HOWARD BRADLEY

Braddom's Physical Medicine and Rehabilitation E-Book

Elsevier Health Sciences
Interprofessional
Rehabilitation: a Person-
Centred Approach is a
concise and readable
introduction to the
principles and practice of
a person-centred
interprofessional
approach to rehabilitation,
based upon a firm
scientific evidence base.
Written by a multi-
contributor team of
specialists in
physiotherapy,
occupational therapy,
nursing, psychology and
rehabilitation medicine,
this text draws together
common themes that cut
across the different
professional groups and
the spectrum of health
conditions requiring
rehabilitation, and sets
out a model of practice
that is tailored to the
specific needs of the

client. Showing
interprofessionalism at
work in a range of clinical
contexts, the book argues
that effective
rehabilitation is best
conducted by well-
integrated teams of
specialists working in an
interdisciplinary way, with
the client or patient
actively involved in all
stages of the process.
This book will be essential
reading for students
preparing for practice in
an increasingly
interprofessional
environment, and will be
of interest to any health
care practitioner keen to
understand how an
integrated approach to
rehabilitation can benefit
their clients.

Achieve the best
functional outcomes for
your patients. Here is a
practical, step-by-step
guide to understanding
the treatment process
and selecting the most
appropriate interventions
for your patients.
Superbly illustrated, in-
depth coverage shows

you how to identify
functional deficits,
determine what
treatments are
appropriate, and then
implement them to
achieve the best
functional outcome for
your patients. Learn
through reading, seeing,
and doing. Seventeen
case studies in the text
correspond to seventeen
videotaped case studies
with voice-over narration

These videos show you
how practicing therapists
interact with their clients
in rehabilitation
settings...from sample
elements of the initial
examination through the
interventions to the
functional outcomes...to
make a difference in
patients' lives.

Geriatric Rehabilitation
Springer Publishing
Company
This book will help all
health professionals
involved in the
rehabilitation of older
people to provide their
patients with the highest
possible quality of life and
autonomy. Expanded and
rewritten by a diverse
team of authors, the text
is suitable for doctors in

all specialties that see older patients, as well as nurses, physiotherapists, occupational therapists, psychologists, dietitians, speech and language therapists/pathologists, physician associates/assistants, healthcare assistants, and many others including patients, family members and students. The book is written in an accessible, no-jargon style and provides a patient-centred perspective on recent advances in the field of rehabilitation – an increasingly important aspect of care for older people. Clear explanations of relevant concepts: ageing, frailty, comprehensive assessment, rehabilitation. Broad coverage of all aspects of rehabilitation including different settings. Explanations of input from multiple health professionals. Problem-based section that highlights solutions to common issues during rehabilitation. Specialty-specific areas of rehabilitation such as stroke rehabilitation, cancer rehabilitation, post-operative rehabilitation, trauma, rehabilitation in the community. Practical section explaining how to plan discharge safely, run

a care planning meeting, organize home supports, continue rehabilitation at home. Evidence-based but accessible writing, complemented by practical clinical wisdom. Aimed at a broader audience – applicable to all health professionals who see older patients. Resources for patients and their caregivers. Multiple-choice questions to test knowledge. *Rehabilitation of the Hand and Upper Extremity*. Elsevier Health Sciences. Named a Doody's Core Title in 2012 and 2013! Widely acknowledged as the cornerstone reference in the field, *Pediatric Rehabilitation* brings together renowned specialists from all sectors of the pediatric rehabilitation community to provide the most current and comprehensive information available. The fifth edition has been substantially updated and expanded with evidence-based discussions of new theories, therapies, interventions, research findings, and controversies. Five completely new chapters focus on such emerging areas as the use of ultrasound to guide motor point and nerve injections, rehabilitation of chronic

pain and conversion disorders, management of concussions, sports injuries, and neurodegenerative and demyelinating diseases in children. This edition also addresses important new directions in genetic markers and tests, cognitive, developmental, and neuropsychological assessment, and rehabilitation for common genetic conditions. Additionally, several new contributors provide fresh perspectives to the voices of established leaders in the field. The text covers all aspects of pediatric rehabilitation medicine from basic examination and testing to electrodiagnosis, therapeutic exercise, orthotics and assistive devices, gait labs, aging with pediatric onset disability, and in-depth clinical management of the full range of childhood disabilities and injuries. "Pearls and Perils" featured throughout the book underscore crucial information, and illustrations, summary tables, information boxes, and lists contribute to the text's abundant clinical utility. New to the Fifth Edition: Every chapter has been thoroughly revised and expanded to reflect current thinking and

practice Evidence-based discussions of new theories, therapies, interventions, research findings, and areas of controversy Five entirely new chapters illuminating emerging areas: rehabilitation of chronic pain and conversion disorders, ultrasound-guided injections, concussion management, sports injuries, and neurodegenerative and demyelinating diseases in children

Physical Rehabilitation - E-Book Lippincott Williams & Wilkins
Physical Medicine and Rehabilitation Oral Board Review is the first publication devoted to preparing for the ABPMR Part II certification examination. This interactive workbook contains 68 cases drawn from all major topic areas identified on the oral exam outline. The vignettes set up common physiatric problems and are structured to walk you through the types of questions you will encounter and frame

meaningful responses to real-life scenarios. Cases are formatted to simulate a discussion between an examiner and examinee, presenting a focused approach that directs the candidate to the most appropriate answers. Each case contains questions covering the five clinical skills measured on the oral boards: data acquisition, problem solving, patient management, systems-based practice, and interpersonal communication skills and professionalism. Using a question and response format that actively engages readers, the book is designed to foster a systematic approach to clinical questions that can be applied to any case so you can think on your feet, understand the goal of the prompts, and respond effectively--whether in an exam situation, or at the bedside. Key Features Structured to help build skills and confidence necessary for success on the PM&R oral board exam (Part II) Representative case scenarios cover all diagnostic categories; every case contains questions corresponding to the 5 clinical competencies measured

on the exam Unique interactive format with conversational question and answer vignettes for individual or group study Expert authors from many of the leading national programs Includes downloadable ebook for anytime access on mobile devices
