unprecedented access, Pulitzer Prize
winner Paul Ingrassia takes us from

American workers better than the American companies themselves did? Complete with a new Afterword providing fresh insights into the continuing upheaval in the auto industry—the travails of Toyota, the revolving-door management and IPO at General Motors, the unexpected progress at Chrysler, and the Obama administration’s stake in Detroit’s recovery—Crash Course addresses a critical question: America bailed out GM, but who will bail out America? With an updated Afterword by the author Praise for Crash Course “In order to understand just how much of a mess it was—not to mention how it got that way and how, if at all, it can be cleaned up—you really need to read Crash Course.”—The Washinton Post “Ingrassia tells Detroit’s story with economy, vigour and restrained fury.”—The Economist “A delightful mix of history and first-person reporting . . . Employing superb storytelling skills, Ingrassia explains in head-shaking detail the elements of a wholly avoidable collision.”—Kirkus Reviews (starred review)

No automobile is more recognizable than the Volkswagen Beetle. Introduced as an affordable motor vehicle for postwar Germany, the little Beetle grew to iconic status in both the automotive world and the world of pop culture. This year-by-year, full-color tribute to the "People's Car" begins with the first models in 1945 and goes on to cover the Beetle's 33-year production run in Germany, it's continued manufacture in Mexico starting in 1978, and the introduction in Spring 1998 of the New Beetle -- a car that reasserted the model's popularity, posted remarkable sales and, like its forebear, transcended the automotive world to become a pop culture sensation.

To an Early Grave Bentley Publishers
When Leslie Braverman passes away at the early age of 41, four of his closest friends are reunited on an odyssey through the streets of Brooklyn in a beat-up Volkswagen searching for the funeral parlor. In a series of fits, starts and wrong-turns, the comedic banter that suffuses the journey of these four Jewish proponents of New Criticism and little-

magazine writing is quietly transformed into a quest for the intellectual, emotional and sentimental aura of the past. The basis for the 1968 movie *Bye Bye Braverman*, *To An Early Grave* is a testament to the exuberant inventiveness of Wallace Markfield's writing.

The global crisis the automotive industry has slipped into over the second half of 2008 has set a fierce spotlight not only on which cars are the right ones to bring to the market but also on how these cars are developed. Be it OEMs developing new models, suppliers integrating themselves deeper into the development processes of different OEMs, analysts estimating economical risks and opportunities of automotive investments, or even governments creating and evaluating scenarios for financial aid for suffering automotive companies: At the end of the day, it is absolutely indispensable to comprehensively understand the processes of automotive development – the core subject of this book. Let's face it: More than a century after Carl Benz, Wilhelm Maybach and Gottlieb Daimler

developed and produced their first motor vehicles, the overall concept of passenger cars has not changed much. Even though components have been considerably optimized since then, motor cars in the 21st century are still driven by combustion engines that transmit their propulsive power to the road surface via gearboxes, transmission shafts and wheels, which together with spring-damper units allow driving stability and ride comfort. Vehicles are still navigated by means of a steering wheel that turns the front wheels, and the required control elements are still located on a dashboard in front of the driver who operates the car sitting in a seat.

toolkit, or enthusiasts fireside chair. If you own a car, especially a European one, you have Bosch components and systems.

"Remember Those Great Volkswagen Ads?" Keith Martin

At the Berlin Auto Show in 1938, Adolf Hitler presented the prototype for a small, oddly shaped, inexpensive family car that all good Aryans could enjoy. Decades later, that automobile—the Volkswagen Beetle—was one of the most beloved in the world. Bernhard Rieger examines culture and technology, politics and economics, and industrial design and advertising genius to reveal how a car commissioned by Hitler and designed by Ferdinand Porsche became an exceptional global commodity on a par with Coca-Cola.

Beyond its quality and low cost, the Beetle's success hinged on its uncanny ability to capture the imaginations of people across nations and cultures. In West Germany, it came to stand for the postwar "economic miracle" and helped propel Europe into the age of mass motorization. In the United States, it was embraced in the suburbs, and then prized by the hippie counterculture as an antidote to suburban conformity. As its popularity waned in the First World, the Beetle crawled across Mexico and Latin America, where it symbolized a sturdy toughness necessary to thrive amid economic instability. Drawing from a wealth of sources in multiple languages, *The People's Car* presents an international cast of characters—executives and engineers, journalists and advertisers, assembly line workers and car collectors, and everyday drivers—who made the Beetle into a global icon. The Beetle's improbable story as a failed prestige project of the Third Reich which became a world-renowned brand illuminates the multiple origins, creative adaptations, and persisting inequalities that characterized twentieth-century globalization.

In 1959, Doyle Dane Bernbach, the New York advertising agency was appointed to handle the Volkswagen account in the USA. The advertisements they produced through the sixties and early seventies changed the face of advertising, not just in America but across the world. Remember those great Volkswagen ads? looks briefly at the events surrounding the birth of the campaign and the car, and shows many of the highly acclaimed advertisements produced by the agency. This book has been written and compiled by Alfredo Marcantonio, Copywriter and one-time Advertising Manager of VWGB Ltd, John O'Driscoll, Art Director of many British Volkswagen ads, and David Abott, an ex-Creative and Managing Director of DDB's London office. They decided to put the book together some 20 years ago as "to let the Beetle and its advertising pass on without a permanent record seemed a crying shame". This book is a story of the car and its advertising. In a unique way the two were indistinguishable ? the charming, honest advertising became part of the charm and honesty of the car. If you

ever owned a Beetle, if you've ever chuckled at a Volkswagen advertisement, or if you simply appreciate wit and style, you will enjoy this book. It's the tale of an ugly duckling that became an office pin-up.

The specially commissioned photographs in this book display each Beetle variant model in their full glory. From the military vehicles of the 1930s through the post-WWII cars, up to and including the final German-built model of 1979, this book offers a loving tribute to the car in sumptuous detail. The beautifully restored and kept cars of each decade are displayed across several double page spreads. Parts of each model are shown in close-up, compared and explained using studio photographs of each model's steering wheels, indicators, engine bays and other aspects of design and function. The history of the Beetle is illustrated using contemporary archive photography, and attention is given to the cultural impact of the Beetle as shown through movies (such as the Herbie franchise), advertising and graphic design. This large format, fully illustrated book presents the Beetle as an object of art, albeit one that starts every time and will run forever on reused cooking oil, with a little

modification. Word count: 24,000

Volkswagon owners get dewey-eyed with nostalgia just thinking about their old Beetles. This was a vehicle of a thousand stories, and My Bug presents some of the best of them in all their tie-dyed glory. More than forty brand-new stories, poems, anecdotes, and general love letters plus 100 treasured photographs, illustrations, and cartoons from smitten owners recall the highs and lows of the golden days of Beetlemania: water splashing through holes in the rusted floor; trying to make out in the backseat (indeed, trying to make it out of the backseat; the mystery test button on the dash, the secret panel behind the footrest, the battery so conveniently(!) located under the backseat), the scalding blast of sudden heat as the car chugged up an incline. No self-respecting Boomer can forget the Beetle, even if he or she is driving a Beemer today. Now is the time to get out the bellbottoms and put those memory cells in gear. The Bug is back.

Michael J. Lippe was diagnosed with pancreatic cancer in 2007. This is his story, and the story of pancreatic cancer, narrated by Lippe and Dr. Dung T. Le, the physician who is treating him. In telling these stories, Lippe and Le alternate chapters. Lippe writes about the early signs that something was wrong; Le continues with a description of pancreatic cancer, its symptoms, and its treatments. Lippe talks about his prognosis, contemplates the prospect of death, and describes how he began to cope; Le explains the importance, for both doctor and patient, of balancing hope and truth.

Lippe speaks frankly about the toll the disease takes on his marriage and family; Le offers a general picture of what most patients can expect with their illness. The book concludes with Lippe and Le's reflections on their partnership in treating cancer, lessons they have learned, and their thoughts about the positive things that sometimes emerge from illness. Pancreatic Cancer offers clear explanations of what the disease is, describes what people with the disease will feel physically and mentally, and discusses current treatments and future directions of research. The authors hope

that their honest yet hopeful perspective will help all people with cancer and those who care about them.
