The DREAM TEAM was a bunch of kids from Akron, Ohio-LeBron James and his best friends-who first met on a youth basketball team of the same name when they were ten and eleven years old. United by their love of the game and their yearning for companionship, they quickly forged a bond which would carry them through thick and thin (a lot of thin) and, at last, to the brink of a national championship. They were a motley group who faced challenges all too typical of inner-city America. LeBron grew up without a father and had moved with his mother more than a dozen times by the age of 10. Willie McGee, the quiet one, had left both his parents behind in Chicago to be raised by his older brother in Akron. Dru Joyce was outspoken, and his dad, who was ever-present, would end up coaching all five of the boys in high school. Sian Cotton, who also played football, was the happy-go-lucky enforcer, while Romeo Travis was unhappy, bitter, even surly, until he finally opened himself up to the bond his team mates offered. In the summer after seventh grade, the DREAM TEAM tasted glory when they qualified for a national championship tournament in Memphis. But they lost their focus, and had to go home early. They promised each other they would stay together and do whatever it took to win a national title. They had no idea how hard it would be to pursue that promise. In the years that followed, they would endure jealousy, hostility, exploitation, resentment from the black community (because they went to a "white" high school), and the consequence of their own over-confidence. Not least, they would all have to wrestle with LeBron's outsize success, which brought too much attention and even a whiff of scandal their way. But together these five boys became men as they sought a national championship.

Franklin, Jack, Marla, Thadius, and Caitlin... this unlikely group of assorted misfits are the Cemeterians, a group that will take on any job - no, really, we mean any bloody job (money's a bit tight

right now)! Trudge through disgusting sewers to battle manatee-massacring mermaids and soggy cultists, creep through creepy, fog-littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasties, creepies, and ghoulies. It all comes down to whether an adolescent giant Automaton, a truly mad, Mad Scientist, a surly Necromancer, a Banshee's granddaughter, and a reluctant furry monster straight from under your little sister's bed can manage not to kill each other - or, at least, quit fighting over the tele-privilege-schedule long enough to get the job done! Not likely.

Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation). Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway. Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers. GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago. You can save \$2,000 by cutting freight fees and "administrative" charges. Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea. After nearly thirty years in the public eye, Arnold Schwarzenegger's rise to fame and fortune--and statesmanship--represents a celebrity the likes of which we've never seen before. As co-authors and longtime collaborators Blitz and Krasniewicz argue in this humorous but heady book, it is not just a matter of his transformation from bodybuilder to megastar to politician. Nor is his governorship of California just a matter of another actor assuming the position. Instead, at the beginning of the 21st century, "Arnoldness" has spread into every corner of our culture. More than a name, more than a spectacular career, he has become a set of ideas--an ultramodern take on the quintessential American dream. Having followed the cult of Arnold for twenty years, Blitz and Krasniewicz are uniquely qualified to illuminate his growing hold on our collective imagination. As an adjective, as a metaphor, as an easy reference point for anyone talking about things tough, forceful, and successful, they'll explain exactly why Arnold matters--and for better or worse, richer or poorer, America may never be the same.

Road Vehicle Dynamics supplies students and technicians working

in industry with both the theoretical background of mechanical and automotive engineering, and the know-how needed to perform numerical simulations. Bringing together the foundations of the discipline and its recent developments in a single text, the book is structured in three parts: it begins with a historical overview of road vehicles; then deals with the forces exchanged between the vehicle and the road, and the vehicle and the air; and finally, deals with the dynamic behavior of the vehicle in normal driving conditions with some extensions towards conditions encountered in high-speed racing. Coverage of contemporary automatic controls is included in this edition. *Road Vehicle Dynamics: Fundamentals Of Modeling And Simulation* St. Martin's Press

As the effects of the global recession linger, consumers everywhere are changing their purchasing patterns, paying greater attention to what and why they are buying, and from whom. While many feel rampant spending is hard-wired into the modern psyche and that we will be back to our wasteful ways soon enough, there are clear indications of a permanent shift in the way we shop. Even before the economic downturn, consumers' definitions of value had begun to change. People were becoming more mindful about their purchases and more attuned to the social and environmental implications of their choices. To better understand this important evolution and its ramifications for business, Andrew Benett and Anne O'Reilly launched a groundbreaking study on the New Consumer and the escalating dissatisfaction over hyperconsumerism. Here, for the first time, is an in-depth look at the new face of the global consumer, showing that:

- A significant majority in the seven markets surveyed are deeply worried about the direction in which our consumption-obsessed society is moving. They believe people have become both physically and mentally lazy, and that, as a society, we have lost sight of what truly matters.
- Two-thirds believe they would be better off if they lived more simply, and a quarter say they would be happier if they owned fewer things.
- Half of Americans surveyed are deriving a sense of satisfaction from reducing their purchases during the downturn, and three-quarters are feeling good about cutting back on the amount of waste they create.
- A majority of Americans have no intention of going back to their old shopping patterns, even when the economy rebounds. Now, as the consumer voice signals its changed priorities, forward-

thinking companies are responding by rejecting excess and artificiality in favor of products and communications that offer authenticity, substance, and interconnectedness—all values today's more mindful consumer craves. In this book, the brand experts look at corporations as diverse as Glenmorangie and Wal-Mart to see what lessons they can offer to businesses attempting to grow in the postconsumerism era. They also spoke with corporate leaders in a variety of industries to learn how they are recasting their businesses and brands in order to prepare for the changes ahead. Through cutting-edge research and a sharp look at new industry models, *Consumed* provides real direction for marketers and managers.

Automakers are as prone to turn out clunkers as politicians are to lie. Their cars may be ugly, misconceived, badly built, diabolical to drive, ridiculously thirsty, or just plain unreliable. So which were the worst of the past 20 years?

Chevelle Performance Projects, 1964-1972 W. W. Norton & Company

U.S. Marine Corps combat veteran CPL COX is not a hero. He's an average American who joined the military during peacetime with the dream of honor and willingness to sacrifice in the service of his country. On February 7, 2003, he left loved ones behind, stepped into the darkness of the unknown and found himself in the midst of Operation Iraqi Freedom. This memoir, rewritten from the pages of his journal, delivers an informative, personal, thought-provoking and sometimes poignant look into his wartime experience. But even more remarkable is the insight it provides regarding the inner struggles CPL COX had to face as a member of the United States military -- the physical, emotional and psychological challenges faced similarly, yet in their own individual ways by American service men and women all over the world. **WAR CHANGES LIVES?** What was it like?? Eric J Cox does an excellent job of answering this question although what you may find most astonishing is that combat was only a prelude to the psychological battles he would face. With the fall of the Saddam Hussein regime, his unit's wartime role was basically over, yet their hardest days were yet to come?
