*Urban Subversion and the Creative City* Routledge

A provocative new way to think about why we live as we do today-and where we might be headed. Initially published in 2002, *The Rise of the Creative Class* quickly achieved classic status for its identification of forces then only beginning to reshape our economy, geography, and workplace. Weaving story-telling with original research, Richard Florida identified a fundamental shift

linking a host of seemingly unrelated changes in American society: the growing importance of creativity in people's work lives and the emergence of a class of people unified by their engagement in creative work. Millions of us were beginning to work and live much as creative types like artists and scientists always had, Florida observed, and this Creative Class was determining how the workplace was organized, what companies would prosper or go bankrupt, and even which cities would thrive. In *The Rise of the Creative Class Revisited*, Florida further refines his occupational, demographic, psychological, and economic profile of the Creative Class, incorporates a decade of research, and adds five new chapters covering the global effects of the

Creative Class and exploring the factors that shape "quality of place" in our changing cities and suburbs.

#### Be Creative Penguin

International Bestseller All places are not created equal. In this groundbreaking book, Richard Florida shows that where we live is increasingly a crucial factor in our lives, one that fundamentally affects our professional and personal prospects. As well as explaining why place matters now more than ever, *Who's Your City?* provides indispensable tools to help you choose the right place for you. It's a cliché of the information age that globalization has made place irrelevant, that one can telecommute as effectively from New Zealand as New York. But it's not true, Richard Florida argues, relying on twenty years of innovative research in urban studies, creativity, and demographic trends. In fact, as new units of economic growth called mega-regions become increasingly specialized, the world is becoming more and more "spiky" — divided between flourishing clusters of talent, education and competitiveness, and moribund "valleys." All these places have personalities, Richard Florida explains in the second half of *Who's Your City?*, and happiness depends on finding the city in which you can balance your personal and career goals to thrive. More people than ever before now have the opportunity to choose where to live, but at different points in our lives we need different kinds of places, he points out — what a couple of recent college graduates want from their city isn't necessarily what a retiree is looking for. You have to find the place that suits you best: a boho-burb neighbourhood isn't likely to be the best fit for patio man. So, for the first time, *Who's Your City?* ranks cities by their fitness for various life stages, rating the

best places for singles, young families, and empty nesters. It summarizes the key factors that make place matter to different kinds of people, from professional opportunities to the closeness of family to how well it matches their lifestyle, and provides an in-depth series of steps to help you choose the right place wisely. Sparkling with Richard Florida's signature intellectual originality, *Who's Your City?* moves from insights to studies to personal anecdotes, from a startling "Singles Map" of the United States to surprising data on the difference aesthetics makes to people's sense of place. A perceptive and transformative book, it is both a brilliant exploration of the fundamental importance of place and an essential guide to making what may be the most important decision of your life.

#### The Cultural Creatives CRC Press

A bestseller in hardcover, "The Cultural Creatives" explores a new subculture: people whose values embrace a curiosity and concern for the world, its ecosystem, and its peoples. 16 charts.

#### *Who's Your City?* John Wiley & Sons

One of our great urbanists and one of our great public health experts join forces to reckon with how cities are changing in the face of existential threats the pandemic has only accelerated. Cities can make us sick. They always have—diseases spread more easily when more people are close to one another. And disease is hardly the only ill that accompanies urban density. Cities have been demonized as breeding grounds for vice and crime from Sodom and Gomorrah on. But cities have flourished nonetheless because they are humanity's greatest invention, indispensable engines for creativity, innovation, wealth, and connection, the loom on which the fabric of civilization is woven.

But cities now stand at a crossroads. During the global COVID crisis, cities grew silent as people worked from home—if they could work at all. The normal forms of socializing ground to a halt. How permanent are these changes? Advances in digital technology mean that many people can opt out of city life as never before. Will they? Are we on the brink of a post-urban world? City life will survive but individual cities face terrible risks, argue Edward Glaeser and David Cutler, and a wave of urban failure would be absolutely disastrous. In terms of intimacy and inspiration, nothing can replace what cities offer. Great cities have always demanded great management, and our current crisis has exposed fearful gaps in our capacity for good governance. It is possible to drive a city into the ground, pandemic or not. Glaeser and Cutler examine the evolution that is already happening, and describe the possible futures that lie before us: What will distinguish the cities that will flourish from the ones that won't? In America, they argue, deep inequities in health care and education are a particular blight on the future of our cities; solving them will be the difference between our collective good health and a downward spiral to a much darker place.

**Living and Thriving in an Age of Isolation** Springer Science & Business Media

A compelling look at the powerful global forces that will cause billions of us to move geographically over the next decades, ushering in an era of radical change. In the 60,000 years since people began colonizing the continents, a recurring feature of human civilization has been mobility—the ever-constant search for resources and stability. Seismic global events—wars and genocides, revolutions and pandemics—have only accelerated

the process. The map of humanity isn't settled—not now, not ever. As climate change tips toward full-blown crisis, economies collapse, governments destabilize, and technology disrupts, we're entering a new age of mass migrations—one that will scatter both the dispossessed and the well-off. Which areas will people abandon and where will they resettle? Which countries will accept or reject them? As today's world population, which includes four billion restless youth, votes with their feet, what map of human geography will emerge? In *Move*, celebrated futurist Parag Khanna provides an illuminating and authoritative vision of the next phase of human civilization—one that is both mobile and sustainable. As the book explores, in the years ahead people will move people to where the resources are and technologies will flow to the people who need them, returning us to our nomadic roots while building more secure habitats. *Move* is a fascinating look at the deep trends that are shaping the most likely scenarios for the future. Most important, it guides each of us as we determine our optimal location on humanity's ever-changing map.

[How the Creative Economy Is Making Where to Live the Most Important Decision of Your Life](#) Hachette UK

In this exciting new book Angela McRobbie charts the 'euphoric' moment of the new creative economy, as it rose to prominence in the UK during the Blair years, and considers it from the perspective of contemporary experience of economic austerity and uncertainty about work and employment. McRobbie makes some bold arguments about the staging of creative economy as a mode of 'labour reform'; she proposes that the disposition of creativity is a fine-tuned instrument for acclimating the

expanded, youthful urban middle classes to a future of work without the raft of entitlements and security which previous generations had struggled to win through the post-war period of social democratic government. Adopting a cultural studies perspective, McRobbie re-considers resistance as 'line of flight' and shows what is at stake in the new politics of culture and creativity. She incisively analyses 'project working' as the embodiment of the future of work and poses the question as to how people who come together on this basis can envisage developing stronger and more protective organisations and associations. Scattered throughout the book are excerpts from interviews with artists, stylists, fashion designers, policy-makers, and social entrepreneurs.

#### **The New Urban Crisis** Professor Gusto

Over the last forty years, the human landscape of the United States has been fundamentally transformed. The metamorphosis is partially visible in the ascendance of glittering, coastal hubs for finance, infotech, and the so-called creative class. But this is only the tip of an economic iceberg, the bulk of which lies in the darkness of the declining heartland or on the dimly lit fringe of sprawling cities. This is America's hinterland, populated by towering grain threshers and hunched farmworkers, where laborers drawn from every corner of the world crowd into factories and "fulfillment centers" and where cold storage trailers are filled with fentanyl-bloated corpses when the morgues cannot contain the dead. Urgent and unsparing, this book opens our eyes to America's new heart of darkness. Driven by an ever-expanding socioeconomic crisis, America's class structure is recomposing itself in new geographies of race, poverty, and

production. The center has fallen. Riots ricochet from city to city led by no one in particular. Anarchists smash financial centers as a resurgent far right builds power in the countryside. Drawing on his direct experience of recent popular unrest, from the Occupy movement to the wave of riots and blockades that began in Ferguson, Missouri, Phil A. Neel provides a close-up view of this landscape in all its grim but captivating detail. Inaugurating the new Field Notes series, published in association with the Brooklyn Rail, Neel's book tells the intimate story of a life lived within America's hinterland.

*Digital Nomads* Grand Central Publishing

Richard Florida outlines how certain cities succeed in attracting members of the 'creative class' - the key economic growth asset - and argues that, in order to prosper, cities must harness this creative potential.

*Cities and the Creative Class* Routledge

Research-driven and clearly written, bestselling economist Richard Florida addresses the growing alarm about the exodus of high-value jobs from the USA. Today's most valued workers are what economist Richard Florida calls the Creative Class. In his bestselling *The Rise of the Creative Class*, Florida identified these variously skilled individuals as the source of economic revitalisation in US cities. In that book, he shows that investment in technology and a civic culture of tolerance (most often marked by the presence of a large gay community) are the key ingredients to attracting and maintaining a local creative class. In *The Flight of the Creative Class*, Florida expands his research to cover the global competition to attract the Creative Class. The USA once led the world in terms of creative capital. Since 2002,

factors like the Bush administration's emphasis on smokestack industries, heightened security concerns after 9/11 and the growing cultural divide between conservatives and liberals have put the US at a large disadvantage. With numerous small countries, such as Ireland, New Zealand and Finland, now tapping into the enormous economic value of this class – and doing all in their power to attract these workers and build a robust economy driven by creative capital – how much further behind will USA fall?

Barrio America Simon and Schuster

NATIONAL BOOK AWARD FINALIST • NATIONAL BESTSELLER • A twisting, haunting true-life murder mystery about one of the most monstrous crimes in American history, from the author of *The Lost City of Z*. In the 1920s, the richest people per capita in the world were members of the Osage Nation in Oklahoma. After oil was discovered beneath their land, the Osage rode in chauffeured automobiles, built mansions, and sent their children to study in Europe. Then, one by one, the Osage began to be killed off. The family of an Osage woman, Mollie Burkhart, became a prime target. One of her relatives was shot. Another was poisoned. And it was just the beginning, as more and more Osage were dying under mysterious circumstances, and many of those who dared to investigate the killings were themselves

murdered. As the death toll rose, the newly created FBI took up the case, and the young director, J. Edgar Hoover, turned to a former Texas Ranger named Tom White to try to unravel the mystery. White put together an undercover team, including a Native American agent who infiltrated the region, and together with the Osage began to expose one of the most chilling conspiracies in American history.

*Hinterland* Princeton University Press

"Richard Florida offers a brilliant assessment of the varied and evolving challenges facing our cities today.... *The New Urban Crisis* is essential reading for urban leaders and all city-dwellers."

--Richard M. Daley, former mayor of Chicago  
In *The New Urban Crisis*, Richard Florida demonstrates how the forces that drive urban growth also generate cities' challenges, such as gentrification, segregation, and inequality. We must rebuild cities and suburbs by empowering them to address their challenges. *The New Urban Crisis* offers a compelling diagnosis of our economic ills and a bold prescription for more inclusive cities capable of ensuring prosperity for all.

How New Ways of Living and Working Drive Post-Crash Prosperity  
Harper Collins

The whole landscape of research in urban studies was revolutionized by the publication of Richard Florida's *The Rise of the Creative Class* in 2002, and his subsequent book entitled *The Flight of the Creative Class* has helped to maintain a decade-long explosion of interest in the field. While these two books examine the creative class in the context of the United States, research has emerged which investigates the creative class worldwide. This book brings together detailed studies of the creative class in

cities across the globe, examining the impact of the creative class on growth and development. The countries covered include the United Kingdom, the Netherlands, Germany, Australia, China, Japan and Canada, in addition to the United States. Taken together, the contributions deepen our understanding of the creative class and the various factors that affect regional development, highlighting the similarities and differences between the creative class and economic development across countries. This book will be of great interest to scholars of economic geography, regional economics, urban sociology and cultural policy, as well as policy makers involved in urban development.

Leoni, the man considered to be the "father" of the Black Hawk, explains how Sikorsky Aircraft used innovative designs with the right advanced technologies to meet the Army's stringent specifications for aircraft performance, survivability, and reliability.

**Flight of the Puffin** Routledge

Spengler's work describes how we have entered into a centuries-long "world-historical" phase comparable to late antiquity, and

his controversial ideas spark debate over the meaning of historiography.

An Oral History as Told by Jon Stewart, the Correspondents, Staff and Guests Simon and Schuster

The compelling history of how Latino immigrants revitalized the nation's cities after decades of disinvestment and white flight. Thirty years ago, most people were ready to give up on American cities. We are commonly told that it was a "creative class" of young professionals who revived a moribund urban America in the 1990s and 2000s. But this stunning reversal owes much more to another, far less visible group: Latino and Latina newcomers. Award-winning historian A. K. Sandoval-Strausz reveals this history by focusing on two barrios: Chicago's Little Village and Dallas's Oak Cliff. These neighborhoods lost residents and jobs for decades before Latin American immigration turned them around beginning in the 1970s. As Sandoval-Strausz shows, Latinos made cities dynamic, stable, and safe by purchasing homes, opening businesses, and reviving street life. Barrio America uses vivid oral histories and detailed statistics to show how the great Latino migrations transformed America for the better.

The New Global Competition for Talent Simon and Schuster

"Our cities drive innovation and growth, but they also propel us into housing crises and give rise to ever-greater inequality, as the super-rich displace the well-off and the workers who run our essential services are ghettoised and pushed out to the suburbs. There is a new urban crisis, and it is undermining the foundations of our society. In this bracingly original work of research and analysis, leading urbanist Richard Florida demonstrates how our cities are evolving in the twenty-first century, for good and for ill.

From the world's superstar metropolises to the urban slums of the developing world, he shows how the crisis touches all of us, and sets out how we can make our cities more inclusive, ensuring prosperity for all"--Provided by publisher.

**Streetfight** Vintage

For the first time, the United States is in danger of losing its most crucial economic advantage--its status as the world's greatest talent magnet, argues economist Florida. Where America was once the first destination for foreign students and the last stop for scientists, engineers, artists and entrepreneurs wishing to engage in the most robust and creative economy on the planet, it has now become only one place among many where cutting-edge innovation occurs. Burgeoning global technology hotspots, from Sydney, Shanghai, and Amsterdam to Dublin, Bangalore, and Toronto; the outsourcing of ingenuity; rising intolerance; a faltering education system; cities torn by inequality; disconnected political leadership--all point to the looming creativity crisis that is causing the decline of American economic might. But if the United States can discover solutions to address these problems, it will once again lead the pack. If only the rest of the world doesn't discover those solutions first ...

Move Oxford University Press, USA

..".In the end, all your legends, your fables, your fantasies, they

are all one story. One tale told by different tellers. One song sung by different singers. And all of them are a lie, born to hide a greater truth. Just as this one will become, when your part in it is done." It's the first day of summer. No alarm clocks. No school. No homework. After nine long months of unrelenting torture, Milo can finally do what he's been dreaming of all year... absolutely nothing. With his door closed and his room dark, Milo can finally shut out the noise and hide from the world. Unfortunately for Milo, the world has other plans for him. As lonely and disconnected Milo Wolfe embarks on an unexpected journey to find a father he's never met, Milo will learn that nothing in his world is as it appears. And no one can be trusted, not the dead Russian wizard who dominates his dreams, not the mysterious green-eyed teen who seems to be stalking him, not even himself. Described as, "A subversively comic, action packed, quirky, coming of age, paranormal, science fiction, fantasy adventure for young adults and adults who still think of themselves as young adults," Douglas Lieblein, one of the writers and Executive Producers of Hannah Montana and Life With Boys, has created a debut novel full of unorthodox adventures, shocking surprises and a controversial hypothesis regarding humanity's symbiotic relationship with myth and the supernatural. If you're a fan of the Artemis Fowl series, read it again. It's really good. Then after you're done, if you've got nothing to do, read this book.
