*Australia's secret plan for total war under Japanese invasion in World War II* Createspace  
Independent Publishing Platform

For readers of *Being Mortal* and *Modern Death*, an ICU and Palliative Care specialist offers a framework for a better way to exit life that will change our medical culture at the deepest level. In medical school, no one teaches you how to let a patient die. Jessica Zitter became a doctor because she wanted to be a hero. She elected to specialize in critical care—to become an ICU physician—and imagined herself swooping in to rescue patients from the brink of death. But then during her first code she found herself cracking the ribs of a patient so old and frail it was unimaginable he would ever come back to life. She began to question her choice. *Extreme Measures* charts Zitter's journey from wanting to be one kind of hero to becoming another—a doctor who prioritizes the patient's values and preferences in an environment where the default choice is the extreme use of technology. In our current medical culture, the old and the ill are put on what she terms the End-of-Life Conveyor belt. They are intubated, catheterized, and even shelved away in care facilities to suffer their final days alone, confused, and often in pain. In her work Zitter has learned what patients fear more than death itself: the prospect of dying badly. She builds bridges between patients and caregivers, formulates plans to allay patients' pain and anxiety, and enlists the support of loved ones so that life can end well, even beautifully. Filled with rich patient stories that make a compelling medical narrative, *Extreme Measures* enlarges the national conversation as it thoughtfully and compassionately examines an experience that defines being human.

**How We Die** Farrar, Straus and Giroux

This book investigates who Lady Godiva was, how the story of her naked horseback ride through Coventry arose, and how the whole Godiva legend has evolved from the thirteenth century through to the present day. Traces the erotic myth of Lady Godiva back to its medieval origins. Based on scholarly research but written to be accessible to general readers. Combines history, literature, art and folklore. Focuses on the twin themes of voyeurism and medievalism. Contributes to our understanding of cultural history, medievalism and the history of sexuality.

*Doctored: The Disillusionment of an American Physician* Allen & Unwin

What happens to us as we die? Discover the answers in this exclusive 25th anniversary edition of Sherwin B Nuland's seminal book *With a foreword by Paul Kalanithi*, bestselling author of *When Breath Becomes Air*. There are many books intended to help people deal with the trauma of bereavement, but few which explore the reality of death itself. Sherwin B. Nuland - with over thirty years' experience as a surgeon - explains in detail the processes which take place in the body and strips away many illusions about death. The result is a unique and compelling book, addressing the one final fact that all of us must confront. 'I don't know of any writer or scientist who has shown us

the face of death as clearly, honestly and compassionately as Sherwin Nuland does here' James Gleick, author of *Chaos*

*Loving My Actual Life* Metropolitan Books

Readers of exciting, challenging and visionary literary fiction—including admirers of Norman Rush's *Mating*, Ann Patchett's *State of Wonder*, Barbara Kingsolver's *The Poisonwood Bible*, and Peter Matthiessen's *At Play in the Fields of the Lord*—will be drawn to this astonishingly gripping and accomplished first novel. A decade in the writing, this is an anthropological adventure story that combines the visceral allure of a thriller with a profound and tragic vision of what happens when cultures collide. It is a book that instantly catapults Hanya Yanagihara into the company of young novelists who really, really matter. In 1950, a young doctor called Norton Perina signs on with the anthropologist Paul Tallent for an expedition to the remote Micronesian island of Ivu'ivu in search of a rumored lost tribe. They succeed, finding not only that tribe but also a group of forest dwellers they dub "The Dreamers," who turn out to be fantastically long-lived but progressively more senile. Perina suspects the source of their longevity is a hard-to-find turtle; unable to resist the possibility of eternal life, he kills one and smuggles some meat back to the States. He scientifically proves his thesis, earning worldwide fame and the Nobel Prize, but he soon discovers that its miraculous property comes at a terrible price. As things quickly spiral out of his control, his own demons take hold, with devastating personal consequences.

**The Mayo Clinic** John Wiley & Sons

In his acclaimed memoir *Intern*, Sandeep Jauhar chronicled the formative years of his residency at a prestigious New York City hospital. *Doctored*, his harrowing follow-up, observes the crisis of American medicine through the eyes of an attending cardiologist. Hoping for the stability he needs to start a family, Jauhar accepts a position at a massive teaching hospital on the outskirts of Queens. With a decade's worth of elite medical training behind him, he is eager to settle down and reap the rewards of countless sleepless nights. Instead, he is confronted with sobering truths. Doctors' morale is low and getting lower. Blatant cronyism determines patient referrals, corporate ties distort medical decisions, and unnecessary tests are routinely performed in order to generate income. Meanwhile, a single patient in Jauhar's hospital might see fifteen specialists in one stay and still fail to receive a full picture of his actual condition. Provoked by his unsettling experiences, Jauhar has written an introspective memoir that is also an impassioned plea for reform. With American medicine at a crossroads, *Doctored* is the important work of a writer unafraid to challenge the establishment and incite controversy.

**Summary Atul Gawande's Being Mortal** World Scientific

In his critically-acclaimed book *Being Mortal*, bestselling author Atul Gawande discusses the hardest challenge that the medical profession faces. That is, how medicine can not only improve life but how does it also improve the process of its ending. Medicine has many triumphs in modern times. This field has transformed birth, disease, and injury from being harrowing to getting more manageable. However, in the inevitable condition of aging and death, the medical field has goals that seem to

often run counter to the common interest of the human spirit. Atul Gawande's *Being Mortal* is full of eye-opening research combined with riveting storytelling. Gawande asserts that the medical field can enhance and comfort our experience even to the very end, as it provides not only a good life but eventually, also a good end. In this comprehensive look into *Being Mortal: Medicine and What Matters in the End* by Atul Gawande, you'll gain insight with this essential resource as a guide to aid your discussions. Be prepared to lead with the following: More than 60 "done-for-you" discussion prompts available Discussion aid which includes a wealth of information and prompts Overall brief plot synopsis and author biography as refreshers Thought-provoking questions made for deeper examinations Creative exercises to foster alternate "if this was you" discussions And more! Please Note: This is a companion guide based on the work *Being Mortal: Medicine and What Matters in the End* by Atul Gawande not affiliated to the original work or author in any way and does not contain any text of the original work. Please purchase or read the original work first.

#### *Physician-Assisted Death* Blurb

"A mystery and an elegy for the death of old-fashioned journalism, it's a book that will warm your heart." *The Observer* "Splendid . . . Funny, poignant, perceptive and plenty of sharp elbows along the way." Val McDermid Thorn Marsh was raised in a house of whispers, of meaningful glances and half-finished sentences. Now she's a journalist with a passion for truth, more devoted to her work at the *London Journal* than she ever was to her ex-husband. When the newspaper is bought by media giant The Goring Group, who value sales figures over fact-checking, Thorn openly questions their methods, and promptly finds herself moved from the news desk to the midweek supplement, reporting heart-warming stories for their new segment, *The Bright Side*, a job to which she is spectacularly unsuited. On a final warning and with no heart-warming news in sight, a desperate Thorn fabricates a good-news story of her own. The story, centred on an angelic apparition on Hampstead Heath, goes viral. Caught between her principles and her ambitions, Thorn goes in search of the truth behind her creation, only to find the answers locked away in the unconscious mind of a stranger. Marika Cobbold returns with her eighth novel, *On Hampstead Heath*. Sharp, poignant, and infused with dark humour, *On Hampstead Heath* is an homage to storytelling and to truth; to the tales we tell ourselves, and the stories that save us.

#### **Finding a Better Path to the End of Life** Jossey-Bass

After losing someone she loved, artist Candy Chang painted the side of an abandoned house in her New Orleans neighborhood with chalkboard paint and stenciled the sentence, "Before I die I want to \_\_\_\_." Within a day of the wall's completion, it was covered in colorful chalk dreams as neighbors stopped and reflected on their lives. Since then, more than four hundred *Before I Die* walls have been created by people all over the world. This beautiful hardcover book is an inspiring celebration of these walls and the stories behind them. Filled with hope, fear, humor, and heartbreak, *Before I Die* presents an intimate portrait of the dreams within our communities and a chance to ponder life's ultimate question.

#### *Better Anchor*

"With *When Death Becomes Life*, Joshua Mezrich has performed the perfect core biopsy of transplantation—a clear and compelling account of the grueling daily work, the spell-binding history and the unsettling ethical issues that haunt this miraculous lifesaving treatment. Mezrich's

compassionate and honest voice, punctuated by a sharp and intelligent wit, render the enormous subject not just palatable but downright engrossing."—Pauline Chen, author of *Final Exam: A Surgeon's Reflections on Mortality* A gifted surgeon illuminates one of the most profound, awe-inspiring, and deeply affecting achievements of modern day medicine—the movement of organs between bodies—in this exceptional work of death and life that takes its place besides Atul Gawande's *Complications*, Siddhartha Mukherjee's *The Emperor of All Maladies*, and Jerome Groopman's *How Doctors Think*. At the University of Wisconsin, Dr. Joshua Mezrich creates life from loss, transplanting organs from one body to another. In this intimate, profoundly moving work, he illuminates the extraordinary field of transplantation that enables this kind of miracle to happen every day. *When Death Becomes Life* is a thrilling look at how science advances on a grand scale to improve human lives. Mezrich examines more than one hundred years of remarkable medical breakthroughs, connecting this fascinating history with the inspiring and heartbreaking stories of his transplant patients. Combining gentle sensitivity with scientific clarity, Mezrich reflects on his calling as a doctor and introduces the modern pioneers who made transplantation a reality—maverick surgeons whose feats of imagination, bold vision, and daring risk taking generated techniques and practices that save millions of lives around the world. Mezrich takes us inside the operating room and unlocks the wondrous process of transplant surgery, a delicate, intense ballet requiring precise timing, breathtaking skill, and at times, creative improvisation. In illuminating this work, Mezrich touches the essence of existence and what it means to be alive. Most physicians fight death, but in transplantation, doctors take from death. Mezrich shares his gratitude and awe for the privilege of being part of this transformative exchange as the dead give their last breath of life to the living. After all, the donors are his patients, too. *When Death Becomes Life* also engages in fascinating ethical and philosophical debates: How much risk should a healthy person be allowed to take to save someone she loves? Should a patient suffering from alcoholism receive a healthy liver? What defines death, and what role did organ transplantation play in that definition? The human story behind the most exceptional medicine of our time, Mezrich's riveting book is a beautiful, poignant reminder that a life lost can also offer the hope of a new beginning.

#### *The PICU Book* Penguin

This is a Summary of Atul Gawande's *Being Mortal*, where this bestselling author tackles the hardest challenge of his profession: how medicine can not only improve life but also the process of its ending. Medicine has triumphed in modern times, transforming birth, injury, and infectious disease from harrowing to manageable. But in the inevitable condition of aging and death, the goals of medicine seem too frequently to run counter to the interest of the human spirit. Nursing homes, preoccupied with safety, pin patients into railed beds and wheelchairs. Hospitals isolate the dying, checking for vital signs long after the goals of cure have become moot. Doctors, committed to extending life, continue to carry out devastating procedures that in the end extend suffering. Gawande, a practicing surgeon, addresses his profession's ultimate limitation, arguing that quality of life is the desired goal for patients and families. Gawande offers examples of freer, more socially fulfilling models for assisting the infirm and dependent elderly, and he explores the varieties of hospice care to demonstrate that a person's last weeks or months may be rich and dignified. Full of eye-opening research and riveting storytelling, *Being Mortal* asserts that medicine can comfort and enhance our

experience even to the end, providing not only a good life but also a good end. Available in a variety of formats, this summary is aimed for those who want to capture the gist of the book but don't have the current time to devour all 304 pages. You get the main summary along with all of the benefits and lessons the actual book has to offer. This is a summary that is not intended to be used without reference to the original book.

#### **A Surgeon's Notes on Performance** Rosetta Books

"A memoir from Ta-Nehisi Coates, in which he details the challenges on the streets and within one's family, especially the eternal struggle for peace between a father and son and the important role family plays in such circumstances"--

#### **How to Get Things Right** Metropolitan Books

A prominent surgeon argues against modern medical practices that extend life at the expense of quality of life while isolating the dying, outlining suggestions for freer, more fulfilling approaches to death that enable more dignified and comfortable choices.

#### **Live Long, Die Short** ZIP Reads

Imagine Being On Your Death Bed... Who do you want to be around you? How would you like to be treated? Death... is indeed a heavy topic. In *Being Mortal*, Atul Gawande addresses end-of-life care, hospice care and his personal reflections and stories. It has been said that if we live each day as if it was our last, one day we'd surely be right. Life and death is an interesting paradox isn't it? We don't carry anything to Earth when we are born... .. and we can't take anything with us when we are gone. All we have left is the memories of the people we've touched, the things we've created and our legacy. *Being Mortal* is written by Atul Gawande and first published in 2014. It is truly a valuable book since death is such a heavy topic and not many people want to talk about it. Is end-of-life care good enough? What else can we do to help patients who are facing the end of life? Here's what you'll discover... --- Chapter 1: Being Old - Being More Independent --- Chapter 2: Falling Apart --- Chapter 3: Depending on Others --- Chapter 4: The Assistance Necessary --- Chapter 5: How to Improve Nursing Home Life --- Chapter 6: At the End --- Chapter 8: Bravery: Why It's Needed --- And so much more. We only truly understand life when we understand death. If you're ready to get more perspectives on life, click on the BUY NOW button and start reading this summary book NOW! -----

#### Extreme Measures Ember

ABOUT THE ORIGINAL BOOK One of the most difficult issues to address is death. The mere idea of dying causes different reactions in people, that can basically be categorized in two ways: those who see it as being reborn into a better life, and those who are terrified by the inevitability of the fact

that one day they will die. Whatever our perspective of death, it is hard for us to think about how we want to spend our last days. For about fifty years, modern medicine has extended life, but medicine still has no control over how to handle the process when the time of death approaches. The longer our life expectancy, the longer our descent will be, along the tortuously long road. For those destined to die, it is questionable to put forward the scientific advances that feed the pioneers ego as an increase in quality of life. In *Being Mortal*, author Atul Gawande, addresses precisely this issue, and analyzes the birth of nursing homes, independent and assisted living centers, and the diverse roles that modern programs can play to support those who approach the end of their lives. We believe that medicine is about guaranteeing health and survival. But, it is much more than that. Because those who suffer from a serious illness have other priorities besides prolonging their lives - the author writes. This is reality. A person who knows that they are going to die does not want to suffer. They need to strengthen their relationships with their family and friends, be mentally conscious and healthy, not be a burden to others, and feel that their life is complete. When it comes to this aspect of mortality, health care has completely failed.

#### A Literary History of the Legend Oxford University Press

The New York Times bestselling author of *Being Mortal* and *Complications* reveals the surprising power of the ordinary checklist We live in a world of great and increasing complexity, where even the most expert professionals struggle to master the tasks they face. Longer training, ever more advanced technologies—neither seems to prevent grievous errors. But in a hopeful turn, acclaimed surgeon and writer Atul Gawande finds a remedy in the humblest and simplest of techniques: the checklist. First introduced decades ago by the U.S. Air Force, checklists have enabled pilots to fly aircraft of mind-boggling sophistication. Now innovative checklists are being adopted in hospitals around the world, helping doctors and nurses respond to everything from flu epidemics to avalanches. Even in the immensely complex world of surgery, a simple ninety-second variant has cut the rate of fatalities by more than a third. In riveting stories, Gawande takes us from Austria, where an emergency checklist saved a drowning victim who had spent half an hour underwater, to Michigan, where a cleanliness checklist in intensive care units virtually eliminated a type of deadly hospital infection. He explains how checklists actually work to prompt striking and immediate improvements. And he follows the checklist revolution into fields well beyond medicine, from disaster response to investment banking, skyscraper construction, and businesses of all kinds. An intellectual adventure in which lives are lost and saved and one simple idea makes a tremendous difference, *The Checklist Manifesto* is essential reading for anyone working to get things right.

#### Survival Skills for GPs *Being Mortal* Medicine and What Matters in the End

Author and physician Atul Gawande analyzes the diverse and problematic landscape of end-of-life care. By providing examples of the good and bad, Gawande shows that we as a society can do much better for the elderly and dying. What does this ZIP Reads Summary Include? Synopsis of the original book A detailed look at our current "medical approach" to death An argument for a more palliative approach to death and dying An in-depth editorial review Background on the author About the Original Book: Gawande's book is a measured, insightful criticism of the medical model of end-of-life care. He convincingly shows that a palliative model of care not only improves the quality of our last days, but it even seems to prolong life better than its counterpart. Anyone interested in end-of-life issues,

ethics, gerontology, or medicine will enjoy this book, but Gawande's anecdotal style makes this an appealing, approachable read for just about anyone. **DISCLAIMER:** This book is intended as a companion to, not a replacement for, *Being Mortal: Medicine and What Matters in the End*. ZIP Reads is wholly responsible for this content and is not associated with the original author in any way.

*Before I Die* Baker Books

**NATIONAL BESTSELLER** The New York Times bestselling author of *Being Mortal* and *Complications* examines, in riveting accounts of medical failure and triumph, how success is achieved in a complex and risk-filled profession. The struggle to perform well is universal: each one of us faces fatigue, limited resources, and imperfect abilities in whatever we do. But nowhere is this drive to do better more important than in medicine, where lives are on the line with every decision. In this book, Atul Gawande explores how doctors strive to close the gap between best intentions and best performance in the face of obstacles that sometimes seem insurmountable. Gawande's gripping stories of diligence, ingenuity, and what it means to do right by people take us to battlefield surgical tents in Iraq, to labor and delivery rooms in Boston, to a polio outbreak in India, and to malpractice courtrooms around the country. He discusses the ethical dilemmas of doctors' participation in lethal injections, examines the influence of money on modern medicine, and recounts the astoundingly contentious history of hand washing. And as in all his writing, Gawande gives us an inside look at his own life as a practicing surgeon, offering a searingly honest firsthand account of work in a field where mistakes are both unavoidable and unthinkable. At once unflinching and compassionate, *Better* is an exhilarating journey narrated by "arguably the best nonfiction doctor-writer around" (Salon). Gawande's investigation into medical professionals and how they progress from merely good to great provides rare insight into the elements of success, illuminating every area of human endeavor.

*Faith, Hope, Science* National Library of Australia

The issue of physician-assisted death is now firmly on the American public agenda. Already legal in five states, it is the subject of intense public opinion battles across the country. Driven by an increasingly aging population, and a baby boom generation just starting to enter its senior years, the

issue is not going to go away anytime soon. In *Physician-Assisted Death*, L.W. Sumner equips readers with everything they need to know to take a reasoned and informed position in this important debate. The book provides needed context for the debate by situating physician-assisted death within the wider framework of end-of-life care and explaining why the movement to legalize it now enjoys such strong public support. It also reviews that movement's successes to date, beginning in Oregon in 1994 and now extending to eleven jurisdictions across three continents. Like abortion, physician-assisted death is ethically controversial and the subject of passionately held opinions. The central chapters of the book review the main arguments utilized by both sides of the controversy: on the one hand, appeals to patient autonomy and the relief of suffering, on the other the claim that taking active steps to hasten death inevitably violates the sanctity of life. The book then explores both the case in favor of legalization and the case against, focusing in the latter instance on the risk of abuse and the possibility of slippery slopes. In this context the experience of jurisdictions that have already taken the step of legalization is carefully reviewed to see what lessons might be extracted from it. It then identifies some further issues that lie beyond the boundaries of the current debate but will have to be faced sometime down the road: euthanasia for patients who are permanently unconscious or have become seriously demented and for severely compromised newborns. The book concludes by considering the various possible routes to legalization, both political and judicial. Readers will then be prepared to decide for themselves just where they stand when they confront the issue both in their own jurisdiction and in their own lives.
