Introductory Statistics is designed for the one-semester, introduction to statistics course and is geared toward students majoring in fields other than math or engineering. This text assumes students have been exposed to intermediate algebra, and it focuses on the applications of statistical knowledge rather than the theory behind it. The foundation of this textbook is Collaborative Statistics, by Barbara Illowsky and Susan Dean. Additional topics, examples, and ample opportunities for practice have been added to each chapter. The development choices for this textbook were made with the guidance of many faculty members who are deeply involved in teaching this course. These choices led to innovations in art, terminology, and practical

applications, all with a goal of increasing relevance and accessibility for students. We strove to make the discipline meaningful, so that students can draw from it a working knowledge that will enrich their future studies and help them make sense of the world around them. Coverage and Scope Chapter 1 Sampling and Data Chapter 2 Descriptive Statistics Chapter 3 Probability Topics Chapter 4 Discrete Random Variables Chapter 5 Continuous Random Variables Chapter 6 The Normal Distribution Chapter 7 The Central Limit Theorem Chapter 8 Confidence Intervals Chapter 9 Hypothesis Testing with One Sample Chapter 10 Hypothesis Testing with Two Samples Chapter 11 The Chi-Square Distribution Chapter 12 Linear Regression and Correlation Chapter 13 F Distribution and One-Way ANOVA

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to

their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. "A brilliant and thoroughly modern guide to learning new languages."—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with pronunciation, you'll learn how to rewire your ears and turn foreign sounds into familiar sounds. You'll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the

most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.

Written by Galician surrealist artist and revolutionary E.F. Granell, *The Novel of the Tupinamba Indian* is a picaresque, Cervantes-influenced allegory of the Spanish Civil War. Set against a cruel landscape peopled by generals, priests, conquistadors, poets, witches, and nuns, Tupinamba Indian embodies Granell's wartime experiences while transforming them through his lush and incendiary surrealist imagination. Praise for *The Novel of the Tupinamba Indian*: "In an ever-shifting world populated by nameless, iconic stock figures, the Tupinamba Indian (whose head, slashed off by a conquistador, remains detachable/attachable in a brilliant metaphor for colonialism) wanders, stumbles, and thrives in a war landscape where time and space morph. ... A war novel, a political allegory not only of the late '30s but also our current political moment ..."—Gillian Conoley "Granell's Tupinamba Indian magnificently registers the author's experience with the didactic inferno of war and his ability to imaginatively ascend above it."—Will Alexander "An exceptional sense of humor filters through [Granell's] war experience, fleeing expectations and convictions, and freeing him to levitate this personal and collective history into a madcap romp through a violated landscape. Where tragedy emerges with the Fascist victory, prologue to World War Two, laughter curdles its edges then burns it up. ... No group is sacrosanct, no one beyond reproach, priests, intellectuals, and leader (aka Franco, our 'tiny Grand Turk'), included."—Allan Graubard, co-editor of *Invisible Heads: Surrealists in North America - An Untold Story* Artist, writer, musician, socialist, professor, and veteran of the Spanish Civil War, Eugenio F. Granell (1912-2001) was one of the leading figures of the post-World War II international surrealist movement. Translator David Coulter is an artist who currently divides his time between Berkeley, CA and Coimbra, Portugal, where he participates with the Cabo Mondego Section of Portuguese Surrealism.
