This book brings together an edited selection of presentations from the Association for Medical Humanities annual conference 2015, held at Dartington Hall, UK, that address the question: How might innovative performing arts help to develop medical education and practice? It includes papers and accounts of both keynote talks and performances, presenting cutting-edge activity, thinking and research in the medical and health humanities. The volume also offers an archive of a visual arts exhibition focused on surgical themes that ran in conjunction with the conference. An introductory chapter situates the conference in the context of Dartington Hall's radical education tradition, while an overview chapter discusses the theme of 'risk and regulation' in contemporary culture, with particular reference to medicine and healthcare. Part I: Selected Keynotes covers three key areas in the conversation between medicine and the arts: 'chance' in health and illness; the contested role of simulation in art and medical education; and risks in introducing arts-based learning to medical students. Part II: Performances archives three innovative and challenging performance pieces presented at the conference, with commentaries and discussion, including a closely-argued philosophical justification for performance art. Part III: Histories offers a historical gaze on: anatomical illustration; plagues represented through art; and poetry written in combat. Part IV: For some, just living is a risk offers a photo-essay on Haiti's symptoms; a photo-record on the regulation of foodways for those living at the edge of subsistence; a medical student's wry account of scepticism towards the use of arts in medical education; and a photo-essay concerning the care of a child with complex disabilities and special needs. Part V: Exhibition 'At the Sharp End of Bluntness' archives deliberately provocative visual work addressing surgical themes and living with cystic fibrosis as 'Slow Death'.

There is a seeming dichotomy in C. S. Lewis's writing. On the one hand we see the writer of argumentative works, and on the other hand we have the imaginative poet. Lewis also found this dichotomy within himself. When he was a rationalist and atheist he found that these two sides of him were pulling in different directions: he believed that his rationalist side could not be reconciled with his imaginative side. Once he became a Christian, he eventually found a means of marrying the two—principally, through story and myth. Within C. S. Lewis studies, there is also a common conception of Lewis as a modern rationalist philosopher, i.e., a rationalist who thinks arguments (and his arguments in particular) are the last answer on the questions he undertakes. Reasoning beyond Reason attempts to take this view to task by placing Lewis back into his pre-modern context and showing that his sources and influences are classical ones. In this process Lewis is viewed through the idea that imagination and reason are connected in an

intimate way: they are different expressions of a single divine source of truth, and there is an imagination already present upon which reason works. Lewis's "transpositional" view of imagination implicitly pushes towards a somewhat radical position: the imagination is to be seen as theological in its reliance upon something more than the merely material; it necessarily relies on a transcendent funding for its use and meaning. In other words, the imagination is a well-source for what we might normally label "rational."

Many people in Christian ministry are tired of simplistic certainties; what they need is permission to live with uncertainty, with mystery, ambiguity, and paradox. Because we live in a world that is far removed from the modernist version of reality, with its rational, clinical, and superficial presentation of life, we need the courage and wisdom to embrace the presence of uncertainties in the midst of certainty. In this book, the author offers snapshots of a number of central Christian topics--God, the gospel, the church, salvation, ministry--inviting us to treat them as features of a landscape to explore rather than a set of propositional statements to sign up to. Each chapter--short enough to provoke interest and curiosity--will be a catalyst for deeper reflection and enquiry, inviting us to discover a new freedom in ministry as we embrace a more generous "both-and" perspective

in place of a more narrow "either-or" interpretation of the Christian faith. In the process, we may find ourselves rediscovering "the Life we have lost in living" as we imaginatively participate in the life, ministry, and mystery of the triune God of grace in our midst.

This book is designed to appeal to fans of Dan Browns Robert Langdon novels, particularly The Lost Symbol (2009). Beyer explores some of the books codes, puzzles, and historical references. Although he does raise some interesting questions How does The Lost Symbols original title, The Solomon Key, help us to understand the meaning and importance of one of the books characters? he also spends a lot of time on matters peripheral to his theme. Why, for example, in a book that is presumably being read by someone who is intimately familiar with Browns novels and their hero, Robert Langdon, would the author devote nearly 2 full pages to a physical description of the character and an explanation of what he does for a living? Similarly, the authors lengthy travelogue-like description of The Lost Symbols setting, Washington, D.C., could be replaced by a simple list of elements from the Brown novel that actually exist in Washington, freeing up 30-odd pages for meatier pursuits. Recommended for readers who cant get enough of Brown and Langdon, but for a better and much more entertaining exploration of Browns techniques, try The Va Dinci Cod (2005), the hilarious Da Vinci Code parody written by A. R. R. Roberts.
