A definitive chronicle of the 1871 Chicago Fire as remembered by those who experienced it—from the author of Chicago and the American Literary Imagination. Over three days in October, 1871, much of Chicago, Illinois, was destroyed by one of the most legendary urban fires in history. Incorporated as a city in 1837, Chicago had grown at a breathtaking pace in the intervening decades—and much of the hastily-built city was made of wood. Starting in Catherine and Patrick O'Leary's barn, the Fire quickly grew out of control, twice jumping branches of the Chicago River on its relentless path through the city's three divisions. While the death toll was miraculously low, nearly a third of Chicago residents were left homeless and more were instantly unemployed. This popular history of the Great Chicago Fire approaches the subject through the memories of those who experienced it. Chicago historian Carl Smith builds the story around memorable characters, both known to history and unknown, including the likes of General Philip Sheridan and Robert Todd

Lincoln. Smith chronicles the city's rapid growth and its place in America's post-Civil War expansion. The dramatic story of the fire—revealing human nature in all its guises—became one of equally remarkable renewal, as Chicago quickly rose back up from the ashes thanks to local determination and the world's generosity. As we approach the fire's 150th anniversary, Carl Smith's compelling narrative at last gives this epic event its full and proper place in our national chronicle. "The best book ever written about the fire, a work of deep scholarship by Carl Smith that reads with the forceful narrative of a fine novel. It puts the fire and its aftermath in historical, political and social context. It's a revelatory pleasure to read." —Chicago Tribune

The Great Fire of 1871 was one of most colossal disasters in American history. Overnight, the flourishing city of Chicago was transformed into a smoldering wasteland. The damage was so profound that few people believed the city could ever rise again. By weaving personal accounts of actual survivors together with the carefully researched history of Chicago and the disaster, Jim Murphy constructs a riveting narrative that recreates the event with drama and immediacy. And finally, he reveals how, even in a time of deepest despair, the human spirit triumphed, as the people of Chicago found the courage and strength to build their city once again.

It is a truth universally acknowledged that pupils do not learn all that they are taught. They may learn something, they may even learn a lot, but it may not be a lot of what we think we have taught them or they may struggle to apply knowledge successfully. In this book, bestselling author Alex Quigley characterises how the long and winding road of successful learning is paved with many failures along the way. Presenting eight key reasons why learning fails, alongside concepts from cognitive science and research evidence explained concisely and accessibly, the chapters span issues of pupils' limited memory, their patchwork prior knowledge, flawed planning, struggles with independent learning, motivation, limits of attention, and more. Each chapter explores real-life examples of key learning failures and what can be done about it, before ending with five steps to success, along with practical teaching strategies and tools that can be used to secure success in every classroom. Packed with practical advice and examples for teachers across all phases at every stage of their teaching career, this book offers a vital guide to support pupils to overcome common barriers to learning and go on to flourish while challenging the societal stereotypes that see us shy away from failures.
