The 1 Million Smuggled Bibles That Changed China CreateSpace

From the coauthor of *The Heavenly Man* comes another incredible true story of God's power manifested in China. Project Pearl is the powerful account of the delivery, in June 1981, of 1 million Bibles into China by a tugboat and barge manned by twenty dedicated missionaries. The delivery was blanketed in prayer and took place right under the noses of the People's Liberation Army, naval patrol boats, and coastal radar of China's Guangdong Province. The bravery and vision of those involved in Project Pearl provoked Chinese printing presses to print Bibles as well, and gradually the availability of God's Word began to stoke the flames of the now evident Chinese revival.

The Autobiography of J. Hudson Taylor BenBella Books

Chinese people are known for being philosophical. A person doesn't necessarily have to be religious in order to be philosophical. You just have to learn the best ways to live your life so that you can have a more prosperous future. A classic Chinese manual entitled "Tao Te Ching" teaches people the art of living and the path you must take in order to find fulfillment in your life. This classic Chinese text was written by a sage named Laozi, also known as Lao Tzu. Laozi means "Old Master" in Chinese. Some people like to refer to this classic Chinese text as Laozi instead of Tao Te Ching because they have so much respect for the author. The sage, Laozi, is believed to have lived around 600 B.C. In his professional life, he worked as a record keeper for the Zhou Dynasty Court. However, historians are still unsure about the exact date and time when the Tao Te Ching was actually written. The only thing they know is that the oldest Chinese texts that were excavated dates back to sometime in the late 4th century B.C. Even though they were originally written in the 6th century, the texts that were excavated in the 4th century are likely rewritten texts. The Tao Te Ching is one of the main Chinese classic texts that promote the religious and philosophical principles of Taoism. It is the most fundamental book of text that is studied by all Taoists. It is also a strong influence on other Chinese schools that teach Confucianism, Legalism and Chinese Buddhism. Chinese painters, poets, gardeners and calligraphers use the philosophies of the book as a source of inspiration. The influence of the Tao Te Ching has spread far throughout Eastern Asia and is one of the most translated books ever written in the history of literature. In Roman culture, the book was transcribed using the Wade-Giles Romanization system. They transcribed the title as "Daodejing." The words "Dao" and "Tao" both mean "the way." The words "De" and "Te" both mean inner strength or virtuosity. And finally, the words "Jing" and "Ching" mean "classic" or "the great book." Therefore, the translation of Tao Te Ching and Daodejing is said to be "The Classic Way to Inner Strength." In other words, if you learn the philosophies in this book then you will have the knowledge of finding the right path to strength and happiness. Tao Te Ching is not a long book to read

by any means. It is only 5,000 Chinese characters long with about 81 very brief sections or chapters. The writing is of a classical form of Chinese called zhuanshu. As the centuries went by, the later versions were written in Lishu and Kaishu. As for the chapters, no one knows if the separated chapters were originally placed there by Laozi or if they were added later on. Some people think they were added later on as a way to help memorize the information and add commentary. The whole book is divided into two main parts. The first part is the Tao Ching, which goes from chapter 1 to chapter 37. The second part is the Te Ching, which goes from chapter 38 to chapter 81. Some even refer to this style of writing as laconic and poetic because of its brief chapters and intentional contradictions. This writing is strategic in a sense because it creates memorable phrases and then forces the reader to create their own reconciliations from all the supposed contradictions. This is why it takes some people their entire lives to fully understand the message behind the text. For others, they never fully grasp it.

The Life and Legacy of Jiang Zemin Chinese Bound Classics

A dramatic historical narrative of the man who stole the secret of tea from China In 1848, the British East India Company, having lost its monopoly on the tea trade, engaged Robert Fortune, a Scottish gardener, botanist, and plant hunter, to make a clandestine trip into the interior of China—territory forbidden to foreigners—to steal the closely guarded secrets of tea horticulture and manufacturing. For All the Tea in China is the remarkable account of Fortune's journeys into China—a thrilling narrative that combines history, geography, botany, natural science, and old-fashioned adventure.

Disguised in Mandarin robes, Fortune ventured deep into the country, confronting pirates, hostile climate, and his own untrustworthy men as he made his way to the epicenter of tea production, the remote Wu Yi Shan hills. One of the most daring acts of corporate espionage in history, Fortune's pursuit of China's ancient secret makes for a classic nineteenth-century adventure tale, one in which the fate of empires hinges on the feats of one extraordinary man.

No one in the twentieth century had a greater impact on world history than Deng Xiaoping. And no scholar is better qualified than Ezra Vogel to disentangle the contradictions embodied in the life and legacy of China's boldest strategist—the pragmatic, disciplined force behind China's radical economic, technological, and social transformation.

The End of the Western World and the Birth of a New Global Order: Second Edition HPA Press

This book demonstrates that transformative processes occurred in Chinese religions during the last decade of the Qing dynasty and the entire Republican period. Focusing on Shanghai and Zhejiang, it delves into the workings of social structures, religious practices, and personal commitments as they evolved during this period of wrenching changes.

Three-Stone Games Penguin Canada

The true story of a Chinese American mountain man who fed thirty people for ten days in the wilderness—and helped inspire the creation of the National Park Service. Tie Sing was born in the mountains. The mountains were in his blood. But because he was of Chinese descent at a time in America when to be Chinese meant working in restaurants or laundries, Tie Sing's prospects were limited. But he had bigger plans. He began cooking for mapmakers and soon built a reputation as the best trail cook in California. When millionaire Stephen Mather began his quest to create a national park service in 1915, he invited a group of influential men—writers, tycoons, members of Congress, and even a movie star—to go camping in the Sierras. Tie Sing was hired to cook. Tie Sing planned diligently. He understood the importance of this trip. But when disaster struck—twice!—and Tie Sing's supplies were lost, it was his creative spirit and quick mind that saved the day. His sumptuous menus had to be struck and Tie Sing had to start over in order to feed the thirty people in the group for ten whole days. His skills were tested and Tie Sing rose to the challenge. On the last night, he fed not just the campers' bodies, but also their minds, reminding them to remember and protect the mountains. 2016 marks the 100th anniversary of the National Park Service, created by Congress on August 25, 1916. Today, you can hike to Sing Peak, named for Tie Sing, in Yosemite National Park.

A New Translation of Selected Poems from the Ancient Chinese Anthology Public Affairs

In essence, this story is about how a certain person was searching his bookshelf for something to read and in the end found a book, which turned out to be the source, from which it is possible to obtain absolutely any kind of information about absolutely any person. Meaning, information to the smallest particulars and details about what his or her qualities of personality are, how he or she lives, what he or she really wants to achieve, what he or she hides, and much more. And, it does not matter, if the subject is some person, who lived in the distant past or lives in the present or someone, who will live in the future. Since, as it turned out later on, this literary monument is nothing other than the Catalog of human population. In other words, the encyclopedia of Homo sapiens; in essence, the same as encyclopedias, reference books for specialists, which contain complete information about representatives of a particular subspecies of animals, plants, etc. Although at some point, the course of this story turned banal: "bad guys" from security services, intelligence services, politics decided to not only use this source of knowledge for their dirty deeds, but also to appropriate it solely for their personal use. And, the way they tried to do this is also banal: by physically destroying the author of discovery of the Catalog of human population and all of his colleagues. However, the ending of this story makes it stand out from the category of ordinary spy stories. At least because the main characters of this story managed to survive not due to favorable concatenation of circumstances or someone's help, but thanks to that knowledge, which they discovered in the ancient text, which turned out to be the Catalog of human population. Of course, such an outcome upset and continues to upset not only the Russian special services, but also all those people in whose way developers of the Catalog of human population got. And, in this civilization, there are countless numbers of such people: from psychologists (who become no longer needed by anyone) to organizers of this civilization themselves. Since from the standpoint of the Catalog of human population—technogenic civilization without a human, which they lovingly built for many centuries, is simply trash, to put it mildly, and beneath all criticism. And, they themselves are also trash. However, regular people, who (thanks to the scientific discovery made by Andrey Davydov) got the source with answers to all of their questions and individual recipes, now no longer need to pay "experts on the human soul" for being shamelessly fooled. Therefore, whoever tries to kill developers of the Catalog of

human population in the future must know that it is no longer possible, as they already became part of history of humanity. After all, at the current stage of development, a Homo sapiens has only one possibility to continue to live after death, to live through the ages: in the product that he/she created. And, those, who tried and continue to try to kill them, were nobodies and will remain nobodies, who one day will cease to exist without leaving a trace. As for organizers of this "civilization"—maybe instead of trying to find new recipes to destroy "excess billions" and trying to examine human potential using Neanderthal methods, it would be more reasonable not only to find out the recipe of how to make Homo sapiens a 100% controllable producer and consumer from the source (which, by the way, seems to have been left to humanity by creators of nature and a human on this planet), but also how to build a civilization without quotes? After all, it only seems to them that they are the main deceivers, while in reality they were fooled, and fooled majorly.

Now one of Kirkus Reviews' "Best Books of the Year" From Paul French, the New York Times bestselling author of *Midnight in Peking*—winner of both the Edgar Award for Best Fact Crime and the CWA Gold Dagger for Non-Fiction—comes *City of Devils*, a rags-to-riches tale of two self-made men set against a backdrop of crime and vice in the sprawling badlands of Shanghai. Shanghai, 1930s: It was a haven for outlaws from all over the world: a place where pasts could be forgotten, fascism and communism outrun, names invented, and fortunes made—and lost. "Lucky" Jack Riley was the most notorious of those outlaws. An ex-U.S. Navy boxing champion, he escaped from prison and rose to become the Slots King of Shanghai. "Dapper" Joe Farren—a Jewish boy who fled Vienna's ghetto—ruled the nightclubs. His chorus lines rivaled Ziegfeld's. In 1940, Lucky Jack and Dapper Joe bestrode the Shanghai Badlands like kings, while all around the Solitary Island was poverty, starvation, and war. They thought they ruled Shanghai, but the city had other ideas. This is the story of their rise to power, their downfall, and the trail of destruction left in their wake. Shanghai was their playground for a flickering few years, a city where for a fleeting moment even the wildest dreams could come true.

I Love You Now, I Loved You Then Farrar, Straus and Giroux

Yang Jisheng's *The World Turned Upside Down* is the definitive history of the Cultural Revolution, in withering and heartbreaking detail. As a major political event and a crucial turning point in the history of the People's Republic of China, the Great Proletarian Cultural Revolution (1966–1976) marked the zenith as well as the nadir of Mao Zedong's ultra-leftist politics. Reacting in part to the Soviet Union's "revisionism" that he regarded as a threat to the future of socialism, Mao mobilized the masses in a battle against what he called "bourgeois" forces within the Chinese Communist Party (CCP). This ten-year-long class struggle on a massive scale devastated traditional Chinese culture as well as the nation's economy. Following his groundbreaking and award-winning history of the Great Famine, Tombstone, Yang Jisheng here presents the only history of the Cultural Revolution by an independent scholar based in mainland China, and makes a crucial contribution to understanding those years' lasting influence today. *The World Turned Upside Down* puts every political incident, major and minor, of those ten years under extraordinary and withering scrutiny, and arrives in English at a moment when contemporary Chinese governance is leaning once more toward a highly centralized power structure and Mao-style cult of personality.

China has become the powerhouse of the world economy, its incredible boom overseen by the elite members of the secretive and all-powerful communist party. But since the election of Xi Jinping as General Secretary, life at the top in China has changed. Under the guise of a corruption crackdown, which has seen his rivals imprisoned, Xi Jinping has been quietly building one of the most powerful leaderships modern China has ever seen. In *CEO China*, the noted China expert Kerry Brown reveals the hidden story of the rise of the man dubbed the 'Chinese Godfather'. Brown investigates his relationship with his revolutionary father, who was expelled by Mao during the Cultural Revolution, his business dealings and allegiances in China's regional power struggles and his role in the internal battle raging between the old men of the Deng era and the new super-rich 'princelings'. Xi Jinping's China is powerful, aggressive and single-minded and this book will become a must-read for the Western world.

China is hot. The world sees a glorious future for this sleeping giant, three times larger than the United States, predicting it will blossom into the world's biggest economy by 2010. According to Chang, however, a Chinese-American lawyer and China specialist, the People's Republic is a paper dragon. Peer beneath the veneer of modernization since Mao's death, and the symptoms of decay are everywhere: Deflation grips the economy, state-owned enterprises are failing, banks are hopelessly insolvent, foreign investment continues to decline, and Communist party corruption eats away at the fabric of society. Beijing's cautious reforms have left the country stuck midway between communism and capitalism, Chang writes. With its impending World Trade Organization membership, for the first time China will be forced to open itself to foreign competition, which will shake the country to its foundations. Economic failure will be followed by government collapse. Covering subjects from party politics to the Falun Gong to the government's insupportable position on Taiwan, Chang presents a thorough and very chilling overview of China's present and not-so-distant future.
