The Sino-Japanese War of 1894-1895
 Bloomsbury Publishing

Three American missiles hit the Chinese embassy in Belgrade, and what Americans view as an appalling and tragic mistake, many Chinese see as a "barbaric" and intentional "criminal act," the latest in a long series of Western aggressions against China. In this book, Peter Hays Gries explores the roles of perception and sentiment in the growth of popular nationalism in China. At a time when the direction of China's foreign and domestic policies have profound ramifications worldwide, Gries offers a rare, in-depth look at the nature of China's new nationalism, particularly as it involves Sino-American and Sino-Japanese relations—two bilateral relations that carry extraordinary implications for peace and stability in the twenty-first century.

Through recent Chinese books and magazines, movies, television shows, posters, and cartoons, Gries traces the emergence of this new nationalism. Anti-Western sentiment, once created and encouraged by China's ruling PRC, has been taken up independently by a new generation of Chinese. Deeply rooted in narratives about past "humiliations" at the hands of the West and impassioned notions of Chinese identity, popular nationalism is now undermining the Communist Party's monopoly on political discourse, threatening the regime's stability. As readable as it is closely researched and reasoned, this timely book analyzes the impact that popular nationalism will have on twenty-first century China and the world.

In the 1990s, Greater China became the subject of debate as the site of either the danger of the "China threat" or the promise of Confucian capitalism. William A. Callahan argues that Greater China presents challenges not only to economic and political order but also to international relations theory. In fact, Greater China, though absent from geopolitical maps and international law, is very much present in economic and cultural exchange and exemplifies the contingent state of international politics. Callahan deconstructs the mainstream geopolitical and political-economic understandings of Greater China, tracing its emergence through an ethnographic analysis of four political "problems" in East Asia: the South China Sea disputes, Sino-Korean relations, the return of Hong Kong, and cross-straits relations. Callahan shows how bureaucrats, outlaws, tycoons, academics, workers, politicians, and hooligans alike produce Greater China through networks of relations in local, national, regional, global, and transnational space. Finally, *Contingent States* reveals how each of the "problems" provoked theoretical innovations that depart from standard conceptions of sovereignty, democracy, and the nation-state. William A. Callahan is senior lecturer of international politics and deputy director of the Center for Contemporary Chinese Studies at the University of Durham, England, and the author of *Imagining Democracy: Reading "The Events of May" in Thailand and Pollwatching, Elections, and Civil Society in Southeast Asia*.

The Ethics of Making Boundaries Diamond Pocket Books Pvt Ltd

The Qing dynasty (1636–1912)—a crucial bridge between "traditional" and "modern" China—was remarkable for its expansiveness and cultural sophistication. This engaging and insightful history of Qing political, social, and cultural life traces the complex interaction between the Inner Asian traditions of the Manchus, who conquered China in 1644, and indigenous Chinese cultural traditions. Noted historian Richard J. Smith argues that the pragmatic Qing emperors presented a "Chinese" face to their subjects who lived south of the Great Wall and other ethnic faces (particularly Manchu, Mongolian, Central Asian, and Tibetan) to subjects in other parts of their vast multicultural empire. They were attracted by many aspects of Chinese culture, but far from being completely "sinicized" as many scholars argue, they were also proud of their own cultural traditions and interested in other cultures as well. Setting Qing dynasty culture in historical and global perspective, Smith shows how the Chinese of the era viewed the world; how their outlook was expressed in their institutions, material culture, and customs; and how China's preoccupation with order, unity, and harmony contributed to the civilization's remarkable cohesiveness and continuity. Nuanced and wide-ranging, his authoritative book provides an essential introduction to late imperial Chinese culture and society.

Globalization and the Dynamics of Political, Economic, and Social

Change Cambridge University Press
Cosmopolitanism, Nationalism, and Individualism in Modern China explores Chinese intellectual life and cultural practices in the New Culture era of modern China by examining an influential newspaper supplement published in Beijing during 1918–1928, as well as other contemporary sources. Xu highlights a key intellectual-moral paradox in Chinese discourses between cosmopolitanism as an idealistic aspiration and nationalism as a practical imperative, both in complex relationship to individualism, and in constant negotiations between Chinese tradition and Western culture in the making of Chinese modernity. These issues remain vitally relevant today.

Transpacific Displacement University of Pennsylvania Press

DIVD. R. Howland explores China's representations of Japan in the changing world of the late nineteenth

century and, in so doing, examines the cultural and social borders between the two neighbors. Looking at Chinese accounts of Japan written during the 1870s and 1880s, he undertakes an unprecedented analysis of the main genres the Chinese used to portray Japan—the travel diary, poetry, and the geographical treatise. In his discussion of the practice of "brushtalk," in which Chinese scholars communicated with the Japanese by exchanging ideographs, Howland further shows how the Chinese viewed the communication of their language and its dominant modes—history and poetry—as the textual and cultural basis of a shared civilization between the two societies. With Japan's decision in the 1870s to modernize and westernize, China's relationship with Japan underwent a crucial change—one that resulted in its decisive separation from Chinese civilization and, according to Howland, a destabilization of China's worldview. His examination of the ways in which Chinese perceptions of Japan altered in the 1880s reveals the crucial choice faced by the Chinese of whether to interact with Japan as "kin," based on geographical proximity and the existence of common cultural threads, or as a "barbarian," an alien force molded by European influence. By probing China's poetic and expository modes of portraying Japan, *Borders of Chinese Civilization* exposes the changing world of the nineteenth century and China's comprehension of it. This broadly appealing work will engage scholars in the fields of Asian studies, Chinese literature, history, and geography, as well as those interested in theoretical reflections on travel or modernism. /div

The Sextants of Beijing: Global Currents in Chinese History Columbia University Press

Yunte Huang takes a most original "ethnographic" approach to more and less well-known American texts as he traces what he calls the transpacific displacement of cultural meanings through twentieth-century America's imaging of Asia. Informed by the politics of linguistic appropriation and disappropriation, *Transpacific Displacement* opens with a radically new reading of Imagism through the work of Ezra Pound and Amy Lowell. Huang relates Imagism to earlier linguistic ethnographies of Asia and to racist representations of Asians in American pop culture, such as the book and movie character Charlie Chan, then shows that Asian American writers subject both

literary Orientalism and racial stereotyping to double ventriloquism and countermockery. Going on to offer a provocative critique of some textually and culturally homogenizing tendencies exemplified in Maxine Hong Kingston's work and its reception, Huang ends with a study of American translations of contemporary Chinese poetry, which he views as new ethnographies that maintain linguistic and cultural boundaries.

States, Nations and Borders Simon and Schuster

This book analyzes the discovery of Chinese logic as a paradigmatic case of the epistemic shifts that have shaped interpretations of China's intellectual heritage. Reconstructing the transcultural genealogy of a modern discourse, it adds a neglected chapter to the global history of philosophy.

The Chenbao Fukan and the New Culture Era, 1918-1928 BRILL

Unlike the majority of contemporary scholarly works that examine Sino-Japanese relations between 1925 and 1945, this study de-emphasizes the story of conflict and war in favor of one that revolves around the way in which the Chinese intellectually encountered the "enemy", the Japanese.

Ten Maps That Explain Everything About the World University of Hawaii Press

The classic Chinese novel *The Water Margin* (Shuihu zhuan) tells the story of a band of outlaws in twelfth-century China and their insurrection against the corrupt imperial court. Imported into Japan in the early seventeenth century, it became a ubiquitous source of inspiration for translations, adaptations, parodies, and illustrated woodblock prints. There is no work of Chinese fiction more important to both the development of early modern Japanese literature and the Japanese imagination of China than *The Water Margin*. In *The Japanese Discovery of Chinese Fiction*, William C. Hedberg investigates the reception of *The Water Margin* in a variety of early modern and modern Japanese contexts, from eighteenth-century Confucian scholarship and literary exegesis to early twentieth-century colonial ethnography. He examines the ways Japanese interest in Chinese texts contributed to new ideas about literary canons and national character. By constructing an account of Japanese literature through the lens of *The*

Water Margin's literary afterlives, Hedberg offers an alternative history of East Asian textual culture: one that focuses on the transregional dimensions of Japanese literary history and helps us rethink the definition and boundaries of Japanese literature itself.

Qing Travelers to the Far West Springer Nature

The Genesis of East Asia examines in a comprehensive and novel way the critically formative period when a culturally coherent geopolitical region identifiable as East Asia first took shape. By sifting through an impressive array of both primary material and modern interpretations, Charles Holcombe unravels what "East Asia" means, and why. He brings to bear archaeological, textual, and linguistic evidence to elucidate how the region developed through mutual stimulation and consolidation from its highly plural origins into what we now think of as the nation-states of China, Japan, Korea, and Vietnam. Beginning with the Qin dynasty conquest of 221 B.C. which brought large portions of what are now Korea and Vietnam within China's frontiers, the book goes on to examine the period of intense interaction that followed with the many scattered local tribal cultures then under China's imperial sway as well as across its borders. Even the distant Japanese islands could not escape being profoundly transformed by developments on the mainland. Eventually, under the looming shadow of the Chinese empire, independent native states and civilizations matured for the first time in both Japan and Korea, and one frontier region, later known as Vietnam, moved toward independence. Exhaustively researched and engagingly written, this study of state formation in East Asia will be required reading for students and scholars of ancient and medieval East Asian history. It will be invaluable as well to anyone interested in the problems of ethno-nationalism in the post-Cold War era.

The Journal of World Investment & Trade (JWIT) is a double-blind peer-reviewed journal that focuses on the legal aspects of foreign investment relations in a broad sense. This encompasses the law of bilateral, multilateral, regional and sectoral investment treaties, investor-

State dispute settlement, and domestic law relating to foreign investment, but also relevant trade law aspects, such as services, public procurement, trade-related investment measures, and intellectual property, both under the WTO framework and preferential trade agreements.

Globalization and the Dynamics of Political, Economic, and Social Change Rowman & Littlefield

This volume treats "China" first and foremost as an evolving and imagined geographical entity. The contributors explore China's last five hundred years of history using geography as a lens through which to approach such issues as sports, ethnography, cartography, religion, elite and popular culture, transnational networking, urban planning, and politics. *A Translucent Mirror* Cambridge University Press

A chronicle of the unexpectedly rich and varied history of China deflates myths about the country's monolithic and isolated status, revealing its long traditions of influence on and from other Asian countries and the West through trade, technology, and religion.

Race and ethnicity have become two of the most loaded and contested concepts in the contemporary world. *Philosophies of Race and Ethnicity* aims to disentangle this complexity and guide the reader to a clearer understanding of the debates. Analysing the genealogy, meanings and political uses of the concepts of race and ethnicity, *Philosophies of Race and Ethnicity* draws on the best scholarship from philosophy, history, post-colonial studies, political theory and literary studies to explore the structure, status and scope of these concepts.
