Problem-Oriented Policing: Successful Case Studies is the first systematic and rigorous collection of effective problem-oriented policing projects. It includes more than twenty case studies from among the thousands of projects submitted for the Herman Goldstein Award for Excellence in Problem-Oriented Policing. The volume describes in detail the case studies and explains the wider significance of each for effective, efficient, and equitable policing. This book explores a wide range of problems that fall under five general categories: gang violence; violence against women; vulnerable people; disorderly places; and theft, robbery, and burglary. The case

studies tell stories of how police, in collaboration with others, successfully tackled real-world policing problems fairly and effectively. The authors have also drawn out of the case studies the cross-cutting themes and issues they illustrate. The authors prove that the concept can work, bring to life the context in which police and communities addressed these vexing problems, and, ideally, will inspire future problem-oriented police work that builds on these reported successes. Written in a clear and direct style, this book will appeal to students and scholars of policing, criminology, and social studies; police practitioners and crime analysts; and all

those who are interested in learning more about the reality of police problem-solving.

A startling look at the unexpected places where violent hate groups recruit young people Hate crimes. Misinformation and conspiracy theories. Foiled white-supremacist plots. The signs of growing far-

right extremism are all around us, and communities across America and around the globe are struggling to understand how so many people are being radicalized and why they are increasingly attracted to violent movements. Hate in the Homeland shows how tomorrow's far-right nationalists are being recruited in surprising places, from college campuses and mixed martial arts gyms to clothing stores, online gaming chat rooms, and YouTube cooking channels. Instead of focusing on the how and why of far-right radicalization, Cynthia Miller-Idriss seeks answers in the physical and virtual spaces where hate is cultivated. Where does

the far right do its recruiting? When do young people encounter extremist messaging in their everyday lives? Miller-Idriss shows how far-right groups are swelling their ranks and developing their cultural, intellectual, and financial capacities in a variety of mainstream settings. She demonstrates how young people on the margins of our communities are targeted in these settings, and how the path to radicalization is a nuanced process of moving in and out of far-right scenes throughout adolescence and adulthood. Hate in the Homeland is essential for understanding the tactics and underlying ideas of modern far-right extremism. This

eye-opening book takes readers into the mainstream places and spaces where today's far right is engaging and ensnaring young people, and reveals innovative strategies we can use to combat extremist radicalization.

Introduction to Criminology, Why Do They Do It?, Second Edition, by Pamela J. Schram
Stephen G. Tibbetts, offers a contemporary and integrated discussion of the key theories that help us understand crime in the 21st century. With a focus on why offenders commit crimes, this bestseller skillfully

engages students with real-world cases and examples to help students explore the fundamentals of criminology. To better align with how instructors actually teach this course, coverage of violent and property crimes has been integrated into the theory chapters, so students can clearly understand the application of theory to criminal behavior. Unlike other introductory criminology textbooks, the Second Edition discusses issues of diversity in each chapter and covers many contemporary topics that are not well represented in other texts, such as feminist criminology, cybercrime, hate crimes, white-collar crime, homeland

security, and identity theft. Transnational comparisons regarding crime rates and the methods other countries use to deal with crime make this edition the most universal to date and a perfect companion for those wanting to learn about criminology in context.

I Survived My

Childhood Princeton Review Culture, Leadership, and Organizations reports the results of a ten-year research program, the Global Leadership and Organizational Behavior Effectiveness (GLOBE) research program. GLOBE is a long-term program designed to conceptualize, operationalize, test, and validate a cross-level integrated theory

of the relationship between culture and societal, organizational, and leadership effectiveness. A team of 160 scholars worked together since 1994 to study societal culture, organizational culture, and attributes of effective leadership in 62 cultures. Culture, Leadership, and Organizations: The GLOBE Study of 62 Societies reports the findings of the first two phases of GLOBE. The book is primarily based on the results of the survey of over 17,000 middle managers in three industries: banking, food processing, and telecommunications, as well as archival measures of country economic prosperity and the physical and psychological well-

being of the cultures studied.

A New Story of American Racism

Dorrance Publishing

This book assesses the controversies over the Washington NFL team name as a window into other recent debates about the use of Native American mascots for professional and college sports teams. Fenelon explores the origin of team names in institutional racism and mainstream society's denial of the impact of four centuries of colonial conquest. Fenelon's analysis is supported by his surveys and interviews about the "Redskins" name and Cleveland "Indians" mascot "Chief Wahoo." A majority of Native peoples see these mascots as racist, including the National

Congress of American Indians—even though mainstream media and public opinion claim otherwise. Historical analysis divulges these terms as outgrowths of "savage" and "enemy icon" racist depictions of Native nations. The book ties the history of conquest to idealized claims of democracy, freedom, and "honoring" sports teams.

Leadership in Public Organizations The New Press

In *From Back Alley to the Border*, Alicia Gutierrez-Romine examines the history of criminal abortion in California and the role abortion providers played in exposing and exploiting the faults in California's anti-abortion statute throughout the twentieth century.

Focused on the women who used this underground network and the physicians who facilitated it, Gutierrez-Romine describes the operation of abortion providers from the 1920s through the 1960s, including regular physicians as well as women and African American abortionists, and the investigations and trials that surrounded them. During the 1930s the Pacific Coast Abortion Ring, a large, coast-wide, and comparatively safe organized abortion syndicate, became the target of law enforcement agencies, forcing abortions across the border into Mexico and ushering in an era of Tijuana "abortion tourism" in the early 1950s. The movement south of the

border ultimately compelled the California Supreme Court to rule its abortion statute "void for vagueness" in *People v. Belous* in 1969--four years before *Roe v. Wade*. Gutierrez-Romine presents the first book focused on abortion on the West Coast and the border between the United States and Mexico and provides a new approach to studying how providers of illegal abortions and their female clients navigated this underground network. Supporting Entrepreneurship and Innovation SAGE Publications Introduction to Analysis is an ideal text for a one semester course on analysis. The book covers standard material on the real

numbers, sequences, continuity, differentiation, and series, and includes an introduction to proof. The author has endeavored to write this book entirely from the student's perspective: there is enough rigor to challenge even the best students in the class, but also enough explanation and detail to meet the needs of a struggling student. From the Author to the student: "I vividly recall sitting in an Analysis class and asking myself, 'What is all of this for?' or 'I don't have any idea what's going on.' This book is designed to help the student who finds themselves asking the same sorts of questions, but will also challenge the brightest students." Chapter 1 is

a basic introduction to logic and proofs. Informal summaries of the idea of proof provided before each result, and before a solution to a practice problem. Every chapter begins with a short summary, followed by a brief abstract of each section. Each section ends with a concise and referenced summary of the material which is designed to give the student a "big picture" idea of each section. There is a brief and non-technical summary of the goals of a proof or solution for each of the results and practice problems in this book, which are clearly marked as "Idea of proof," or as "Methodology", followed by a clearly marked formal proof or solution. Many

references to previous definitions and results. A "Troubleshooting Guide" appears at the end of each chapter that answers common questions.

here contribute to our understanding of how digital rhetoric is changing the landscape of writing. Increasingly, all of us must navigate networks of information, compose not just with computers but an array of mobile devices, increase our technological literacy, and understand the changing dynamics of authoring, writing, reading, and publishing in a world of rich and complex texts. Given such changes, and given the diverse ways in which younger generations of college students are writing, communicating, and designing texts in multimediated, electronic environments, we need to consider how the very act of writing itself is undergoing

potentially fundamental changes. These changes are being addressed increasingly by the emerging field of digital rhetoric, a field that attempts to understand the rhetorical possibilities and affordances of writing, broadly defined, in a wide array of digital environments. Of interest to both researchers and students, this volume provides insights about the fields of rhetoric, writing, composition, digital media, literature, and multimodal studies. Culture, Leadership, and Organizations Wordtech Communications Tools such as Blackboard and Google Classroom have seen wide-scale adoption

and standardized implementation in colleges and universities. So why is K-12 a step behind? This book will not only answer this question, but it will provide the solution. This is a roadmap that will allow you (yes, you) to become the champion of advanced curriculum development for your school / district and achieve the promise of technology in the classroom.

THIS IS FOR THE MOSTLESS, writer and performer Jason Magabo Perez's debut book, is a lyrical collection of autobiographical poems, essays, fictions, and oral histories. Moving against discipline and

genre, from city to city, barrio to barrio, these stories and sympathies are filled with familia and trauma, and cast with wildly divergent figures as iconic as Don Cheadle and Mandy Moore, and as obscure as Cobra Commander and Perez's own mother—a Filipina migrant nurse who in 1976 was framed by the FBI for murder. Ultimately, Perez celebrates and mourns the multiple migrations and afterlives of grandmothers, gangsters, girlfriends, superheroes, and poets. This book is about and most definitely for all of the mostless.

comprehensive study of international terrorist attacks covers 2017, during which the Islamic State suffered continued reversals yet retained its status as the most active, well-financed and well-armed terrorist group worldwide. Organized by region and country, the study covers domestic and international incidents around the world, outlining significant trends. The author offers several indicators of what to watch in the coming years. The single-year format allows readers access to the most up-to-date information on terrorism, while geographic focus more easily facilitates regional comparison.

Claiming Belonging dives deep into the lives of Muslim American advocacy groups in the post-9/11 era, asking how they form and function within their broader community in a world marked by Islamophobia. Bias incidents against Muslim Americans reached unprecedented levels a few short years ago, and many groups responded through action—organizing on the national level to become increasingly visible, engaged, and assertive. Emily Cury

draws on more than four years of participant observation and interviews to examine how Muslim American organizations have sought to access and influence the public square and, in so doing, forge a political identity. The result is an engaging and unique study, showing that policy advocacy, both foreign and domestic, is best understood as a sphere where Muslim American identity is performed and negotiated. Claiming Belonging offers ever-timely insight into the place of Muslims in American political life and, in the process, sheds light on one of the fastest-growing and most internally dynamic American minority groups.
