The Orphan Train Think Sociology
THINK Currency. THINK Issues. THINK Relevancy. THINK Sociology. With an engaging visual design and just 15 chapters, THINK Sociology is the Australian Sociology text your students will want to read. This text thinks their thoughts, speaks their language, grapples with the current-day problems they face, and grounds sociology in real world experiences. THINK Sociology is informed with the latest research and the most contemporary examples, allowing you to bring current events directly into your unit with little additional work.

For courses in Introduction to Fiber Optics and Introduction to Optical Networking in departments of Electronics Technology and Electronics Engineering Technology. Also suitable for corporate training programs. Ideal for technicians, entry-level engineers, and other nonspecialists, this best-selling practical, thorough, and accessible introduction to fiber optics reflects the expertise of an author who has followed the field for over 25 years. Using a non-theoretical/non-mathematical approach, it explains the principles of optical fibers, describes components and how they work, explores the tools and techniques used to work with them and the devices used to connect fiber network, and concludes with applications showing how fibers are used in modern communication systems. It covers both existing systems and developing technology, so students can understand present systems and new developments.
