Gabaldon returns with the newest novel in the epic *Outlander* series. The past may seem the safest place to be . . . but it is the most dangerous time to be alive. . . . Jamie Fraser and Claire Randall were torn apart by the Jacobite Rising in 1746, and it took them twenty years to find each other again. Now the American Revolution threatens to do the same. It is 1779 and Claire and

Jamie are at last reunited with their daughter, Brianna, her husband, Roger, and their children on Fraser's Ridge. Having the family together is a dream the Frasers had thought impossible. Yet even in the North Carolina backcountry, the effects of war are being felt. Tensions in the Colonies are great and local feelings run hot enough to boil Hell's teakettle. Jamie knows loyalties

among his tenants are split and it won't be long until the war is on his doorstep. Brianna and Roger have their own worry: that the dangers that provoked their escape from the twentieth century might catch up to them. Sometimes they question whether risking the perils of the 1700s—among them disease, starvation, and an impending war—was indeed the

safer choice for their family. Not so far away, young William Ransom is still coming to terms with the discovery of his true father's identity—and thus his own—and Lord John Grey has reconciliations to make, and dangers to meet . . . on his son's behalf, and his own. Meanwhile, the Revolutionary War creeps ever closer to Fraser's Ridge. And with the family finally

together, Jamie and Claire have more at stake than ever before.

A beautiful sewing reference guide full of exercises designed to inspire great ideas and motivate readers of all skill levels to create. This inventive book is a treasure trove of over 40 inspiring

practical exercises, a rich and creative exploration of fabric and stitch, and a fascinating all-round read. Elizabeth Healey's approach to sewing is that it should be fun, and not like a chore or an exam we need to excel in. Her aim is to simply encourage you to pick up a needle and thread and get sewing! The exercises draw inspiration from around the world: create corded works of art

inspired by Milton Glaser's iconic Bob Dylan poster; craft bold embroidered African masks; layer up and cut away to make Mola applique; use bleach and fabric paint to create Aboriginal dreamtime lizards; create knotted works of art inspired by ancient Mayan counting systems; embroider varsity cross-stitch letters; or try out decorative Japanese book binding. Alternatively, try a host of

other techniques such as quilting, printing, dyeing, couching tumbled crockery, creating pleats and puckers, and needle lace. Packed with stitch galleries and bursting with slow sewing ideas, the book also contains "behind the stitches" features: illuminating insights into sewing movements such as Boro textiles, Gee's Bend quilting, and Dorset buttons.

charismatic. Now she teams up with Judah Pollack to reveal how anyone can train their brain to have more eureka insights. The creative mode in your brain is like a butterfly. It's beautiful and erratic, hard to catch and highly valued as a result. If you want to capture it, you need a net. Enter the executive mode, the task-oriented network in your brain that help you tie your shoes, run a meeting, or pitch a

client. To succeed, you need both modes to work together--your inner butterfly to be active and free, but your inner net to be ready to spring at the right time and create that "aha!" moment. But is there any way to trigger these insights, beyond dumb luck? Thanks to recent neuroscience discoveries, we can now explain these breakthrough moments--and also induce them through a series of specific practices. It

turns out there's a hidden pattern to all these seemingly random breakthrough ideas. From Archimedes' iconic moment in the bathtub to designer Adam Cheyer's idea for Siri, accidental breakthroughs throughout history share a common origin story. In this book, you will learn to master the skills that will transform your brain into a consistent generator of insights. Drawing on their

extensive coaching and training practice with top Silicon Valley firms, Cabane and Pollack provide a step-by-step process for accessing the part of the brain that produces breakthroughs and systematically removing internal blocks. Their tactics range from simple to zany, such as:

- Imagine an alternate universe where gravity doesn't exist, and the social and legal rules that govern it
- Map Disney's Pocahontas story onto James Cameron's Avatar.
- Rid yourself of imposter syndrome through mental exercises.
- Literally change your perspective by climbing a tree.
- Stimulate your mode by watching a foreign film without subtitles. By trying the exercises in this book, readers will emerge with a powerful new capacity for breakthrough thinking.
