COLON CRISTINA

Print, the City, and Early Modern Identity Fordham Univ Press

This book presents a series of papers in honour of Sandro Salvatori divided into three main sections reflecting his long years of work in Middle Asia, his time in Italy as an officer of the Archaeological Superintendency (Ministry of Cultural Heritage), and finally his studies on the prehistory of north-eastern Africa.

Looking at more than two hundred Italian medieval and Renaissance mural cycles, Lavin examines—with the aid of computer technology—the "rearranged" chronologies of familiar religious stories found therein. "Like many masterpieces, Lavin's book builds upon a simple idea . . . it is possible to do a computer analysis of . . . visual narratives. . . . This is the first computer-based study of the visual arts of which I am aware that illustrates how those technologies can utterly transform the study of old master art. An extremely important book, one likely to become the most influential recent study of art of this period, *The Place of Narrative* is also a beautiful artifact."—David Carrier, *Leonardo* "Covering over a millennium and dealing with the whole of Italy, Lavin makes pioneering use of new methodology employing a computer database . . . [and] novel terminology to describe the disposition of scenes of church and chapel walls. . . . We should recognize this as a book of high seriousness which reaches out into new areas and

which will fruitfully stimulate much thought on a neglected subject of very considerable significance."—Julian Gardner, *Burlington Magazine*

Tropical coastal lagoon environments provide a number of ecosystem services, but are threatened by the pressure imposed by human activities and climatic change; these systems are particularly vulnerable because of a high demographic growth. Therefore, the understanding of their ecological behavior and the characterization of lagoon health indicators have attained importance. Under this perspective Mexican (UAM-X) and French (UMRS MIO and MARBEC) researchers have collaborated from 2011 to 2014 as part of one action of the international exchange program ECOS/ANUIES, and chose the Sontecomapan lagoon (at the Mexican state of Veracruz) as a case study. This book provides information of the ecological behavior, water quality indicators, and details of microorganisms and plankton, which due to their short life cycles and their high reactivity to environmental conditions are good.

Dictionary Catalog of the Research Libraries of the New York Public Library, 1911-1971 All'Insegna del Giglio

"An intelligent synthesis of observations from a wide range of anthropological, historical, and other literature...[Russell's] ultimate mapping of the Germanizing shifts in early medieval Christian belief and praxis is done with a subtle eye to this particularization, its consequences, and the attempted undoing of it since the Second Vatican Council."--*Catholic Historical Review*

Tales of Three Worlds - Archaeology and Beyond: Asia, Italy, Africa University of Chicago Press

The European Union and the single currency have given Europe more stability than it has known in the past thousand years, yet Europe seems to be

in perpetual crisis about its global role. The many European empires are now reduced to a multiplicity of ethnicities, traditions, and civilizations. Europe will never be One, but to survive as a union it will have to become a federation of “islands” both distinct and connected. Though drawing on philosophers of Europe’s past, Cacciari calls not to resist Europe’s sunset but to embrace it. Europe will have to open up to the possibility that in few generations new exiles and an unpredictable cultural hybridism will again change all we know about the European legacy. Though scarcely alive in today’s politics, the political unity of Europe is still a necessity, however impossible it seems to achieve.

The Restoration of Ancient Bronzes Walter de Gruyter GmbH & Co KG

An interdisciplinary exploration of one of the most prolific and controversial figures of early modern Europe. This volume is comprised of seven sections, each devoted to a specific aspect Aretino’s life and works.

This volume examines the painting, sculpture, decorative arts, and architecture produced in nine important court cities of Italy during the course of the fourteenth, fifteenth, and sixteenth centuries. Although each chapter represents a separate study of a particular geographical locale, many common themes emerge. This volume gives a multifaceted consideration of the art created for princes, prelates, confraternities, and civic authorities – works displayed in public squares, private palaces, churches, and town halls. Including six essays specially commissioned that explore the interaction of artists and their civic and/or courtly patrons within the context of prevailing cultural, political, and religious circumstances, *The Court Cities of Northern Italy* provides a rich supplement to traditional accounts of the artistic heritage of the Italian Renaissance, which has traditionally focused on the Florentine, Venetian, and Roman traditions. The book includes 35 color plates and 221 black and white illustrations.

Che facilita Lo Studio di qualunque Storia, Eparticolarmente serve di Prodromo Alli XXXV. Volumi Della Biblioteca ... UPenn Museum of Archaeology 2013 marks the 400th anniversary of the birth of Mattia Preti. This important occasion is being marked by an exhibition organized by Heritage Malta and the Comune of Taverna, where Mattia Preti was born. The exhibition is the final stage of a three year process during which the works of Preti have been studied and revisited. The exhibition together with the Catalogue is the culmination of this journey. The Catalogue includes 9 papers by leading art scholars and historians, some of whom are publishing for the first time their findings after the recent studies of Pretti's paintings. The Catalogue also includes entries of the 49 art-pieces and artifacts forming part of this unique exhibition. Much passion and commitment has gone into the making of this project. Dignity is perhaps the intended objective which to our great satisfaction also received the positive support of some of the major European museums including the Louvre, Prado, Musei Vaticani, Brera, Uffizi, Capodimonte and Galleria Nazionale di Palazzo Barberini amongst others. This common intent shared between Preti's two historic realities, the native city of Taverna and Malta, spurred the curators to reap the desired results and achieve the intended objectives of this complex cultural project. The backbone of this project is a scientific research project proper concerning Preti's works in both Taverna and Malta, particularly the National Museum of Fine Arts, and goes beyond art historical research to include scientific investigations undertaken jointly by Taverna's Laboratorio di Restauro Conservazione e Ricerca and Heritage Malta's Conservation Division at Bighi. The scientific investigation carried out on Preti's Martyrdom of St Catherine of Alexandria, in particular, yielded unexpected results and confirmed the iconographical attributes of the martyr saint lying underneath. We hope these results will be the scope for more debate and discussion for the international academic community to take further. All this empowered us to read deeper into Preti's works in both Taverna and Malta and guided our selection of works to feature in the exhibition. The 400th anniversary of Mattia Preti's birth makes us all proud of a shared heritage which this project rethinks and consolidates. Vincenzo Bonello, who contemporary to Alfonso Frangipane and Valerio Mariani, rediscovered Mattia Preti's legacy and corpus of works in Malta transformed all this into a powerful identity construct mostly effective during colonial times. Preti's ideals have thus moved beyond any delimiting borders on to our times, four hundred years later and, from this safe distance, empower us to objectively assess his exceptional creative trajectory. Preti can now be read as a noble man who strives hard with his art to get back what his family had lost a few years before his birth. His quest transformed him from knight to a monk of war ready to do battle in the name of his spiritual and social affirmations which can be fully recognized in the ideals of Faith and Humanity.

The Handbook of International Futurism is the first reference work ever to presents in a comparative fashion all media and countries in which the movement, initiated by F.T. Marinetti in 1909, exercised a particularly noteworthy influence. The handbook offers a synthesis of the state of scholarship regarding the international radiation of Futurism and its influence in some fifteen artistic disciplines and thirty-eight countries. While acknowledging the great achievements of the movement in the visual and literary arts of Italy and Russia, it treats Futurism as an international, multidisciplinary phenomenon that left a lasting mark on the manifold artistic manifestations of the early twentieth-century avant-garde. Hundreds of artists, who in some phase in their career absorbed Futurist ideas and stylistic devices, are presented in the context of their national traditions, their international connections and the media in which they were predominantly active. The handbook acts as a kind of multi-disciplinary, geographical encyclopaedia of Futurism and gives scholars with varying levels of experience a detailed overview of all countries and disciplines in which the movement had a major impact.

'Urban Sprawl and Public Health' offers a survey of the impact that the built environment can have on the health of the people who inhabit our cities.

The authors go on to suggest ways in which the design of cities could be improved & have a positive impact on the well-being of their citizens.

Walter de Gruyter GmbH & Co KG

This volume explores the themes of authorship and authenticity – and connected issues – from the Classical Antiquity to the Renaissance. Its reflection is constructed within a threefold framework. A first section includes topics dealing with dubious or uncertain attribution of ancient works, homonymous writers, and problems regarding the reliability of compilation literature. The middle section goes through several issues concerning authorship: the balance between the author’s contribution to their own work and the role of collaborators, pupils, circles, reviewers, scribes, and even older sources, but also the influence of different compositional stages on the concept of ‘author’, and the challenges presented by anonymous texts. Finally, a third crucial section on authenticity and forgeries concludes the book: it contains contributions dealing with spurious works – or sections of works – , mechanisms of interpolation, misattribution, and deliberate forgery. The aim of the book is therefore to exemplify the many nuances of the complex problems of authenticity and authorship of ancient texts.

The vast transformation of the Roman world at the end of antiquity has been a subject of broad scholarly interest for decades, but until now no book has focused specifically on the Iberian Peninsula in the period as seen through an archaeological lens. Given the sparse documentary evidence available, archaeology holds the key to a richer understanding of the developments of the period, and this book addresses a number of issues that arise from analysis of the available material culture, including questions of the process of Christianization and Islamization, continuity and abandonment of Roman urban patterns and forms, the end of villas and the growth of villages, and the adaptation of the population and the elites to the changing political circumstances.

For a long time now it has been common understanding that Africa played only a marginal role in the First World War. Its reduced theatre of operations appeared irrelevant to the strategic balance of the major powers. This volume is a contribution to the growing body of historical literature that explores the global and social history of the First World War. It questions the supposedly marginal role of Africa during the Great War with a special focus on Northeast Africa. In fact, between 1911 and 1924 a series of influential political and social upheavals took place in the vast expanse between Tripoli and Addis Ababa. The First World War was to profoundly change the local balance of power. This volume consists of fifteen chapters divided into three sections. The essays examine the social, political and operational course of the war and assess its consequences in a region straddling Africa and the Middle East. The relationship between local events and global processes is explored, together with the regional protagonists and their agency. Contrary to the myth still prevailing, the First World War did have both immediate and long-term effects on the region. This book highlights some of the significant aspects associated with it.

The Roman amphitheatre was a site both of bloody combat and marvellous spectacle, symbolic of the might of Empire; to understand the importance of the amphitheatre is to understand a key element in the social and political life of the Roman ruling classes. Generously illustrated with 141 plans and photographs, *The Story of the Roman Amphitheatre* offers a comprehensive picture of the origins, development, and eventual decline of the most typical and evocative of Roman monuments. With a detailed examination of the Colosseum, as well as case studies of significant sites from Italy, Gaul, Spain and Roman North Africa, the book is a fascinating gazetteer for the general reader as well as a valuable tool for students and academics.

[Faith and Humanity](#) Studies in Book and Print Cult

Argentina is a country of enormous potential and challenging problems. In recent decades, violence and military dictatorships have upset the political system, and economic instability has held in check efforts to develop the country’s industries. Covering the entire sweep of Argentina's history from pre-Columbian times to 2001, the narrative outlines the connections between the colonial era and the 19th century and focuses closely on the last three decades of the twentieth century, during which Argentina dealt with the legacies of Peronism and of military dictatorship, as well as the challenges of establishing a stable democracy. Also included are a timeline of historic events in Argentina, biographical sketches of key people in its history, a glossary of terms, and a bibliographic essay of works in English for further study. All libraries should update their collection of Latin American histories with this work, which is ideal for students and travelers.

The Triumph and Trade of Egyptian Objects in Rome Walter de Gruyter GmbH & Co KG

The archaeological finds at Herculaneum and Pompeii have rendered Naples an especially rich field for the study of the history of restorations, particularly of ancient bronzes. Bringing together the research of an international group of curators, conservators, archivists, and scientists, this extensively illustrated online volume examines the evolving practice of bronze restoration in Naples and other European centers from the eighteenth century to today. Presenting the results of new investigations, this collection of essays and case studies addresses the contexts in which the restorations took place, the techniques and materials used, the role of specialists, and changing attitudes to the display of these statues. Along with a rich selection of images, these texts offer a significant contribution to the history of restoration and conservation, providing valuable information regarding the evolution of taste and museum practices at a formative stage of modern archaeology. The essays collected here were written following a series of presentations at a one-day conference, “Restoring Ancient Bronzes in the Nineteenth Century,” held at the J. Paul Getty Museum on May 6, 2011. Each illustrated essay is accompanied by a separate gallery of large-format images to facilitate study and analysis. Edited by Erik Risser, associate conservator in the Department of Antiquities at the J. Paul Getty Museum, and David Saunders, assistant curator in the Department of Antiquities at the J. Paul Getty Museum, this collection is part of the Getty’s ongoing commitment to the online publication of scholarly conferences and symposia.

The Iberian Peninsula Between 300 and 850 Cambridge University Press

Positing a dynamic relationship between print culture and social experience, Bronwen Wilson's *The World in Venice* focuses on the printed image during a century of profound transformation. City views, costume illustrations, events, and portraits of locals and foreigners are brought together to show how printmakers responded to an expanding image of the world in Renaissance Venice, and how, in turn, prints influenced the ways in which individuals thought about themselves. Woodcuts and engravings of cities and inhabitants of Europe, and those of distant lands, initiated a sudden and

pervasive experience with alterity that redefined the relations of Europeans to the world. By condensing the world into pictures, print enabled a radically novel and vicarious experience of others. Wilson explores the overlapping and evolving relations between space, vision, print, and identity, and engages with current scholarly debates concerning ethnicities, gender and geography, copies and originals, travel, nationhood, fashion, urban life, visuality, and the body. Venice was one of the largest cities in Renaissance Europe, a trading crossroads, and a centre of print. *The World in Venice* shows how Venetian identity came to be envisioned within the growing global context that print constructed for it.
