 In this engaging and
 spirited book, eminent
 social psychologist Robert
 Levine asks us to explore
 a dimension of our
 experience that we take
 for granted—our
 perception of time. When
 we travel to a different
 country, or even a
 different city in the United
 States, we assume that a
 certain amount of cultural
 adjustment will be
 required, whether it's
 getting used to new food
 or negotiating a foreign
 language, adapting to a
 different standard of living
 or another currency. In
 fact, what contributes
 most to our sense of

disorientation is having to
 adapt to another culture's
 sense of time. Levine, who
 has devoted his career to
 studying time and the
 pace of life, takes us on
 an enchanting tour of
 time through the ages
 and around the world. As
 he recounts his unique
 experiences with humor
 and deep insight, we
 travel with him to Brazil,
 where to be three hours
 late is perfectly
 acceptable, and to Japan,
 where he finds a sense of
 the long-term that is
 unheard of in the West.
 We visit communities in
 the United States and find
 that population size
 affects the pace of
 life—and even the pace of
 walking. We travel back in
 time to ancient Greece to
 examine early clocks and
 sundials, then move
 forward through the
 centuries to the
 beginnings of "clock time"
 during the Industrial
 Revolution. We learn that
 there are places in the
 world today where people
 still live according to
 "nature time," the rhythm
 of the sun and the
 seasons, and "event
 time," the structuring of
 time around
 happenings(when you
 want to make a late
 appointment in Burundi,
 you say, "I'll see you
 when the cows come

in"). Levine raises some
 fascinating questions.
 How do we use our time?
 Are we being ruled by the
 clock? What is this doing
 to our cities? To our
 relationships? To our own
 bodies and psyches? Are
 there decisions we have
 made without conscious
 choice? Alternative
 tempos we might prefer?
 Perhaps, Levine argues,
 our goal should be to try
 to live in a
 "multitemporal" society,
 one in which we learn to
 move back and forth
 among nature time, event
 time, and clock time. In
 other words, each of us
 must chart our own
 geography of time. If we
 can do that, we will have
 achieved temporal
 prosperity.

Madman, tyrant, animal—history has given Adolf Hitler many names. In *Mein Kampf* (My Struggle), often called the Nazi bible, Hitler describes his life, frustrations, ideals, and dreams. Born to an impoverished couple in a small town in Austria, the young Adolf grew up with the fervent desire to become a painter. The death of his parents and outright rejection from art schools in Vienna forced him into underpaid work as a laborer. During the First World War, Hitler served in the infantry and was decorated for bravery. After the war, he became actively involved with socialist political groups and quickly rose to power, establishing himself as Chairman of the National Socialist German Worker's party. In 1924, Hitler led a coalition of nationalist groups in a bid to overthrow the Bavarian government in Munich. The infamous Munich "Beer-hall putsch" was unsuccessful, and Hitler was arrested. During the nine months

he was in prison, an embittered and frustrated Hitler dictated a personal manifesto to his loyal follower Rudolph Hess. He vented his sentiments against communism and the Jewish people in this document, which was to become *Mein Kampf*, the controversial book that is seen as the blue-print for Hitler's political and military campaign. In *Mein Kampf*, Hitler describes his strategy for rebuilding Germany and conquering Europe. It is a glimpse into the mind of a man who destabilized world peace and pursued the genocide now known as the Holocaust.

Russel Middlebrook is convinced he's the only gay kid at Goodkind High School. Then his online gay chat buddy turns out to be none other than Kevin, the popular but closeted star of the school's baseball team. Soon Russel meets other

gay students, too. There's his best friend Min, who reveals that she is bisexual, and her soccer-playing girlfriend Terese. Then there's Terese's politically active friend, Ike. But how can kids this diverse get together without drawing attention to themselves? "We just choose a club that's so boring, nobody in their right mind would ever in a million years join it. We could call it Geography Club!" Brent Hartinger's debut novel, what became first of a series about Russel Middlebrook, is a fast-paced, funny, and trenchant portrait of contemporary teenagers who may not learn any actual geography in their latest club, but who learn plenty about the treacherous social terrain of high school and the even more dangerous landscape of the human heart.

As in previous editions, this seventh edition is based on the assumption that, rather than just a mere add-on, "content literacy is integral to every discipline and special subject area, to the teachable moments that make less stellar ones tolerable, and, most important, to each student's motivation and engagement with learning." The ideas the authors present are backed by research, tested in real classrooms, and designed to help teachers apply what is useful to their own particular disciplines.
