Violence Expressed explores the diverse expressions and manifestations through which the meaning of violent experiences and events is (re)produced. As language alone does not always suffice for the description of violence, this book focuses not only on the verbal and discursive

expressions of violence, but also on the performative acts, material culture and the spaces that constitute these expressions. Such an approach provides a method of more comprehensively registering and understanding the manifestations and long-lasting effects of violence, whilst exploring violence both as an extreme subjective experience, and the 'ultimate truth', thus overcoming a common epistemological antagonism in researching violence. Offering a variety of analytical approaches and methodological perspectives, Violence Expressed presents

the latest empirical studies, ranging from the 'everyday' violence experienced by children, stories of rape, social memory and the discrepancy between private and public narratives, to rumours and silences or the iconography of violence. A compelling contribution to ongoing discussions on anthropological writing, this book will be of interest to anthropologists and social scientists working on violence, gender, collective representations and memory.

War, Denial and Nation-Building in Sri Lanka McGraw-Hill Companies

This book begins from a critical account of the final months of the Sri Lankan civil war, tracing themes of nationalism, discourse and conflict memory through this period of immense violence and into its aftermath. Using these themes to explore state crime, atrocity and its denial and representation, Seighe offers an analysis of how stories of conflict are authored and constructed. This book examines the political discourse of the former Rajapaksa government,

highlighting how fluency in international discourses of counter-terrorism, humanitarianism and the 'reconciliation' expected of states transitioning from conflict can be used to conceal and deny state violence. Drawing on extensive interviews with activists, academics, politicians, state representatives and international agency staff, and three months of observation in Sri Lanka in 2012, Seighe demonstrates how the Rajapaksa government re-narrativised violence through orchestrated techniques of denial and mass ritual discourse. It drew on and perpetuated a heightened majoritarian Sinhala-Buddhist nationalism which consolidated power under Sinhalese political elites, generated minority grievances and, in turn, sustained the repression and dispossession of the Tamil community of the Northeast. A detailed and evocative study, this book will be of special interest to scholars of conflict studies, political violence and critical criminology.
