Forty very short stories that reimagine the genre of crime writing from some of today's most imaginative and thrilling writers "An intriguing take on crime/noir writing, this collection of 40 very short stories by leading and emerging literary voices—Amelia Gray, Brian Evenson, Elizabeth Hand, Carmen Maria Machado, Benjamin Percy, Laura van den Berg and more—investigates crimes both real and imagined. Despite their diminutive size, these tales promise to pack a punch." —Chicago Tribune, 1 of 25 Hot Books for Summer Tiny Crimes gathers leading and emerging

literary voices to tell tales of villainy and intrigue in only a few hundred words. From the most hard-boiled of noirs to the coziest of mysteries, with diminutive double crosses, miniature murders, and crimes both real and imagined, *Tiny Crimes* rounds up all the usual suspects, and some unusual suspects, too. With illustrations by Wesley Allsbrook and flash fiction by Carmen Maria Machado, Benjamin Percy, Amelia Gray, Adam Sternbergh, Yuri Herrera, Julia Elliott, Elizabeth Hand, Brian Evenson, Charles Yu, Laura van den Berg, and more, *Tiny Crimes* scours the underbelly of modern life to expose the criminal, the illegal, and the depraved.

Rising young comedian Moshe Kasher is lucky to be alive. He started using drugs when he was just 12. At that point, he had already been in psychoanalysis for 8 years. By the time he was 15, he had been in and out of several mental institutions, drifting from therapy to rehab to arrest to...you get the picture. But *KASHER IN THE RYE* is not an "eye opener" to the horrors of addiction. It's a hilarious memoir about the absurdity of it all. When he was a young boy, Kasher's mother took him on a vacation to the West Coast. Well it was more like an abduction. Only not officially. She stole them away from their father and they moved to Oakland, California. That's where the real fun begins, in the war zone of Oakland Public Schools. He was more than just out of control-his mother walked him around on a leash, which he chewed through and ran away. Those early years read like part Augusten Burroughs, part David Sedaris, with a touch of Jim Carrol...but a lot more Jewish. In fact, Kasher later spends time in a Brooklyn Hasidic community. Then came addiction... Brutally honest and laugh-out-loud funny, Kasher's first literary endeavor finds humor in even the most horrifying situations.

For some time Japan has been under fire for adjusting too slowly to new realities. While this criticism may be valid on some levels, Japan has been transforming in tandem with both regional and global forces. However, these changes have been largely overshadowed by the immense changes in Asia; including the rise of China, the 1997 Southeast Asian financial crisis and North Korea's development of nuclear weapons. Has Japan, the world's second largest economy, only been muddling through? In this volume the contributors show that although the challenges faced are great, Japan is changing in areas ranging from political leadership, education policy, official development assistance, peace building and security, to defence production, business associations and innovation policy. The book analyses processes of change, focusing on the dynamics of change - rather than structural change or institutional change per se - from four levels: the individual, domestic, regional and global. Forces from outside Japan, such as a changing world order and changes in power relationships in Asia, have driven change along with pressures emerging within Japan, such as the increasing power of public opinion and competitiveness within markets. This book will be of interest to scholars and students of Japanese and Asian Studies, Politics, International Relations, Globalization, Business and Economics.

Pattern recognition is the extraction of consistent information from noisy spatiotemporal data. It can be and is currently being used in systems for battlefield supervision, smart weapons, and

anti-counterfeiting of all kinds. A current application is the automatic detection of land mines and unexploded ordnance. (UXO). The methods employed can be subdivided in the following manner: (1) statistical methods, (2) neuro - methods, (3) fuzzy - methods, and (4) neuro fuzzy methods. Each of these methods has its special advantages and drawbacks, but all of them require the computation of feature variables from measurement or simulation data, e.g. from microwave backscattering. The Lecture series covers the following topics: (1) Introductory overview on pattern recognition techniques, (1) - (4); (2) Feature extraction for pattern recognition by; (a) Electromagnetic, magnetic, and acoustic singularity identification; (b) Model based scattering signatures; (c) Wavelet techniques; (d) SAR/ISAR imaging; (e) Bistatic microwave imaging; and (f) Electromagnetic inversion techniques; (3) Real-time implementation of pattern recognition methods; and (4) Introduction to software and hardware for pattern recognition.

Ambrose Bukowski is a twelve-year-old with a talent for mismatching his clothes, for saying the wrong thing at the worst possible time, and for words. In short, he's a self-described nerd. Making friends is especially hard because he and his overprotective mother, Irene, have had to move so often. And when bullies at his latest school almost kill him by deliberately slipping a peanut into his sandwich to set off his allergy, it's his mother who has the extreme reaction. From now on, Ambrose has to be home-schooled. Then Ambrose strikes up an unlikely friendship with the landlord's son, Cosmo, an ex-con who's been in prison. They have nothing in common except for Scrabble. But a small deception grows out of control when Ambrose convinces a reluctant Cosmo to take him to a Scrabble club. Could this spell disaster for Ambrose?

Fed up, frustrated and fast approaching forty, Charlie Simpson hasn't had many high points in her life just lately. The only peak on the horizon is her ambition to climb Everest, if she could only get organised and save up the cash. Unfortunately, though, she has more pressing things to deal with; her eldest son moving out, her father moving in, and her best friend moving two hundred miles away. She finds solace, however, via her newly acquired modem, when she stumbles upon a stranger who's a like-minded soul. Like-minded, perhaps, but no fantasy dream date. Though virtual, he's of the real-life variety - he may be a hero, but he has a wife. Charlie hasn't got a husband, but she certainly has principles, and they're about to be hauled up a mountain themselves. And, of course, her mum's always said she shouldn't talk to strangers. The question is, is now the time to start breaking the rules? 'A fantastic book that gets you hooked from the first page' *New Woman* 'It's wonderfully funny and rather inspiring...I enjoyed it hugely and I confess I read it all in one go, wolfing it down like a delicious box of chocolates' *Judy Astley* 'A charming and optimistic novel about modern love' - *Hello Magazine* 'A laugh out loud read' - *Real magazine* 'I absolutely loved it - hooray for Julia! this is funny, original, well-written and unguessable - I had no idea how it would end. It also has the very best closing paragraph I've read in years. Completely wonderful, dazzlingly entertaining, unputdownable' *Jill Mansell*

In *Learning with Information Systems* the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.

Every organization strives to develop fully engaged employees who connect their own learning to the success of the organization. *"Corporate Learning Strategies"* offers its readers a roadmap to building organizational structures that encourage and cultivate this powerful idea of employee growth. The roadmap to this transformation is embodied in a return-on-learning-investment (ROLI) model that aligns organizational and employee roles and expectations of success. By implementing the ROLI concept, organizations develop employees with improved job employability, satisfaction, enhancement, enrichment, and commitment. The organization's return on its human capital investment includes gains in performance, increased compliance, higher retention, greater employee ownership, and ultimately greater business unit success. Learning and performance professionals who wish to build a comprehensive, organization-wide learning strategy will find great value implementing the principles contained in this book.

-Padma Shri and late Hindi author Shivani's memoirs of studying at the experimental school set up by Rabindranath Tagore. -A rare view and stories of life inside the Ashram, of how the students' intimate relationships and interactions with Tagore and other towering personalities shaped them. -Includes tributes to other iconic personalities who called Shantiniketan their home, such as Satyajit Ray and Pandit Hajari Prasad Dwivedi. -Written with such warmth and filled with laughter, this book can be

enjoyed by both adults and children. -Translated into English for the first time by Ira Pande, the author's daughter and Sahitya Akademi winner for her translation of Manohar Shyam Joshi's *T'ta* Professor This charming memoir is a loving homage to a grand institution and its legendary gurus. Written from the perspective of a child and young girl, it retains the freshness and innocence of an age when experimental education was not merely a trendy movement. Shivani's vivid pictures of the Ashram and portraits of her teachers and fellow students remain as alive as they seemed when she first wrote this memoir nearly fifty years ago. Along with the moving tributes she wrote when some of her beloved contemporaries passed away, this slim memoir is a sort of diptych that captures the spirit of the Ashram and the liveliness of its inmates, many of whom went on to become iconic Indians. Shivani's recall of her time there takes the reader into an enchanted garden that remains as inspirational to her as it was when she went there all the way from Kumaon a lifetime ago.

This book is an intellectual history that uses Amílcar Cabral's theory of the "return to the source," to examine Sol Plaatje's *Mhudi*, B.W. Vilakazi's poetry, and A.C. Jordan's *The Wrath of the Ancestors* within the broader context of African cultural nationalisms in the early twentieth century African Atlantic World. It shows the development of the idea of African equality with Whites in the face of prevailing ideas of White supremacy during Union-era South Africa. These authors were part of the New African Movement, which was one of eight literary movements among Africans and peoples of African descent in the Americas between 1915 and 1945, including the Harlem Renaissance, *Négritude*, *Claridade* in Cape Verde, and similar movements in Cuba, Haiti, Brazil, and Belize. The text presents new models for interpreting Union-era African literature, and recasts understanding of the nature of interactions between Africans and Europeans, including Western Syphilization, Chiral Interdiscursivity, and the relationship between history and memory informed by a neurobiological analysis of memory.
