Global Plan of Action for the Conservation, Sustainable Use and Development of Forest Genetic Resources Quintessence Publishing (IL)

British imperialism was almost unparalleled in its historical and geographical reach, leaving a legacy of entrenched social transformation in nations and cultures in every part of the globe. Colonial annexation and government were based on an all-encompassing system that integrated and controlled political, economic, social and ethnic relations, and required a similar annexation and control of natural resources and nature itself.

Colonial ideologies were expressed not only in the progressive exploitation of nature but also in the emerging discourses of conservation. At the start of the 21st century, the conservation of nature is of undiminished importance in post-colonial societies, yet the legacy of colonial thinking endures. What should conservation look like today, and what (indeed, whose) ideas should it be based upon? *Decolonizing Nature* explores the influence of the colonial legacy on contemporary conservation and on ideas about the relationships between people, politics and nature in countries and cultures that were once part of the British Empire. It locates the historical development of the theory and practice of conservation - at both the periphery and the centre - firmly within the context of this legacy, and considers its significance today. It highlights the present and future challenges to conservationists of contemporary global neo-colonialism The contributors to this volume include both academics and conservation practitioners. They provide wide-ranging and insightful perspectives on the need for, and practical ways to achieve new forms of informed ethical engagement between people and nature.

Chronicling the history of the Daughters of Charity through the seventeenth century, this study examines how the community's existence outside of convents helped to change the nature of women's religious communities and the early modern Catholic church. This book places the Daughters of Charity within the context of early modern poor relief in France, showing how they played a critical role in shaping the system, and also how they were shaped by it.

Participaron unos 400 delegados de 90 países miembros y observadores de 10 organizaciones internacionales gubernamentales y no gubernamentales con el fin de intercambiar información y experiencias sobre "Establecimiento de sistemas eficaces de inocuidad de los alimentos." Se presentaron para ser discutidos en las sesiones plenarias 13 documentos de trabajo sobre dos subtemas: "El fortalecimiento de los servicios oficiales de control de la inocuidad de los alimentos" y "Vigilancia epidemiológica de las enfermedades transmitidas por alimentos y sistemas de alerta en materia de inocuidad de los alimentos." Además, los países y organizaciones participantes prepararon más de un centenar de documentos de sesión relativos a los diferentes asuntos que se trataron en el foro. También se celebraron actos colaterales sobre cuestiones específicas de interés para el foro."

Excerpt from Economic Plants of Porto Rico This paper includes miscellaneous information on the principal cultivated plants of Porto Rico, brief notes on many of the minor economic plants, and a list of all the native names of plants which have thus far been recorded from the island, with references to the scientific names of the species to which they are applied as far as these have been determined. As there are no botanical publications in either English or Spanish which give an even approximately complete treatment of the flora, it is believed that the present list of names and the brief notes accompanying will be found of use both to visitors and to residents of the island.
