This book sheds light on the practice of

French choreographer Jérôme Bel, who is active in the fields of performing arts and contemporary art. Shuntaro Yoshida examines a case study of collective creation involving the choreographer and a group of amateur workshop participants. The focus is on Atelier Danse et Voix (Dance and Voice Workshop) (2014) and workshops held with local diverse participants in Brussels, Venice, and Munich after the cancellation of the Dance and Voice Workshop. This study elucidates Bel's creative method by exploring the relationship between choreographer and participants in a situation where the typical framework of actors has been expanded. The focus of the case study is not so much the choreographic methodology itself, but the relationship

between the method and the participants and the ways in which the choreographer cedes creative decision-making power to participants. In order to investigate Bel's creative method, this study makes use of participant observation field notes taken during a rehearsal. Additional data sources include Bel's emailed materials, performance programs, and interviews with participants. This book will be of great interest to students and scholars in theater, performance, and dance studies.

The End of Oulipo?

Amateur Craft provides an illuminating and historically-grounded account of amateur craft in the modern era, from 19th century Sunday painters and amateur carpenters to present day

railway modellers and yarnbombers. Stephen Knott's fascinating study explores the curious and unexpected attributes of things made outside standardised models of mass production, arguing that amateur craft practice is 'differential' - a temporary moment of control over work that both departs from and informs our productive engagement with the world. Knott's discussion of the theoretical aspects of amateur craft practice is substantiated by historical case studies that cluster around the period 1850-1950. Looking back to the emergence of the modern amateur, he makes reference to contemporary art and design practice that harnesses or exploits amateur conditions of making. From Andy Warhol to Simon Starling, such artistic interest elucidates the

mercurial qualities of amateur craft. Invaluable for students and researchers in art and design, contemporary craft, material culture and social history, Amateur Craft counters both the marginalisation and the glorification of amateur craft practice. It is richly illustrated with 41 images, 14 in colour, including 19th century ephemera and works of contemporary art.
