MONTGOMERY BARKER

Tender is the Night (□□□) University of Chicago Press
Winner of the International Lannan Literary Award for Nonfiction
Animal tracks, word magic, the speech of stones, the power of letters, and the taste of the wind all figure prominently in this intellectual tour de force that returns us to our senses and to the sensuous terrain that sustains us. This major work of ecological philosophy startles the senses out of habitual ways of perception. For a thousand generations, human beings viewed themselves as part of the wider community of nature, and they carried on active relationships not only with other people with other animals, plants, and natural objects (including mountains, rivers, winds,

and weather patters) that we have only lately come to think of as "inanimate." How, then, did humans come to sever their ancient reciprocity with the natural world? What will it take for us to recover a sustaining relation with the breathing earth? In *The Spell of the Sensuous* David Abram draws on sources as diverse as the philosophy of Merleau-Ponty, Balinese shamanism, Apache storytelling, and his own experience as an accomplished sleight-of-hand of magician to reveal the subtle dependence of human cognition on the natural environment. He explores the character of perception and excavates the sensual foundations of language, which--even at its most abstract--echoes the calls and cries of the earth. On every page of this lyrical work, Abram weaves his arguments with a passion, a precision, and an intellectual daring that recall such writers as Loren Eiseley, Annie Dillard, and Barry Lopez.

This book offers a highly accessible introduction to natural language processing, the field that supports a variety of language technologies, from predictive text and email filtering to automatic summarization and translation. With it, you'll learn how to write Python programs that work with large collections of unstructured text. You'll access richly annotated datasets using a comprehensive range of linguistic data structures, and you'll understand the main algorithms for analyzing the content and structure of written communication. Packed with examples and exercises, *Natural Language Processing with Python* will help you: Extract information from unstructured text, either to guess the topic or identify "named entities" Analyze linguistic structure in text, including parsing and semantic analysis Access popular linguistic databases, including WordNet and treebanks Integrate techniques drawn from fields as diverse as linguistics and artificial intelligence This book will help you gain practical skills in natural language processing using the Python programming language and the Natural Language Toolkit (NLTK) open source library. If you're interested in developing web applications, analyzing multilingual news sources, or documenting endangered languages -- or if you're simply curious to have a programmer's perspective on how human language works -- you'll find *Natural Language Processing with Python* both fascinating and immensely useful.

Music moves through time; it is not static. In order to appreciate music we must remember what sounds happened, and anticipate what sounds might come next. This book takes you on a journey of music from past to present, from the Middle Ages to the Baroque Period to the 20th century and beyond!

The New Public Diplomacy IBM Redbooks

The Control Agenda is a sweeping account of the history of the Strategic Arms Limitation Talks (SALT), their rise in the Nixon and Ford administrations, their downfall under President Carter, and their powerful legacies in the Reagan years and beyond. Matthew Ambrose pays close attention to the interplay of diplomacy, domestic politics, and technology, and finds that the SALT process was a key point of reference for arguments regarding all forms of Cold War decision making. Ambrose argues elite U.S.

decision makers used SALT to better manage their restive domestic populations and to exert greater control over the shape, structure, and direction of their nuclear arsenals. Ambrose also asserts that prolonged engagement with arms control issues introduced dynamic effects into nuclear policy. Arms control considerations came to influence most areas of defense decision making, while the measure of stability SALT provided allowed the examination of new and potentially dangerous nuclear doctrines. The Control Agenda makes clear that verification and compliance concerns by the United States prompted continuous reassessments of Soviet capabilities and intentions; assessments that later undergirded key U.S. policy changes toward the Soviet Union. Through SALT's many twists and turns, accusations and countercharges, secret backchannels and propaganda campaigns the specter of nuclear conflict loomed large.

This work is a comprehensive study of the field. It provides an entry point to the novice willing to move in the research field reconfigurable computing, FPGA and system on programmable chip design. The book can also be used as teaching reference for

a graduate course in computer engineering, or as reference to advance electrical and computer engineers. It provides a very strong theoretical and practical background to the field, from the early Estrin's machine to the very modern architecture such as embedded logic devices.

This is really two books in one: a valuable reference resource, and a groundbreaking case study that represents a new approach to constructional semantics. It presents a detailed descriptive survey, using extensive examples collected from the Internet, of German verb constructions in which the expressions *durch* ('through'), *über* ('over'), *unter* ('under'), and *um* ('around') occur either as inseparable verb prefixes or as separable verb particles. Based on that evidence, the author argues that the prefixed verb constructions and particle verb constructions themselves have meaning, and that this meaning involves subjective construal processes rather than objective information. The constructions prompt us to distribute focal attention according to patterns that can be articulated in terms of Talmy's notion of "perspectival modes". Among the other topics that play an important role in the analysis are incremental themes, reflexive trajectors, fictive motion, "multi-directional paths", and "accusative landmarks". Macmillan

Swantje Hadelers untersucht, ob und in welcher Weise die Merkmale „Leistungsanforderungen und Anspruchsniveau“ sowie „Differenzierung“, die in der Schul- und Unterrichtsforschung als Charakteristika wirksamer Schulen gelten, in der Lern- und Förderumwelt von privaten Grundschulen umgesetzt und wie sie von SchülerInnen im Schulalltag wahrgenommen werden. Die umfangreiche Datenbasis der Analysen stammt aus einer ethnografischen Vertiefungsstudie des Projekts PERLE (PERSönlichkeits- und LERNentwicklung von Grundschulkindern), die im dritten und vierten Schuljahr in zwei Klassen an zwei Schulen durchgeführt wurde. Zusammenfassend zeigen die Ergebnisse, dass beide Aspekte auf schulischer und unterrichtlicher Ebene vielseitig realisiert werden, sich dabei zwischen den Schulen neben Gemeinsamkeiten allerdings auch Unterschiede zeigen. Auch die SchülerInnen nehmen die Aspekte ebenso vergleichbar wie unterschiedlich wahr.

Road Safety Annual Report 2015 Henry Holt and Company

"It used to be," soon-to-be secretary of state Madeleine K. Albright said in 1996, "that the only way a woman could truly make her foreign policy views felt was by marrying a diplomat and then pouring tea on an offending ambassador's lap." This

world of US diplomacy excluded women for a variety of misguided reasons: they would let their emotions interfere with the task of diplomacy, they were not up to the deadly risks that could arise overseas, and they would be unable to cultivate the social contacts vital to success in the field. The men of the State Department objected but had to admit women, including the first female ambassadors: Ruth Bryan Owen, Florence "Daisy" Harriman, Perle Mesta, Eugenie Anderson, Clare Boothe Luce, and Frances Willis. These were among the most influential women in US foreign relations in their era. Using newly available archival sources, Philip Nash examines the history of the "Big Six" and how they carved out their rightful place in history. After a chapter capturing the male world of American diplomacy in the early twentieth century, the book devotes one chapter to each of the female ambassadors and delves into a number of topics, including their backgrounds and appointments, the issues they faced while on the job, how they were received by host countries, the complications of protocol, and the press coverage they received, which was paradoxically favorable yet deeply sexist. In an epilogue that also provides an overview of the role of women in modern US diplomacy, Nash reveals how these trailblazers helped pave the way for more gender parity in US foreign relations.

 Finalist for the Council on Foreign Relations Arthur Ross Book Award
 One of the world's foremost authorities on the subject of suicide terrorism, the esteemed political scientist Robert Pape has created the first comprehensive database of every suicide terrorist attack in the world from 1980 until today. In *Dying to Win*, Pape provides a groundbreaking demographic profile of modern suicide terrorist

attackers—and his findings offer a powerful counterpoint to what we now accept as conventional wisdom on the topic. He also examines the early practitioners of this guerrilla tactic, including the ancient Jewish Zealots, who in A.D. 66 wished to liberate themselves from Roman occupation; the Ismaili Assassins, a Shi'ite Muslim sect in northern Iran in the eleventh and twelfth centuries; World War II's Japanese kamikaze pilots, three thousand of whom crashed into U.S. naval vessels; and the Tamil Tigers in Sri Lanka, a secular, Marxist-Leninist organization responsible for more suicide terrorist attacks than any other group in history. *Dying to Win* is a startling work of analysis grounded in fact, not politics, that recommends concrete ways for states to fight and prevent terrorist attacks now. Transcending speculation with systematic scholarship, this is one of the most important studies of the terrorist threat to the United States and its allies since 9/11. "Invaluable . . . gives Americans an urgently needed basis for devising a strategy to defeat Osama bin Laden and other Islamist militants." –Michael Scheuer, author of *Imperial Hubris* "Provocative . . . Pape wants to change the way you think about suicide bombings and explain why they are on the rise." –Henry Schuster, CNN.com "Enlightening . . . sheds interesting light on a phenomenon often mistakenly believed to be restricted to the Middle East." –The Washington Post Book World "Brilliant." –Peter Bergen, author of *Holy War, Inc.*
