Gaussian (OLOG) method is explored to extract the edge information with different orientations of Laplacian pyramid. Multiscale wavelet model for edge detection is also proposed to extract edge information. The book provides insights for advance research work in the area of image processing and biometrics.

Discusses the challenges of intercultural communication in engineering, technical, and related professional fields Given today's globalized technical and engineering environment, intercultural communication is an essential topic for engineers, other technical professionals, and technical communicators to learn. Engineering programs, in particular, need to think about how to address the ABET requirement for students to develop global competence and communication skills. This book will help readers learn what intercultural communication is like in the workplace—which is an important first step in gaining intercultural competence. Through narratives based on the real experiences of working professionals, *Negotiating Cultural Encounters: Narrating Intercultural Engineering and Technical Communication* covers a range of design, development, research, and documentation projects—offering an authentic picture of today's international workplace. Narrative contributors present firsthand experience and perspectives on the complexities and challenges of working with multicultural team members,

international vendors, and diverse customers; additional suggested readings and discussion questions provide students with information on relevant cultural factors and invite them to think deeply and critically about the narratives. This collection of narratives: Responds to the need for updated firsthand information in intercultural communication and will help us prepare workplace professionals Covers various topics such as designing e-commerce websites, localizing technical documentation, and translating workplace safety materials Provides hands-on studies of intercultural professional communication in the workplace Is targeted toward institutions that train engineers for technical communication tasks in diverse sociocultural environments Presents contributions from a diverse group of professionals Recommends additional material for further pursuit A book unlike any other in its field, *Negotiating Cultural Encounters* is ideal for all engineering and technical communication professionals seeking to better communicate their ideas and thoughts in the multicultural workplaces of the world.

Real Essays puts essay writing in a real-world context, showing students that critical writing, reading, and thinking skills are both attainable and essential to student success. Real Essays helps students to connect the writing class with their real lives and with the expectations of the larger world. This new edition has expanded rhetorical situation coverage, emphasizing the rhetorical triangle (audience, purpose, and author), and helping students think and read more critically. In addition, even more situational writing from the workplace showcases how students will use writing beyond the classroom. Profiles of Success from former students, over forty professional and student readings (50% new), and proven step-by-step grammar and writing instruction, energize and encourage students while giving them the support they need. With a simplified design, this updated version of Real Essays helps students realize their goals and gives instructors the support and tools they need to help them reach those goals.

The Globus Toolkit is a key technology in Grid Computing, the exciting new computing paradigm that allows users to share processing power, data, storage, and other computing resources across institutional and geographic boundaries. *Globus Toolkit 4: Programming Java Services* provides an introduction to the latest version of this widely acclaimed toolkit. Based on the popular web-based *The Globus Toolkit 4 Programmer's Tutorial*, this book far surpasses that document, providing greater detail, quick reference appendices, and many additional examples. If you're making the leap into Grid Computing using the Globus Toolkit, you'll want *Globus Toolkit 4: Programming Java Services* at your side as you take your first steps. Written for newcomers to Globus Toolkit, but filled with useful information for experienced users. Clearly situates Globus application development within the context of Web Services and evolving Grid standards. Provides detailed coverage of Web Services programming with the Globus Toolkit's Java WS Core component. Covers basic aspects of developing secure services using the Grid Security Infrastructure (GSI). Uses simple, didactic examples throughout the book, but also includes a more elaborate example, the FileBuy application, that showcases common design patterns found in Globus applications. Concludes with useful reference appendices.

GABAb Receptor Pharmacology: A Tribute to Norman Bowery Foundation Books

The successful employment of food packaging can greatly improve product safety and quality, making the area a key concern to the food processing industry. Emerging food packaging technologies reviews advances in packaging materials,

the design and implementation of smart packaging techniques, and developments in response to growing concerns about packaging sustainability. Part one of Emerging food packaging technologies focuses on developments in active packaging, reviewing controlled release packaging, active antimicrobials and nanocomposites in packaging, and edible chitosan coatings. Part two goes on to consider intelligent packaging and how advances in the consumer/packaging interface can improve food safety and quality. Developments in packaging material are analysed in part three, with nanocomposites, emerging coating technologies, light-protective and non-thermal process packaging discussed, alongside a consideration of the safety of plastics as food packaging materials. Finally, part four explores the use of eco-design, life cycle assessment, and the utilisation of bio-based polymers in the production of smarter, environmentally-compatible packaging. With its distinguished editors and international team of expert contributors, Emerging food packaging technologies is an indispensable reference work for all those responsible for the design, production and use of food and beverage packaging, as well as a key source for researchers in this area. Reviews advances in packaging materials, the design and implementation of smart packaging techniques, and developments in response to growing concerns about packaging sustainability Considers intelligent packaging and how advances in the consumer/packaging interface can improve food safety and quality Examines developments in packaging materials, nanocomposites, emerging coating technologies, light-protective and non-thermal process packaging and the safety of plastics as food packaging materials
