Making the right choice of A levels is crucial. Not only will it affect your enjoyment of studying over the next two years but it also has implications for your choice of career, further training or higher education options. The tenth edition of this student-friendly guide has been revised and updated and includes study and employment options after 16 as well as at

degree level. It also contains information on apprenticeships, an increasingly popular alternative to full-time higher education. Each subject entry covers: - What and how you study - Which A levels fit well together for competitive courses and careers - Related higher education courses - Career and training options after A levels and degree courses - Alternative qualifications such as the International Baccalaureate.

*GCSE Edexcel Additional Science Foundation Success Workbook* Hodder Education

A student-friendly and engaging resource for the 2016 Edexcel GCSE Geography B specification, this brand new course is written to match the demands of the specification. As well as providing thorough and rigorous coverage of the spec, this book is designed to engage students in their learning and to motivate them to progress.

Plan and manage a successful revision programme using the topic-by-topic planner

Enjoy an interactive approach to revision, with clear topic summaries that consolidate knowledge and related activities that put the content into context

Build, practise and enhance exam skills by progressing through activities set at different levels

Improve exam technique through exam-style questions and sample answers with commentary

Get exam

ready with extra quick quizzes and answers to the activities available online. This revision guide covers the following options:

[Nelson Modular Science CGP GCSE Combined Science 9-1 Revision](#)

There are two key questions at the heart of the ongoing debate about education and training for all young people, irrespective of background, ability or attainment: What counts as an educated 19 year old today? Are the models of education we have inherited from the past sufficient to meet the needs of all young people, as well as the social and economic needs of the wider community? Education for All addresses these questions in the light of evidence collected over five years by the Nuffield Review of 14-19 Education and Training: the most rigorous investigation of every aspect of this key educational phase for decades. Written by the co-directors of the Nuffield Review,

Education for All provides a critical, comprehensive and thoroughly readable overview of 14-19 education and training and makes suggestions for the kind of education and training that should be provided over the coming decade and beyond. The authors acknowledge that much has been achieved by the respective governments – massive investment in resources; closer collaboration between schools, colleges, training providers, voluntary agencies and employers; recognition and promotion of a wider range of qualifications. They are also optimistic about the good things that are going on in many secondary classrooms – enormous amounts of creativity; courageous efforts to meet problems; a deep concern and caring for many young people otherwise deprived of hope and opportunity. But they argue for a radical reshaping of the future in the light of a

broader vision of education – a greater respect for more practical and active learning; a system of assessment which supports rather than impoverishes learning; respect for the professional expertise of the teacher; a more unified system of qualifications ensuring progression into higher education and employment; the creation of strongly collaborative and local learning systems; and a more reflective and participative approach to policy. Education for All should be read by everyone working in – or with an interest in – secondary-level education in England and Wales and beyond.
