Amateur road racer, raconteur and car guy extraordinaire, Anatoly Arutunoff tells a lifetime of his favorite true first person stories. From his

youth in Bartlesville, Oklahoma, to participation at the real Targa Florio, to eventually winning the SCCA runoffs in his Morgan 4/4, to more recent times on the historic rally circuit Toly makes you think you were there sharing all the adventures and camaraderie. There are intriguing family moments, the exuberance of youth and brushes with greats such as Redman, Clark and Moss plus many lesser known players from the past sixty years who collectively molded the

sports car culture that has always surrounded the author. Written in an uncomplicated and light-hearted style the reader will either renew a relationship or discover a new friend in a man who suggests, "All the car stuff I've done is a sort of cross-section of what you would have done, if you'd been young in the sixties and had the money." Ride with Toly on the roads and racetracks in America and Europe and share in an experience that is truly "One Off!"

We're told that the future will be brighter. But what if human happiness really lies in the past? Hobart, 2022: a city with a declining population, in the grip of a dark recession. A rusty ship sails into the harbour and begins to unload its cargo on the site of the once famous but now abandoned Gallery of

Future Art, known to the world as GoFA. One day the city's residents are awoken by a high-pitched sound no one has heard for two generations: a factory whistle. GoFA's owner, world-famous billionaire Dundas Faussett, is creating his most ambitious installation yet. He's going to defeat technology's dominance over our lives by establishing a new Year Zero: 1948. Those whose jobs have been destroyed by Amazon and Uber and Airbnb are invited to fight

back in the only way that can possibly succeed: by living as if the internet had never been invented. The hold of Bezos, Musk, Zuckerberg and their ilk starts to loosen as the revolutionary example of Factory 19 spreads. Can nostalgia really defeat the future? Can the little people win back the world? We are about to find out. 'Like Orwell, of whom he has written so brilliantly, Dennis Glover's work is charged with courage, intelligence and purpose. He is the complete writer, and one

made for our times.' —Don Watson 'Savagely hilarious and unlike anything else you'll read this year. It boils with the anger of the present moment.' —Rohan Wilson *Promoting Human Wellness* Princeton Book Company Publishers Popular Mechanics inspires, instructs and influences readers to help them master the modern world. This is a book about the science behind whisky: its production, its measurement, and its flavor. The main purpose of this book is to review the current state of whisky science in the open literature. The focus is principally on

chemistry, which describes molecular structures and their interactions, and chemical engineering which is concerned with realizing chemical processes on an industrial scale.

Biochemistry, the branch of chemistry concerned with living things, helps to understand the role of grains, yeast, bacteria, and oak.

Thermodynamics, common to chemistry and chemical engineering, describes the energetics of transformation and the state that substances

assume when in equilibrium. This book contains a taste of flavor chemistry and of sensory science, which connect the chemistry of a food or beverage to the flavor and pleasure experienced by a consumer. There is also a dusting of history, a social science.
