This revised set of resources for Cambridge IGCSE Business Studies syllabus 0450 (and Cambridge O Level Business Studies syllabus 7115) is thoroughly updated for the latest syllabus for first examinations from 2015. Written by experienced teachers, the Coursebook provides comprehensive coverage of the syllabus. Accessible language combined with the clear, visually-stimulating layout makes this an ideal resource for the course. Questions and explanation of key terms reinforce knowledge; different kinds of activities build application, analytical and evaluation skills; case studies contextualise the content making it relevant to the international learner. It provides thorough examination support for both papers with questions at the end of each chapter and an extensive case study at the end of each unit. The CD-ROM contains revision aids, further questions and activities. A Teachers CD-ROM is also available.

The past thirty years have seen a rapid expansion of testing, exposing students worldwide to tests that are now, more than ever, standardized and linked to high-stakes outcomes. The use of testing as a policy tool has been legitimized within international educational development to measure education quality in the vast majority of countries worldwide. The embedded nature and normative power of high-stakes standardized testing across national contexts can be understood as a global testing culture. The global testing culture permeates all aspects of education, from financing, to parental involvement, to teacher and student beliefs and practices. The reinforcing nature of the global testing culture leads to an environment where testing becomes

synonymous with accountability, which becomes synonymous with education quality. Underlying the global testing culture is a set of values identified from the increasing literature on world culture. These include: education as a human right, academic intelligence, faith in science, decentralization, and neoliberalism. Each of these values highlights different aspects of the dialogue in support of high-stakes standardized testing. The wide approval of these values and their ability to legitimate various aspects of high-stakes testing reinforces the taken-for-granted notion that such tests are effective and appropriate education practices. However, a large body of literature emphasizes the negative unintended consequences - teaching to the test, reshaping the testing pool, the inequitable distribution of school resources and teachers' attention, and reconstructing the role of the student, teacher, and parent - commonly found when standardized, census-based tests are combined with high-stakes outcomes for educators or students. This book problematizes this culture by providing critical perspectives that challenge the assumptions of the culture and describe how the culture manifests in national contexts. The volume makes it clear that testing, per se, is not the problem. Instead it is how tests are administered, used or misused, and linked to accountability that provide the global testing culture with its powerful ability to shape schools and society and lead to its unintended, undesirable consequences.

The book has been designed topic and subtopic-wise, keeping the students' needs in mind. The current edition has certain unique features: This book is strictly as per the latest CBSE syllabus and covers complete matter as per the NCERT book. After every topic, objective type questions and case studies are given based on the latest CBSE Sample Paper (2020). (Hints of their answers are given at the end of each chapter.) At the end of each chapter, 40 objective type questions (20 MCQs + 10 Fill in the blanks + 10 True/False) are given along with answers at the end. Keywords of each topic are given at the end of each topic, to help students to solve case studies. A flow chart of each chapter is given at the end to recap the topics covered in that chapter. Quick revision is given to revise all the topics in short time. At the end of each chapter, questions asked in last 7 years' board exam are given, so that the student may get an idea of what types of questions are expected from this chapter. (Hints of answers of these questions are also given). Case Studies are framed by using words strictly from the NCERT. A solved sample paper of CBSE 2020 is also given. Guidelines for project are also given. A sample project on Marketing Management is also given. The Subject Matter is presented in simple language, in points, and along with diagrams, so that the student may find it easy to understand.

Business Studies Taylor & Francis

This superbly researched study offers a chalk-face perspective on the secret of Finland's educational success. Providing an intimate and revealing portrait of the Nordic nation's schools and its teacher training system, it sets out to explain why Finland's students consistently rank top, with low variance and moderate inputs, among OECD countries across the range of criteria, from reading to mathematics. Alongside the detailed analysis culled from many hours of interviews with teachers and principals and dozens of visits to school throughout the country, the author maps the educational landscape of Finland: the sector's history, culture and development, its guiding principles, methodologies, and learning environments. The result is a cogent assessment of how and why Finland is universally regarded as a high-grade educational exemplar. The volume provides the hundreds of researchers, teaching professionals, and policy makers who visit Finland in search of inspiration with essential background material on the country's magic educational ingredients, which include a highly motivated cohort of well-trained teachers, a recognition of the vital importance of early years education and nurture, functional and inviting learning environments, and a rejection of pedagogical dogma in favour of developing methodologies that produce results at the same time as fostering students' confidence and collegiality. At the same age, Finland's schoolchildren have roughly one less year of formal schooling than most of their international counterparts, do not consider themselves to be overworked, and rank alongside hot-housed Singaporean or South Korean youngsters in international assessments of achievement. They are the educational equivalent of world-beating sports stars who make success appear effortless. This volume lifts the lid on the hard work and careful planning that underpin their achievements.
