 At a time when a global consensus on human rights standards seems to be emerging, this rich study steps back to

explore how the idea of human rights is actually employed by activists and human rights professionals. Winifred Tate, an anthropologist and activist with extensive experience in Colombia, finds that radically different ideas about human rights have shaped three groups of human rights professionals working there-- nongovernmental activists, state representatives, and military officers. Drawing from the life stories of high-profile activists, pioneering interviews with military officials, and research at the United Nations Human Rights Commission in Geneva, Counting the Dead underscores the importance of analyzing and understanding human rights discourses, methodologies, and institutions within the context of broader cultural and political debates.

**Lymphatics and Lymph Circulation: Physiology and Pathology** is a comprehensive account of the physiology and pathology of lymphatics and lymph circulation, with emphasis on the question of lymph flow as well as the problems of capillary filtration and diffusion in the connective tissue. These intricate processes are explained from a uniform point of view. Comprised of 27 chapters, this book begins with a discussion on the origin and architecture of the lymphatic system, paying particular attention to the discovery of lymphatics and lymph circulation; the phylogenesis and ontogenesis of lymphatics; and general and special anatomy of the lymphatic system. The second part explores the general physiology and pathology of the lymphatic system and includes chapters

dealing with the role of the connective tissue in lymph formation; absorption into lymph capillaries; filtration and absorption through serous membranes; and lymph flow and composition. The remaining chapters consider the central nervous system and other organs such as the heart, lung, liver, kidney, and pancreas. This monograph will be useful for students, practitioners, and researchers in physiology and pathology.

Exploring the chemistry of synthesis, mechanisms of polymerization, reaction engineering of step-growth and chain-growth polymerization, polymer characterization, thermodynamics and structural, mechanical, thermal and transport behavior of polymers as melts, solutions and solids, Fundamentals of Polymer Engineering, Third Edition covers essential concepts and breakthroughs in reactor design and polymer production and processing. It contains modern theories and real-world examples for a clear understanding of polymer function and development. This fully updated edition addresses new materials, applications, processing techniques, and interpretations of data in the field of polymer science. It discusses the conversion of biomass and coal to plastics and fuels, the use of porous polymers and membranes for water purification, and the use of polymeric membranes in fuel cells. Recent developments are brought to light in detail, and there are new sections on the improvement of barrier properties of polymers, constitutive equations for polymer melts, additive manufacturing and polymer recycling. This textbook is aimed at senior undergraduate students and first year graduate students in polymer engineering and science courses, as well as professional engineers, scientists, and chemists. Examples and problems are included at the end of each chapter for concept reinforcement.

*Replacing the Dead* Mia Wadsworth

The Living and the Dead examines the

boundaries between the worlds of life and death. The text draws upon philosophy, ethnography, literature and natural science to suggest that life and death are best understood not in opposition, but as continuous tendencies acting upon one another. Austin Locke argues that the failure to give nuanced consideration to the connections between the living and nonliving devalues both life and death. In doing so, he suggests that our ability to respond to the challenges of environmental degradation, technological advancement, and the dominance of economic logic depend in part on more fluid understandings of the relationship between life and death.

Radical Radiance is an innovative self-care program that allows you to hone your inner and outer beauty with twelve simple rituals based in Korean skin care regimens, from the founder and CEO of Savor Beauty + Spa, Angela Jia Kim. We can all think of someone who radiates beauty, vibrancy, and confidence that emanates from a lit-from-within quality. But what exactly is this irresistible magnetism, and how can you develop it within yourself to manifest all the abundance, beauty, and joy that you not only crave, but deserve? In this customizable 12-week self-care program, Angela Jia Kim teaches you how to nourish your inner and outer glow so your radiance shines from every pore of your being. Drawing upon her Korean beauty heritage and decades of experience as a former concert pianist and founder of Savor Beauty, she reveals how your skin and soul have a lot in common—they both need purification, detoxification, exfoliation, and nourishment. Within, you will find: - A profound self-love practice: how to treat your skin "like the most expensive silk on Earth," as Angela's mom would say, which sets a deep foundational lesson for how to treat your soul - Over 50 simple-yet-powerful self-care prompts, purposeful plans, and radiance rituals. - Real-life stories to inspire you to become a magnetic manifesting force by restoring self-worth, awakening feminine energy, and connecting with your Higher Self. Radical Radiance teaches you how to illuminate your authentic beauty and transform your life for radiance, magic, and happiness.

"In 1955 the Soviet Union re-legalized abortion on the basis of women's rights. However, this fact is not widely known. In the absence of a feminist movement, how did the idea of women's rights to abortion emerge in an authoritarian society, decades before it appeared in the West? The answer is found in the history of the Soviet politics of reproduction after World War II, a devastation in which 27 million Soviet soldiers and civilians perished. This enormous loss of predominantly adult males posed a threat to economic recovery. In order to replace the dead, the Soviet Union introduced the 1944 Family Law based on the proposal submitted by Nikita S. Khrushchev. This extreme pronatalist policy encouraged men to father out-of-wedlock children and celebrated "Mother Heroines." However, *Replacing the Dead* argues that in the absence of serious commitment to supporting Soviet women who worked full-time, the policy actually did extensive collateral damage to gender relations and the welfare of women and children. *Replacing the Dead* finds the origin of the movement to improve women's reproductive environment in postwar social critique arising from women and Soviet professionals. Neither Stalin, nor Khrushchev allowed any major reform, but the movement did not die out. With relegalization and lack of contraception, an abortion culture grew among Soviet women. The model of socialist reproduction continues to set socialist and postsocialist countries apart. This history is a cautionary tale for today's Russia, as well as other countries that attempt to promote births"--

Here is a vivid, poetic, and evocative story of the painter Vincent van Gogh's struggle to become his true self. The author listens in on Vincent's most intimate, frequently startling thoughts on a host of topics, drawn from three volumes of his correspondence and his 900 extant paintings. What emerges is the portrait of an artist whose spiritual vision was borne of an agonizingly prolonged experience of the "dark night of the soul" through which his art dared to envision the triumph of joy over sorrow, of resurrection over suffering and death. Readers will discover that in many ways Vincent's story is as much about us as about him. Tracing van Gogh's

pilgrimage from being an apprentice art dealer to being called to minister, in self-renunciation and misery, among destitute coal miners, the narrative follows his winding, tortuous path into adulthood as he struggles with family, associates, lovers--and with himself. Constantly evidenced in Vincent's own eloquent words and paintings is his tussle with the mysterious presence and maddening absence of God. Vocation unveils as a process of summoning and birthing his own self, through an attempt to imitate Christ, calling forth van Gogh's extraordinary creative powers from deep within. Adding choice supplies from other observers, Davidson here weaves his own exact, artful tapestry of interpretation, producing a suspenseful excursion into the life of van Gogh that offers profound meaning at every turn.

To become and be a mature human being, to be alive, in the midst of such a drama in which all people do in truth live, describes a radical participation. To be alive means, as Father Berrigan puts it, enduring the crisis of grace. The fruit of the gift of Christ to this world is an unequivocal and utterly vulnerable immersion in the world as it is. . . . It means living in such a way that life is welcomed as the extraordinary gift which life is and, then, honoring that gift by extravagance: by giving one's own life away. They call us dead men, and we live, wrote St. Paul. Berrigan's immersion into Pauline theology has allowed him to present his deepest concerns for the Church's role in the world. Knowing that the Church can not live in retreat from life, he illuminates the implications of the Triple Revolution--race, peace, and technology-- for committed Christians who wish to see true renewal within ecclesial life. --From the Introduction by William Stringfellow

**The Radical** Wipf and Stock Publishers  
"This country's leading hell-raiser" (The Nation) shares his impassioned counsel to young radicals on how to effect constructive social change and know "the difference between being a realistic radical and being a rhetorical one." First published in 1971 and written in the midst of radical political developments whose direction Alinsky was one of the first to question, this volume exhibits his style at its best. Like Thomas Paine before him, Alinsky was able to combine, both in his person and his writing, the intensity of political engagement with an absolute insistence on rational political discourse

and adherence to the American democratic tradition.

Ever wanted to ask Nostradamus for the winning lotto numbers or Napoleon about his complex? How about Van Gogh about the whole ear episode, or if Frida might consider a brow wax? Michael Stusser has done it for you in this book of imagined Q&A interviews with 45 of the most celebrated, notorious, and dead people in history. Based on his column in the popular and acclaimed magazine, "Mental Floss," this collection of conversations is incredibly funny, but the bulk of the content is based on serious research, so in addition to laughing, you're actually learning real history. Subjects include Alexander the Great, Buddha, Caligula, Winston Churchill, Salvador Dali, Leonardo DaVinci, Albert Einstein, Benjamin Franklin, Sigmund Freud, J. Edgar Hoover, Harry Houdini, Joan of Arc, Genghis Khan, Abraham Lincoln, Karl Marx, Edgar Allen Poe, Oscar Wilde, and dozens more. These guys might not have a pulse, but boy, can they talk.

Yellow Woman and a Beauty of the Spirit is a collection of twenty-two powerful and indispensable essays on Native American life, written by one of America's foremost literary voices. Bold and impassioned, sharp and defiant, Leslie Marmon Silko's essays evoke the spirit and voice of Native Americans. Whether she is exploring the vital importance literature and language play in Native American heritage, illuminating the inseparability of the land and the Native American people, enlivening the ways and wisdom of the old-time people, or exploding in outrage over the government's long-standing, racist treatment of Native Americans, Silko does so with eloquence and power, born from her profound devotion to all that is

Native American. Yellow Woman and a Beauty of the Spirit is written with the fire of necessity. Silko's call to be heard is unmistakable—there are stories to remember, injustices to redress, ways of life to preserve. It is a work of major importance, filled with indispensable truths—a work by an author with an original voice and a unique access to both worlds.

A 2020 LOCUS AWARD FINALIST Jeff VanderMeer's Dead Astronauts presents a City with no name of its own where, in the shadow of the all-powerful Company, lives human and otherwise converge in terrifying and miraculous ways. At stake: the fate of the future, the fate of Earth—all the Earths. A messianic blue fox who slips through warrens of time and space on a mysterious mission. A homeless woman haunted by a demon who finds the key to all things in a strange journal. A giant leviathan of a fish, centuries old, who hides a secret, remembering a past that may not be its own. Three ragtag rebels waging an endless war for the fate of the world against an all-powerful corporation. A raving madman who wanders the desert lost in the past, haunted by his own creation: an invisible monster whose name he has forgotten and whose purpose remains hidden.

**The Grateful Dead in Concert** Fordham Univ Press

This book offers a spirited analysis of the unique improvisational character of Grateful Dead music and its impact on appreciative fans. The 20 essays capture distinct facets of the Grateful Dead phenomenon from a broad range of scholarly angles. The band's trademark synergizing focus is discussed as a function of complex musical improvisation interlaced with the band members' collective assimilation of an impressive range of marginal musical forms and lyrical traditions. These facets are shown to produce a vibrant Deadhead experience, resulting in community influences still morphing in new directions 45 years after the band's initial impact.
